TRANSNATIONAL ISSUES

Disputes—international: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

Illicit drugs: southern African transit point for South Asian hashish and heroin, and South American cocaine probably destined for the European and South African markets; producer of cannabis (for local consumption)

and methaqualone (for export to South Africa); corruption and poor regulatory capability make the banking system vulnerable to money laundering, but the lack of a well-developed financial infrastructure limits the country's utility as a money-laundering center

N

NAMIBIA

INTRODUCTION

Background: South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that became Namibia, but it was not until 1988

that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Namibia has been governed by SWAPO since the country won independence in 1990. Hifikepunye POHAMBHA was elected president in November 2004 in a landslide victory replacing Sam NUJOMA who led the country during its first 14 years of self rule. POHAMBHA was reelected in November 2009.

ECONOMY

Economy—overview: The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 11.5% of GDP, but provides more than 50% of foreign exchange earnings. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Marine diamond mining is becoming increasingly important as the terrestrial diamond supply has dwindled. Namibia is the world's fourth-largest producer of uranium. It also produces large quantities of zinc and is

a small producer of gold and other minerals. The mining and quarrying sectors employs only about 1.8% of the population. Namibia normally imports about 50% of its cereal requirements; in drought years food shortages are a major problem in rural areas. A high per capita GDP, relative to the region, hides one of the world's most unequal income distributions, as shown by Namibia's 59.7 GINI coefficient. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged one-to-one to the South African rand. Namibia receives 30%-40% of its revenues from the Southern African Customs Union (SACU). Volatility in the size of Namibia's annual SACU allotment complicates budget planning. Namibia's economy remains vulnerable to volatility in the price of uranium and other commodities. The rising cost of mining diamonds, increasingly from the sea, has reduced profit margins. Namibian authorities recognize these issues and have emphasized the need to increase higher value raw materials, manufacturing, and services, especially in the logistics and transportation sectors.

TRANSNATIONAL ISSUES

Disputes—international: concerns from international experts and local populations over the Okavango Delta ecology in Botswana and human displacement scuttled Namibian plans to construct a hydroelectric dam on Popa Falls along the Angola-Namibia border; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River; Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Trafficking in persons: *current situation:* Namibia is predominantly a country of origin and destination for children and, to a lesser extent, women subjected to forced labor and sex trafficking; victims lured by promises of legitimate jobs are forced to work in hazardous condition in urban centers and on commercial farms; traffickers exploit Namibian children, as well as children from Angola, Zambia, and Zimbabwe, for forced labor in agriculture, cattle herding, domestic service, and criminal activities; children are also forced into prostitution, often catering to tourists from southern Africa and Europe; girls of the San tribe are particularly vulnerable

tier rating: Tier 2 Watch List—Namibia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2012, the government launched a National Plan of Action on Gender-Based Violence, which included addressing human trafficking but did not complete its draft comprehensive anti-trafficking legislation or obtain parliamentary passage of the Child Care and Protection Bill, which would criminalize child trafficking; a process has been developed for referring trafficking victims for assistance but a system for screening potential victims and providing official designation of trafficking victim status is lacking (2013)

NAURU

INTRODUCTION

Background: The exact origins of the Nauruans are unclear since their language does not resemble any other in the Pacific region. Germany annexed the island in 1888. A German-British consortium began mining the island's phosphate deposits early in the 20th century. Australian forces occupied Nauru in World War I; it subsequently became a League of Nations mandate. After the Second World War—and a brutal occupation by Japan—Nauru became a UN trust territory. It achieved independence in 1968 and joined the UN in 1999 as the world's smallest independent republic.

GEOGRAPHY

Location: Oceania, island in the South Pacific Ocean, south of the Marshall Islands

ECONOMY

Economy—overview: Revenues of this tiny island traditionally have come from exports of phosphates. Few other resources exist, with most necessities being imported, mainly from Australia, its former occupier and later major source of support. In 2005 an Australian company entered into an agreement to exploit remaining supplies. Primary reserves of phosphates were exhausted and mining ceased in 2006, but mining of a deeper layer of "secondary phosphate" in the interior of the island began the following year. The secondary phosphate deposits may last another 30 years. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income were invested in trust funds to help cushion the transition and provide for Nauru's economic future. As a result of heavy spending from the trust funds, the government faced virtual bankruptcy. To cut costs the government has frozen wages and reduced overstuffed public service departments. Nauru lost further revenue in 2008 with the closure of Australia's refugee processing center, making it almost totally dependent on food imports and foreign aid. Housing, hospitals, and other capital plant are

deteriorating. The cost to Australia of keeping the government and economy afloat continues to climb. Few comprehensive statistics on the Nauru economy exist with estimates of Nauru's GDP varying widely.

NAVASSA ISLAND

INTRODUCTION

Background: This uninhabited island was claimed by the US in 1857 for its guano. Mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the US Coast Guard to the Department of the Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge and annual scientific expeditions have continued.

NEPAL

INTRODUCTION

Background: In 1951, the Nepali monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system of government. Reforms in 1990 established a multiparty democracy within the framework of a constitutional monarchy. An insurgency led by Maoists broke out in 1996. The ensuing 10-year civil war between Maoist and government forces witnessed the dissolution of the cabinet and parliament and assumption of absolute power by the king in 2002. Several weeks of mass protests in April 2006 were followed by several months of peace negotiations between the Maoists and government officials, and culminated in a late 2006 peace accord and the promulgation of an interim constitution. Following a nationwide election in April 2008, the newly formed Constituent Assembly (CA) declared Nepal a federal democratic republic and abolished the monarchy at its first meeting the following month. The CA elected the country's first president in July. Between 2008 and 2011 there were four different coalition governments, led twice by the United Communist Party of Nepal-Maoist, which received a plurality of votes in the 2008 CA election, and twice by the Communist Party of Nepal-United Marxist-Leninist (UML). After the CA failed to draft a constitution by the May 2012 deadline set by the Supreme Court, then Prime Minister Baburam

BHATTARAI dissolved the CA. Months of negotiations ensued until March 2013 when the major political parties agreed to create an interim government headed by then Chief Justice Khil Raj REGMI with a mandate to hold elections for a new CA. Elections were held in November 2013, in which the Nepali Congress won the largest share of the seats in the CA and in February 2014 formed a coalition government with the second place UML and with Nepali Congress President Sushil KOIRALA as prime minister

Flag description: red with a blue border around the unique shape of two overlapping right triangles; the smaller, upper triangle bears a white stylized moon and the larger, lower triangle displays a white 12-pointed sun; the color red represents the rhododendron (Nepal's national flower) and is a sign of victory and bravery, the blue border signifies peace and harmony; the two right triangles are a combination of two single pennons (pennants) that originally symbolized the Himalaya Mountains while their charges represented the families of the king (upper) and the prime minister, but today they are understood to denote Hinduism and Buddhism, the country's two main religions; the moon represents the serenity of the Nepalese people and the shade and cool weather in the Himalayas, while the sun depicts the heat and higher temperatures of the lower parts of Nepal; the moon and the sun are also said to express the hope that the nation will endure as long as these heavenly bodies

note: Nepal is the only country in the world whose flag is not rectangular or square

National symbol(s): rhododendron blossom

National anthem: *name:* "Sayaun Thunga Phool Ka" (Hundreds of Flowers)

lyrics/music: Pradeep Kumar RAI/Ambar GURUNG

note: adopted 2007; after the abolition of the monarchy in 2006, a new anthem was required because of the previous anthem's praise for the king

ECONOMY

Economy—overview: Nepal is among the poorest and least developed countries in the world, with about one-quarter of its population living below the poverty line. Nepal is heavily dependent on remittances, which amount to as much as 22-25% of GDP. Agriculture is the mainstay of the economy, providing a livelihood for more than 70% of the population and accounting for a little over one-third of GDP. Industrial activity mainly involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain. Nepal has considerable scope for exploiting its potential in hydropower, with an estimated 42,000 MW of commercially feasible capacity, but political uncertainty and a difficult business climate have hampered foreign investment. Additional challenges to Nepal's growth include its landlocked geographic location, persistent power shortages, underdeveloped transportation infrastructure, civil strife and labor unrest, and its susceptibility to natural disaster. The lack of political consensus in the past several years has delayed national budgets and prevented much-

needed economic reform, although the government passed a full budget in 2013.

TRANSNATIONAL ISSUES

Disputes—international: joint border commission continues to work on contested sections of boundary with India, including the 400 square kilometer dispute over the source of the Kalapani River; India has instituted a stricter border regime to restrict transit of Maoist insurgents and illegal cross-border activities Refugees and internally displaced persons:

refugees (country of origin): 15,000-20,000 (Tibet/China) (2012); 29,813 (Bhutan) (2014)

IDPs: 50,000 (remaining from ten-year Maoist insurgency that officially ended in 2006; figure does not include people displaced since 2007 by inter-communal violence and insecurity in the Terai region) (2012)

stateless persons: 800,000 (2011); note—in 2007-2008 the government distributed 2.6 million citizenship certificates to the 3.4 million people without one; the remaining 800,000 without citizenship certificates are not necessarily stateless, and the UNHCR is working with the Nepali Government to clarify their situation; lesser numbers of Bhutanese Hindu refugees of Nepali origin (the Lhotsampa) who were stripped of Bhutanese nationality and forced to flee their country in the late 1980s and early 1990s

—and undocumented Tibetan refugees who arrived in Nepal prior to the 1990s—are considered stateless

Illicit drugs: illicit producer of cannabis and hashish for the domestic and international drug markets; transit point for opiates from Southeast Asia to the West

NETHERLANDS

INTRODUCTION

Background: The Dutch United Provinces declared their independence from Spain in 1579; during the 17th century, they became a leading seafaring and commercial power, with settlements and colonies around the world. After a 20-year French occupation, a Kingdom of the Netherlands was formed in 1815. In 1830 Belgium seceded and formed a separate kingdom. The Netherlands remained neutral in World War I, but suffered invasion and occupation by Germany in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EEC (now the EU) and participated in the introduction of the euro in 1999. In October 2010, the former Netherlands Antilles was dissolved and the three smallest

islands—Bonaire, Sint Eustatius, and Saba—became special municipalities in the Netherlands administrative structure. The larger islands of Sint Maarten and Curacao joined the Netherlands and Aruba as constituent countries forming the Kingdom of the Netherlands.

Flag description: three equal horizontal bands of red (top), white, and blue; similar to the flag of Luxembourg, which uses a lighter blue and is longer; the colors were those of WILLIAM I, Prince of Orange, who led the Dutch Revolt against Spanish sovereignty in the latter half of the 16th century; originally the upper band was orange, but because it tended to fade to red over time, the red shade was eventually made the permanent color; the banner is perhaps the oldest tricolor in continuous use

National symbol(s): lion

National anthem: *name:* "Het Wilhelmus" (The William)

lyrics/music: Philips VAN MARNIX van Sint Aldegonde (presumed)/ unknown

note: adopted 1932, in use since the 17th century, making it the oldest national anthem in the world; also known as "Wilhelmus van Nassouwe" (William of Nassau), it is in the form of an acrostic, where the first letter of

each stanza spells the name of the leader of the Dutch Revolt

ECONOMY

Economy—overview: The Dutch economy is the sixth-largest economy in the euro-zone and is noted for its stable industrial relations, moderate unemployment and inflation, a sizable trade surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs only 2% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. After 26 years of uninterrupted economic growth, the Dutch economy—highly dependent on an international financial sector and international trade—contracted by 3.5% in 2009 as a result of the global financial crisis. The Dutch financial sector suffered, due in part to the high exposure of some Dutch banks to U.S. mortgage-backed securities. In 2008, the government nationalized two banks and injected billions of dollars of capital into other financial institutions, to prevent further deterioration of a crucial sector. The government also sought to boost the domestic economy by accelerating infrastructure programs, offering corporate tax breaks for employers to retain workers, and expanding export credit facilities. The stimulus programs and bank bailouts, however, resulted in a government budget deficit of 5.3% of GDP in 2010 that contrasted sharply with a surplus of 0.7% in 2008. The government of Prime Minister Mark RUTTE began implementing fiscal consolidation measures in early 2011, mainly reductions in expenditures, which resulted in an improved budget deficit in 2011. In 2012-13 tax revenues dropped, GDP contracted, and the budget deficit deteriorated. Although jobless claims continued to grow, the unemployment rate remained relatively low at 6.8 percent.

NEW CALEDONIA

INTRODUCTION

Background: Settled by both Britain and France during the first half of the 19th century, the island became a French possession in 1853. It served as a penal colony for four decades after 1864. Agitation for independence during the 1980s and early 1990s ended in the 1998 Noumea Accord, which over a period of 15 to 20 years will transfer an increasing amount of governing responsibility from France to New Caledonia. The agreement also commits France to conduct a referendum between 2014 and 2018 to decide whether New Caledonia should assume full sovereignty and independence.

ECONOMY

Economy—overview: New Caledonia has about 25% of the world's known nickel reserves. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France—equal to more than 15% of GDP—and tourism are keys to the health of the economy; during 2009-10, France sent more development assistance to New Caledonia than to any of its other overseas territories. Substantial new investment in the nickel

industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

NEW ZEALAND

INTRODUCTION

Background: The Polynesian Maori reached New Zealand in about A.D. 800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. That same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both world wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances.

Government—note:

ECONOMY

Economy—overview: Over the past 20 years the government has transformed New Zealand from an agrarian economy dependent on concessionary British market access to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes—but left behind some at the bottom of the ladder—and broadened and deepened the technological capabilities of the industrial sector. Per capita income rose for ten consecutive years until 2007 in purchasing power parity terms, but fell in 2008-09. Debt-driven consumer spending drove robust growth in the first half of the decade, helping fuel a large balance of payments deficit that posed a challenge for economic managers. Inflationary pressures caused the central bank to raise its key rate steadily from January 2004 until it was among the highest in the OECD in 2007-08; international capital inflows attracted to the high rates further strengthened the currency and housing market, however, aggravating the current account deficit. The economy fell into recession before the start of the global financial crisis and contracted for five consecutive quarters in 2008-09. In line with global peers, the central bank cut interest rates aggressively and the government developed fiscal stimulus measures. The economy pulled out of recession late in 2009, and achieved 2-3% per year growth in 2010-13. Nevertheless, key trade sectors remain vulnerable to weak external demand. The government plans to raise productivity growth and develop infrastructure, while reining in government spending.

NICARAGUA

INTRODUCTION

Background: The Pacific coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to leftist rebels in El Salvador caused the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. After losing free and fair elections in 1990, 1996, and 2001, former Sandinista President Daniel ORTEGA

Saavedra was elected president in 2006 and reelected in 2011. The 2008 municipal elections, 2010 regional elections, November 2011 presidential elections, and 2012 municipal elections were marred by widespread irregularities. Nicaragua's infrastructure and economy—hard hit by the earlier civil war and by Hurricane Mitch in 1998—are slowly being rebuilt, but democratic institutions have been weakened under the ORTEGA administration.

PEOPLE AND SOCIETY

Nationality: *noun:* Nicaraguan(s)

adjective: Nicaraguan

Ethnic groups: mestizo (mixed Amerindian and white) 69%, white 17%, black 9%, Amerindian 5%

Languages: Spanish (official) 95.3%, Miskito 2.2%, Mestizo of the Caribbean coast 2%, other 0.5%

Religions: Roman Catholic 58.5%, Protestant 23.2% (Evangelical 21.6%, Moravian 1.6%), Jehovah's Witnesses 0.9%, other 1.6%, none 15.7% (2005 est.)

Demographic profile: Despite being one of the poorest countries in Latin

America, Nicaragua has improved its access to potable water and sanitation and has ameliorated its life expectancy, infant and child mortality, and immunization rates. However, income distribution is very uneven, and the poor, agriculturalists, and indigenous people continue to have less access to healthcare services. Nicaragua's total fertility rate has fallen from around 6 children per woman in 1980 to just above replacement level today, but the high birth rate among adolescents perpetuates a cycle of poverty and low educational attainment. Nicaraguans emigrate primarily to Costa Rica and to a lesser extent the United States. Nicaraguan men have been migrating seasonally to Costa Rica to harvest bananas and coffee since the early 20th century. Political turmoil, civil war, and natural disasters from the 1970s through the 1990s dramatically increased the flow of refugees and permanent migrants seeking jobs, higher wages, and better social and healthcare benefits. Since 2000, Nicaraguan emigration to Costa Rica has slowed and stabilized. Today roughly 300,000 Nicaraguans are permanent residents of Costa Rica—about 75% of the foreign population—and thousands more migrate seasonally for work, many illegally.

Flag description: three equal horizontal bands of blue (top), white, and blue with the national coat of arms centered in the white band; the coat of

arms features a triangle encircled by the words REPUBLICA DE NICARAGUA on the top and AMERICA CENTRAL on the bottom; the banner is based on the former blue-white-blue flag of the Federal Republic of Central America; the blue bands symbolize the Pacific Ocean and the Caribbean Sea, while the white band represents the land between the two bodies of water

note: similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Honduras, which has five blue stars arranged in an X pattern centered in the white band

National symbol(s): turquoise-browed motmot (bird)

National anthem: *name:* “Salve a ti, Nicaragua” (Hail to Thee, Nicaragua)

lyrics/music: Salomon Ibarra MAYORGA/traditional, arranged by Luis Abraham DELGADILLO

note: although only officially adopted in 1971, the music was approved in 1918 and the lyrics in 1939; the tune, originally from Spain, was used as an anthem for Nicaragua from the 1830’s until 1876

ECONOMY

Economy—overview: Nicaragua, the poorest country in Central America and the second poorest in the Western Hemisphere, has widespread underemployment and poverty. The Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR) has been in effect since April 2006 and has expanded export opportunities for many agricultural and manufactured goods. Textiles and agriculture combined account for nearly 50% of Nicaragua’s exports. The ORTEGA administration’s promotion of mixed business initiatives, owned by the Nicaraguan and Venezuelan state oil firms, together with the weak rule of law, could undermine the investment climate for domestic and international private firms in the near-term. Nicaragua relied on an IMF external credit facility to meet internal- and external-debt financing obligations. The most recent IMF program ended in 2011 and Nicaragua is currently in negotiations for a new program. Nicaragua depends heavily on foreign development assistance, however, donors have curtailed this funding in response to November 2008 and subsequent electoral fraud. Nicaragua still struggles with a relatively high public debt burden.

NIGER

INTRODUCTION

Background: Niger became independent from France in 1960 and experienced single-party and military rule until 1991, when Gen. Ali SAIBOU was forced by public pressure to allow multiparty elections, which resulted in a democratic government in 1993. Political infighting brought the government to a standstill and in 1996 led to a coup by Col. Ibrahim BARE. In 1999, BARE was killed in a counter coup by military officers who restored democratic rule and held elections that brought Mamadou TANDJA to power in December of that year. TANDJA was reelected in 2004 and in 2009 spearheaded a constitutional amendment that would allow him to extend his term as president. In February 2010, a military coup deposed TANDJA, immediately suspended the constitution, and dissolved the

Cabinet. ISSOUFOU Mahamadou emerged victorious from a crowded field in the election following the coup and was inaugurated in April 2011. Niger is one of the poorest countries in the world with minimal government services and insufficient funds to develop its resource base. The largely agrarian and subsistence-based economy is frequently disrupted by extended droughts common to the Sahel region of Africa. The Nigerien Movement for Justice, a predominantly ethnic Tuareg rebel group, emerged in February 2007, and attacked several military targets in Niger's northern region throughout 2007 and 2008. Successful government offensives in 2009 ended the rebellion. Niger is facing increased security concerns on its borders from various external threats including insecurity in Libya, spillover from the conflict in Mali, and violent extremism in northeastern Nigeria.

ECONOMY

Economy—overview: Niger is a landlocked, Sub-Saharan nation, whose economy centers on subsistence crops, livestock, and some of the world’s largest uranium deposits. Agriculture contributes about one-third of GDP and provides livelihood for about nine-tenths of the population. Drought, desertification, and strong population growth have undercut the economy.

Niger shares a common currency, the CFA franc, and a common central bank, the Central Bank of West African States (BCEAO), with seven other members of the West African Monetary Union. Debt relief has significantly reduced Niger's annual debt service obligations, freeing funds for expenditures on basic health care, primary education, HIV/AIDS prevention, rural infrastructure, and other programs geared at poverty reduction. Nearly half of the government's budget is derived from foreign donor resources. The economy in recent years has been hurt by terrorist activity and kidnappings near its uranium mines and instability in Mali. Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources. Niger has sizable reserves of oil and oil production, which began in 2012, along with refining, and exports are expected to grow through 2016. However, oil revenues have fallen well short of predictions, mainly because of logistical challenges. Food insecurity and drought remain perennial problems for Niger. The mining sector may be affected by the government's attempt to renegotiate extraction rights contracts.

NIGERIA

INTRODUCTION

Background: British influence and control over what would become Nigeria and Africa's most populous country grew through the 19th century. A series of constitutions after World War II granted Nigeria greater autonomy; independence came in 1960. Following nearly 16 years of military rule, a new constitution was adopted in 1999, and a peaceful transition to civilian government was completed. The government continues to face the daunting task of reforming a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, Nigeria continues to experience longstanding ethnic and religious tensions. Although both the 2003 and 2007 presidential elections were marred by significant

irregularities and violence, Nigeria is currently experiencing its longest period of civilian rule since independence. The general elections of April 2007 marked the first civilian-to-civilian transfer of power in the country's history and the elections of 2011 were generally regarded as credible. In January 2014, Nigeria assumed a nonpermanent seat on the UN Security Council for the 2014-15 term.

ECONOMY

Economy—overview: Following an April 2014 statistical “rebasings” exercise, Nigeria has emerged as Africa’s largest economy, with 2013 GDP estimated at US\$ 502 billion. Oil has been a dominant source of government revenues since the 1970s. Regulatory constraints and security risks have limited new investment in oil and natural gas, and Nigeria’s oil production contracted in 2012 and 2013. Nevertheless, the Nigerian economy has continued to grow at a rapid 6-8% per annum (pre-rebasing), driven by growth in agriculture, telecommunications, and services, and the medium-term outlook for Nigeria is good, assuming oil output stabilizes and oil prices remain strong. Fiscal authorities pursued countercyclical policies in 2011-2013, significantly reducing the budget deficit. Monetary policy has also been responsive and effective. Following the 2008-9 global financial crises, the banking sector was effectively recapitalized and regulation enhanced. Despite its strong fundamentals, oil-rich Nigeria has been hobbled by inadequate power supply, lack of infrastructure, delays in the passage of legislative reforms, an inefficient property registration system, restrictive trade policies, an inconsistent regulatory environment, a slow and ineffective judicial system, unreliable dispute resolution mechanisms, insecurity, and pervasive corruption. Economic diversification and strong growth have not translated into a significant decline in poverty levels—over 62% of Nigeria’s 170 million people live in extreme poverty. President JONATHAN has established an economic team that includes experienced and reputable members and has announced plans to increase transparency, continue to diversify production, and further improve fiscal management. The government is working to develop stronger public-private partnerships for roads, agriculture, and power.

TRANSNATIONAL ISSUES

Disputes—international: Joint Border Commission with Cameroon reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately cedes sovereignty of the Bakassi Peninsula to Cameroon with a phase-out of Nigerian control within two years while resolving patriation issues; the ICJ ruled on an equidistance settlement of Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea, but imprecisely defined coordinates in the ICJ decision and a sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River all contribute to the delay in implementation; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty which also includes the Chad-Niger and Niger-Nigeria boundaries; location of Benin-Niger-Nigeria tripoint is unresolved

Illicit drugs: a transit point for heroin and cocaine intended for European, East Asian, and North American markets; consumer of amphetamines; safe haven for Nigerian narcotraffickers operating worldwide; major money-laundering center; massive corruption and criminal activity; Nigeria has improved some anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in June 2006; Nigeria's anti-money-laundering regime

continues to be monitored by FATF

NIUE

INTRODUCTION

Background: Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the adjacent Cook Islands, has caused it to be separately administered by New Zealand. The population of the island continues to drop (from a peak of 5,200 in 1966 to an estimated 1,229 in 2013) with substantial emigration to New Zealand 2,400 km to the southwest.

ECONOMY

Economy—overview: The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of emigration to New Zealand. Efforts to increase GDP include the promotion of tourism and financial services, although the International Banking Repeal Act of 2002 resulted in the termination of all offshore banking licenses. Economic aid from New Zealand in FY08/09 was US\$5.7 million. While in the process of rebuilding, Niue has been dependent on foreign aid.

NORFOLK ISLAND

INTRODUCTION

Background: Two British attempts at establishing the island as a penal colony (1788-1814 and 1825-55) were ultimately abandoned. In 1856, the island was resettled by Pitcairn Islanders, descendants of the Bounty mutineers and their Tahitian companions.

NORTHERN MARIANA ISLANDS

INTRODUCTION

Background: Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975, and came into force on 24 March 1976. A new government and constitution went into effect in 1978.

NORWAY

INTRODUCTION

Background: Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGGVASON in 994. Conversion of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that lasted more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution. Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king. Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Although Norway remained neutral in World War I, it suffered heavy losses to its shipping. Norway proclaimed its neutrality at the outset of World War II, but was nonetheless occupied for five years by Nazi Germany (1940-45). In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. In referenda held in 1972 and 1994, Norway rejected joining the EU. Key domestic issues include immigration and integration of ethnic minorities, maintaining the country's extensive social safety net with an aging population, and preserving economic competitiveness.

ECONOMY

Economy—overview: The Norwegian economy is a prosperous mixed

economy, with a vibrant private sector, a large state sector, and an extensive social safety net. The government controls key areas, such as the vital petroleum sector, through extensive regulation and large-scale state-majority-owned enterprises. The country is richly endowed with natural resources—petroleum, hydropower, fish, forests, and minerals—and is highly dependent on the petroleum sector, which accounts for the largest portion of export revenue and about 30% of government revenue. Norway is the world's third-largest natural gas exporter; and seventh largest oil exporter, making one of its largest offshore oil finds in 2011. Norway opted to stay out of the EU during a referendum in November 1994; nonetheless, as a member of the European Economic Area, it contributes sizably to the EU budget. In anticipation of eventual declines in oil and gas production, Norway saves state revenue from the petroleum sector in the world's largest sovereign wealth fund, valued at over \$830 billion in January 2014 and uses the fund's return to help finance public expenses. After solid GDP growth in 2004-07, the economy slowed in 2008, and contracted in 2009, before returning to positive growth in 2010-13. Nevertheless, the government budget remains in surplus.

OMAN

INTRODUCTION

Background: The inhabitants of the area of Oman have long prospered on Indian Ocean trade. In the late 18th century, a newly established sultanate in Muscat signed the first in a series of friendship treaties with Britain. Over time, Oman's dependence on British political and military advisors increased, but it never became a British colony. In 1970, QABOOS bin Said

Al-Said overthrew his father, and he has since ruled as sultan. His extensive modernization program has opened the country to the outside world while preserving the longstanding close ties with the UK. Oman's moderate, independent foreign policy has sought to maintain good relations with all Middle Eastern countries. Inspired by the popular uprisings that swept the Middle East and North Africa beginning in January 2011, some Omanis began staging marches, demonstrations, and sit-ins calling mostly for more jobs and economic benefits and an end to corruption. In response to those protester demands, QABOOS in 2011 pledged to implement economic and political reforms, such as granting legislative and regulatory powers to the Majlis al-Shura and introducing unemployment benefits. Additionally, in August 2012, the Sultan announced a royal directive mandating the speedy implementation of a national job creation plan for thousands of public and private sector jobs. As part of the government's efforts to decentralize authority and allow greater citizen participation in local governance, Oman successfully conducted its first municipal council elections in December 2012. Announced by the Sultan in 2011, the municipal councils will have the power to advise the Royal Court on the needs of local districts across Oman's 11 governorates.

lyrics/music: Rashid bin Uzayyiz al KHUSAIDI/James Frederick MILLS, arranged by Bernard EBBINGHAUS

note: adopted 1932; new words were written after QABOOS bin Said al Said gained power in 1970; the anthem was first performed by the band of a British ship as a salute to the Sultan during a 1932 visit to Muscat; the bandmaster of the HMS Hawkins was asked to write a salutation to the Sultan on the occasion of his visiting the ship

ECONOMY

Economy—overview: Oman is a middle-income economy that is heavily dependent on dwindling oil resources. Because of declining reserves and a rapidly growing labor force, Muscat has actively pursued a development plan that focuses on diversification, industrialization, and privatization, with the objective of reducing the oil sector's contribution to GDP to 9% by 2020 and creating more jobs to employ the rising numbers of Omanis entering the workforce. Tourism and gas-based industries are key components of the government's diversification strategy. However, increases in social welfare benefits, particularly since the Arab Spring, will challenge the government's ability to effectively balance its budget if oil revenues decline. By using enhanced oil recovery techniques, Oman succeeded in increasing oil production, giving the country more time to diversify, and the increase in global oil prices through 2011 provided the government greater financial resources to invest in non-oil sectors. In 2012, continued surpluses resulting from sustained high oil prices and increased enhanced oil recovery allowed the government to maintain growth in social subsidies and public sector job creation. However, the Sultan made widely reported statements indicating this would not be sustainable, and called for expanded efforts to support SME development and entrepreneurship. Government agencies and large oligarchic group companies heeded his call, announcing new initiatives to spin off non-essential functions to entrepreneurs, incubate new businesses, train and mentor up and coming business people, and provide financing for start-ups. In response to fast growth in household indebtedness, the Central Bank reduced the ceiling on personal interest loans from 8 to 7%, lowered mortgage rates, capped the percentage of consumer loans at 50% of borrower's salaries for personal loans and 60% for housing loans, and limited maximum repayment terms to 10 and 25 years respectively.

P

PACIFIC OCEAN

INTRODUCTION

Background: The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the

Pacific Ocean south of 60 degrees south.

GEOGRAPHY

Location: body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates: 0 00 N, 160 00 W

Map references: Political Map of the World

Area: *total:* 155.557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area—comparative: about 15 times the size of the US; covers about 28% of the global surface; almost equal to the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal—a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes: *lowest point:* Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources: oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the “Pacific Ring of Fire”; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment—current issues: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea Geography—note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

ECONOMY

Economy—overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world’s fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to fluctuations in new drillings.

TRANSPORTATION

Ports and terminals: *major seaport(s):* Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines),

Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation—note: the Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state); the International Maritime Bureau reports the territorial waters of littoral states and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift

PAKISTAN

INTRODUCTION

Background: The Indus Valley civilization, one of the oldest in the world and dating back at least 5,000 years, spread over much of what is presently Pakistan. During the second millennium B.C., remnants of this culture fused with the migrating Indo-Aryan peoples. The area underwent successive invasions in subsequent centuries from the Persians, Greeks, Scythians, Arabs (who brought Islam), Afghans, and Turks. The Mughal Empire flourished in the 16th and 17th centuries; the British came to dominate the region in the 18th century. The separation in 1947 of British India into the Muslim state of Pakistan (with West and East sections) and largely Hindu India was never satisfactorily resolved, and India and Pakistan fought two wars—in 1947-48 and 1965—over the disputed Kashmir territory. A third war between these countries in 1971—in which India capitalized on Islamabad's marginalization of Bengalis in Pakistani politics—resulted in East Pakistan becoming the separate nation of Bangladesh. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998. India-Pakistan relations have been rocky since the November 2008 Mumbai attacks, but both countries are taking small steps to put relations back on track. In February 2008, Pakistan held parliamentary elections and in September 2008, after the resignation of former President MUSHARRAF, elected Asif Ali ZARDARI to the presidency. Pakistani government and military leaders are struggling to control domestic insurgents, many of whom are located in the tribal areas adjacent to the border with Afghanistan.

ECONOMY

Economy—overview: Decades of internal political disputes and low levels of foreign investment have led to slow growth and underdevelopment in Pakistan. Agriculture accounts for more than one-fifth of output and two-fifths of employment. Textiles account for most of Pakistan’s export earnings, and Pakistan’s failure to expand a viable export base for other manufactures has left the country vulnerable to shifts in world demand. Official unemployment was 6.6% in 2013, but this fails to capture the true picture, because much of the economy is informal and underemployment

remains high. Over the past few years, low growth and high inflation, led by a spurt in food prices, have increased the amount of poverty. As a result of political and economic instability, the Pakistani rupee has depreciated more than 40% since 2007. The government agreed to an International Monetary Fund Standby Arrangement in November 2008 in response to a balance of payments crisis. Although the economy has stabilized since the crisis, it has failed to recover. Foreign investment has not returned, due to investor concerns related to governance, energy, security, and a slow-down in the global economy. Remittances from overseas workers, averaging about \$1 billion a month since March 2011, remain a bright spot for Pakistan. However, after a small current account surplus in fiscal year 2011 (July 2010/June 2011), Pakistan's current account turned to deficit in the following two years, spurred by higher prices for imported oil and lower prices for exported cotton. Pakistan remains stuck in a low-income, low-growth trap, with growth averaging about 3.5% per year from 2008 to 2013. Pakistan must address long standing issues related to government revenues and energy production in order to spur the amount of economic growth that will be necessary to employ its growing and rapidly urbanizing population, more than half of which is under 22. Other long term challenges include expanding investment in education and healthcare, adapting to the effects of climate change and natural disasters, and reducing dependence on foreign donors.

Telephone system: *general assessment:* the telecommunications infrastructure is improving dramatically with foreign and domestic investments in fixed-line and mobile-cellular networks; system consists of

microwave radio relay, coaxial cable, fiber-optic cable, cellular, and satellite networks;

domestic: mobile-cellular subscribership has skyrocketed, exceeding 110 million by the end of 2011, up from only about 300,000 in 2000; more than 90 percent of Pakistanis live within areas that have cell phone coverage and more than half of all Pakistanis have access to a cell phone; fiber systems are being constructed throughout the country to aid in network growth; fixed line availability has risen only marginally over the same period and there are still difficulties getting fixed-line service to rural areas

international: country code—92; landing point for the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable systems that provide links to Asia, the Middle East, and Europe; satellite earth stations—3 Intelsat (1 Atlantic Ocean and 2 Indian Ocean); 3 operational international gateway exchanges (1 at Karachi and 2 at Islamabad); microwave radio relay to neighboring countries (2011)

Broadcast media: media is government regulated; 1 dominant state-owned TV broadcaster, Pakistan Television Corporation (PTV), operates a network consisting of 5 channels; private TV broadcasters are permitted; to date 69 foreign satellite channels are operational; the state-owned radio network operates more than 40 stations; nearly 100 commercially licensed privately owned radio stations provide programming mostly limited to music and talk shows (2007)

TRANSNATIONAL ISSUES

Disputes—international: various talks and confidence-building measures cautiously have begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); UN Military Observer Group in India and Pakistan has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; India and Pakistan have maintained their 2004 cease-fire in Kashmir and initiated discussions on defusing the armed standoff in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show the Junagadh claim in India's Gujarat State; by 2005, Pakistan, with UN assistance, repatriated 2.3 million Afghan refugees leaving slightly more than a million, many of whom remain at their own choosing; Pakistan has sent troops across and built fences along some remote tribal areas of its treaty-defined Durand Line border with Afghanistan, which serve as bases for foreign terrorists and other illegal activities; Afghan, Coalition, and Pakistan military meet periodically to clarify the alignment of the boundary on the ground and on maps

Refugees and internally displaced persons:

refugees (country of origin): 2.6 million (1.6 million registered, 1 million undocumented) (Afghanistan) (2014)

IDPs: more than 1 million (primarily includes IDPs who remain displaced by counter-terrorism and counter-insurgency operations and violent conflict between armed non-state groups in the Federally Administered Tribal Areas (FATA) and Khyber-Paktunkwa Province; individuals also have been displaced by repeated monsoon floods) (2014)

Illicit drugs: significant transit area for Afghan drugs, including heroin, opium, morphine, and hashish, bound for Iran, Western markets, the Gulf States, Africa, and Asia; financial crimes related to drug trafficking, terrorism, corruption, and smuggling remain problems; opium poppy cultivation estimated to be 2,300 hectares in 2007 with 600 of those hectares eradicated; federal and provincial authorities continue to conduct anti-poppy campaigns that utilizes forced eradication, fines, and arrests

PALAU

INTRODUCTION

Background: After three decades as part of the UN Trust Territory of the Pacific under US administration, this westernmost cluster of the Caroline Islands opted for independence in 1978 rather than join the Federated States of Micronesia. A Compact of Free Association with the US was approved in 1986 but not ratified until 1993. It entered into force the following year when the islands gained independence.

ECONOMY

Economy—overview: The economy consists of tourism and other services

such as trade, subsistence agriculture, and fishing. Government is a major employer of the work force relying on financial assistance from the US under the Compact of Free Association (Compact) with the US. The Compact took effect, after the end of the UN trusteeship on 1 October 1994. The US provided Palau with roughly \$700 million in aid for the first 15 years following commencement of the Compact in 1994 in return for unrestricted access to its land and waterways for strategic purposes. Business and leisure tourist arrivals numbered over 109,000 in 2011, for a 27% increase over 2010. The population enjoys a per capita income roughly double that of the Philippines and much of Micronesia. Long-run prospects for tourism have been bolstered by the expansion of air travel in the Pacific, the rising prosperity of industrial East Asia, and the willingness of foreigners to finance infrastructure development. Proximity to Guam, the region's major destination for tourists from East Asia, and a regionally competitive tourist infrastructure enhance Palau's advantage as a destination.

PANAMA

INTRODUCTION

Background: Explored and settled by the Spanish in the 16th century, Panama broke with Spain in 1821 and joined a union of Colombia, Ecuador, and Venezuela - named the Republic of Gran Colombia. When the latter dissolved in 1830, Panama remained part of Colombia. With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. In 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of the century. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the subsequent decades. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were transferred to Panama by the end of 1999. In October 2006, Panamanians approved an ambitious plan (estimated to cost \$5.3 billion) to expand the Canal. The project, which began in 2007 and could double the Canal's capacity, is expected to be completed in 2015.

Demographic profile: Panama is a country of demographic and economic contrasts. It is in the midst of a demographic transition, characterized by steadily declining rates of fertility, mortality, and population growth, but disparities persist based on wealth, geography, and ethnicity. Panama has one of the fastest growing economies in Latin America and dedicates substantial funding to social programs, yet poverty and inequality remain prevalent. The indigenous population accounts for a growing share of Panama's poor and extreme poor, while the non-indigenous rural poor have been more successful at rising out of poverty through rural-to-urban labor migration. The government's large expenditures on untargeted, indirect subsidies for water, electricity, and fuel have been ineffective, but its conditional cash transfer program has shown some promise in helping to

decrease extreme poverty among the indigenous population. Panama has expanded access to education and clean water, but the availability of sanitation and, to a lesser extent, electricity remains poor. The increase in secondary schooling—led by female enrollment—is spreading to rural and indigenous areas, which probably will help to alleviate poverty if educational quality and the availability of skilled jobs improve. Inadequate access to sanitation contributes to a high incidence of diarrhea in Panama's children, which is one of the main causes of Panama's elevated chronic malnutrition rate, especially among indigenous communities.

ECONOMY

Economy—overview: Panama’s dollar-based economy rests primarily on a well-developed services sector that accounts for more than three-quarters of GDP. Services include operating the Panama Canal, logistics, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. Economic growth will be bolstered by the Panama Canal expansion project that began in 2007 and is estimated to be completed by 2015 at a cost of \$5.3 billion—about 10-15% of current GDP. The expansion project will more than double the Canal’s capacity, enabling it to accommodate ships that are too large to traverse the existing canal. The United States and China are the top users of the Canal. Panama is also constructing a metro system in Panama City, valued at \$1.2 billion and scheduled to be completed by 2014. Panama’s booming transportation and logistics services sectors, along with aggressive infrastructure development projects, have lead the economy to continued high growth in 2012. Foreign investment, at around 10% of GDP in both 2011 and 2012, has continued to be a source of growth. Strong economic performance has not translated into broadly shared prosperity, as Panama has the second worst income distribution in Latin America. About one-fourth of the population lives in poverty; however, from 2006 to 2012 poverty was reduced by 10 percentage points, while unemployment dropped from 12% to 4.5% of the labor force in 2013. The US-Panama Trade Promotion Agreement was approved by Congress and signed into law in October 2011, and entered into force in October 2012. Panama also achieved removal from the Organization of Economic Development’s gray-list of tax havens by signing various double taxation treaties with other nations.

MILITARY

Military branches: no regular military forces; Panamanian Public Security Forces (subordinate to the Ministry of Public Security), comprising the National Police (PNP), National Air-Naval Service (SENAN), National Border Service (SENAFRONT) (2013)

Manpower available for military service:

males age 16-49: 890,006 (2010 est.)

Manpower fit for military service:

males age 16-49: 731,254

females age 16-49: 728,329 (2010 est.)

Manpower reaching militarily significant age annually: *male:* 32,142

female: 30,879 (2010 est.)

Military—note: on 10 February 1990, the government of then President ENDARA abolished Panama's military and reformed the security apparatus by creating the Panamanian Public Forces; in October 1994, Panama's Legislative Assembly approved a constitutional amendment prohibiting the creation of a standing military force but allowing the temporary establishment of special police units to counter acts of "external aggression"

TRANSNATIONAL ISSUES

Disputes—international: organized illegal narcotics operations in Colombia operate within the remote border region with Panama

Refugees and internally displaced persons: refugees (country of origin): 15,723 (Colombia) (2012)

Illicit drugs: major cocaine transshipment point and primary money-laundering center for narcotics revenue; money-laundering activity is especially heavy in the Colon Free Zone; offshore financial center; negligible signs of coca cultivation; monitoring of financial transactions is improving; official corruption remains a major problem

PAPUA NEW GUINEA

INTRODUCTION

Background: The eastern half of the island of New Guinea—second largest in the world—was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives.

GEOGRAPHY

Location: Oceania, group of islands including the eastern half of the island

of New Guinea between the Coral Sea and the South Pacific Ocean, east of Indonesia

Geographic coordinates: 6 00 S, 147 00 E

Map references: Oceania

Area: *total:* 462,840 sq km

country comparison to the world: 55

land: 452,860 sq km

Area—comparative: slightly larger than California

Land boundaries: *total:* 820 km

border countries: Indonesia 820 km

Coastline: 5,152 km

Maritime claims: measured from claimed archipelagic baselines

territorial sea: 12 nm

continental shelf: 200 m depth or to the depth of exploitation

exclusive fishing zone: 200 nm

Climate: tropical; northwest monsoon (December to March), southeast monsoon (May to October); slight seasonal temperature variation

Terrain: mostly mountains with coastal lowlands and rolling foothills

Elevation extremes: *lowest point:* Pacific Ocean 0 m

highest point: Mount Wilhelm 4,509 m

Natural resources: gold, copper, silver, natural gas, timber, oil, fisheries

Land use: *arable land:* 0.65%

ECONOMY

Economy—overview: Papua New Guinea (PNG) is richly endowed with natural resources, but exploitation has been hampered by rugged terrain, land tenure issues, and the high cost of developing infrastructure. The economy has a small formal sector, focused mainly on the export of those natural resources, and an informal sector, employing the majority of the population. Agriculture provides a subsistence livelihood for 85% of the people. Mineral deposits, including copper, gold, and oil, account for nearly two-thirds of export earnings. Natural gas reserves amount to an estimated

155 billion cubic meters. A consortium led by a major American oil company is constructing a liquefied natural gas (LNG) production facility that could begin exporting in 2014. As the largest investment project in the country's history, it has the potential to double GDP in the near-term and triple Papua New Guinea's export revenue. An American-owned firm also opened PNG's first oil refinery in 2004 and is building a second LNG production facility. The government faces the challenge of ensuring transparency and accountability for revenues flowing from this and other large LNG projects. In 2011 and 2012, the National Parliament passed legislation that created an offshore Sovereign Wealth Fund (SWF) to manage government surpluses from mineral, oil, and natural gas projects. In recent years, the government has opened up markets in telecommunications and air transport, making both more affordable to the people. Numerous challenges still face the government of Peter O'NEILL, including providing physical security for foreign investors, regaining investor confidence, restoring integrity to state institutions, promoting economic efficiency by privatizing moribund state institutions, and maintaining good relations with Australia, its former colonial ruler. Other socio-cultural challenges could upend the economy including chronic law and order and land tenure issues. The global financial crisis had little impact because of continued foreign demand for PNG's commodities.

PARACEL ISLANDS

INTRODUCTION

Background: The Paracel Islands are surrounded by productive fishing grounds and by potential oil and gas reserves. In 1932, French Indochina annexed the islands and set up a weather station on Pattle Island; maintenance was continued by its successor, Vietnam. China has occupied all the Paracel Islands since 1974, when its troops seized a South Vietnamese garrison occupying the western islands. China built a military installation on Woody Island with an airfield and artificial harbor. The islands also are claimed by Taiwan and Vietnam.

PARAGUAY

INTRODUCTION

Background: Paraguay achieved its independence from Spain in 1811. In the disastrous War of the Triple Alliance (1865-70)—between Paraguay and Argentina, Brazil, and Uruguay—Paraguay lost two-thirds of its adult males and much of its territory. The country stagnated economically for the next half century. Following the Chaco War of 1932-35 with Bolivia, Paraguay gained a large part of the Chaco lowland region. The 35-year military dictatorship of Alfredo STROESSNER ended in 1989, and, despite a marked increase in political infighting in recent years, Paraguay has held relatively free and regular presidential elections since the country's return to democracy.

GEOGRAPHY

Location: Central South America, northeast of Argentina, southwest of Brazil

PEOPLE AND SOCIETY

Nationality: *noun:* Paraguayan(s)

adjective: Paraguayan

Ethnic groups: mestizo (mixed Spanish and Amerindian) 95%, other 5%

Languages: Spanish (official), Guarani (official)

Religions: Roman Catholic 89.6%, Protestant 6.2%, other Christian 1.1%, other or unspecified 1.9%, none 1.1% (2002 census)

Demographic profile: Paraguay falls below the Latin American average in several socioeconomic categories, including immunization rates, potable water, sanitation, and secondary school enrollment, and has greater rates of income inequality and child and maternal mortality. Paraguay's poverty rate has declined in recent years but remains high, especially in rural areas, with more than a third of the population below the poverty line. However, the well-being of the poor in many regions has improved in terms of housing quality and access to clean water, telephone service, and electricity. The fertility rate continues to drop, declining sharply from an average 4.3 births per woman in the late 1990s to about 2 in 2013, as a result of the greater educational attainment of women, increased use of contraception, and a desire for smaller families among young women. Paraguay is a country of emigration; it has not attracted large numbers of immigrants because of political instability, civil wars, years of dictatorship, and the greater appeal of neighboring countries. Paraguay first tried to encourage immigration in 1870 in order to rebound from the heavy death toll it suffered during the war. Paraguay then tried to encourage immigration in 1870 in order to rebound from the heavy

death toll it suffered during the War of the Triple Alliance, but it received few European and Middle Eastern immigrants. In the 20th century, limited numbers of immigrants arrived from Lebanon, Japan, South Korea, and China, as well as Mennonites from Canada, Russia, and Mexico. Large flows of Brazilian immigrants have been arriving since the 1960s, mainly to work in agriculture. Paraguayans continue to emigrate to Argentina, Brazil, Uruguay, the United States, Italy, Spain, and France.

lyrics/music: Francisco Esteban ACUNA de Figueroa/disputed

note: adopted 1934, in use since 1846; the anthem was officially adopted following its re-arrangement in 1934

ECONOMY

Economy—overview: Landlocked Paraguay has a market economy distinguished by a large informal sector, featuring re-export of imported consumer goods to neighboring countries, as well as the activities of thousands of microenterprises and urban street vendors. A large percentage of the population, especially in rural areas, derives its living from agricultural activity, often on a subsistence basis. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. On a per capita basis, real income has stagnated at 1980 levels. The economy grew rapidly between 2003 and 2008 as growing world demand for commodities combined with high prices and favorable weather to support Paraguay’s commodity-based export expansion. Paraguay is the sixth largest soy producer in the world. Drought hit in 2008, reducing agricultural exports and slowing the economy even before the onset of the global recession. The economy fell 3.8% in 2009, as lower world demand and commodity prices caused exports to contract. The government reacted by introducing fiscal and monetary stimulus packages. Growth resumed at a 13% level in 2010, the highest in South America, but slowed in 2011-12 as the stimulus subsided and severe drought and outbreaks of foot-and-mouth disease led to a drop in beef and other agricultural exports. The economy took another leap in 2013, largely due to strong export growth. Political uncertainty, corruption, limited progress on structural reform, and deficient infrastructure are the main obstacles to long-term growth.

TRANSNATIONAL ISSUES

Disputes—international: unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations

Illicit drugs: major illicit producer of cannabis, most or all of which is consumed in Brazil, Argentina, and Chile; transshipment country for Andean cocaine headed for Brazil, other Southern Cone markets, and Europe; weak border controls, extensive corruption and money-laundering activity, especially in the Tri-Border Area; weak anti-money-laundering laws and enforcement

PERU

INTRODUCTION

Background: Ancient Peru was the seat of several prominent Andean civilizations, most notably that of the Incas whose empire was captured by Spanish conquistadors in 1533. Peruvian independence was declared in 1821, and remaining Spanish forces were defeated in 1824. After a dozen years of military rule, Peru returned to democratic leadership in 1980, but experienced economic problems and the growth of a violent insurgency. President Alberto FUJIMORI's election in 1990 ushered in a decade that saw a dramatic turnaround in the economy and significant progress in curtailing guerrilla activity. Nevertheless, the president's increasing reliance on authoritarian measures and an economic slump in the late 1990s generated mounting dissatisfaction with his regime, which led to his resignation in 2000. A caretaker government oversaw new elections in the spring of 2001, which installed Alejandro TOLEDO Manrique as the new head of government—Peru's first democratically elected president of indigenous ethnicity. The presidential election of 2006 saw the return of Alan GARCIA Perez who, after a disappointing presidential term from 1985 to 1990, oversaw a robust economic rebound. In June 2011, former army officer Ollanta HUMALA Tasso was elected president, defeating Keiko FUJIMORI Higuchi, the daughter of Alberto FUJIMORI. Since his election, HUMALA has carried on the sound, market-oriented economic policies of the three preceding administrations.

Ethnic groups: Amerindian 45%, mestizo (mixed Amerindian and white) 37%, white 15%, black, Japanese, Chinese, and other 3%

Languages: Spanish (official) 84.1%, Quechua (official) 13%, Aymara (official) 1.7%, Ashaninka 0.3%, other native languages (includes a large number of minor Amazonian languages) 0.7%, other 0.2% (2007 Census)

Religions: Roman Catholic 81.3%, Evangelical 12.5%, other 3.3%, unspecified or none 2.9% (2007 Census)

Demographic profile: Peru's urban and coastal communities have benefited much more from recent economic growth than rural, Afro-Peruvian, indigenous, and poor populations of the Amazon and mountain regions. The poverty rate has dropped substantially during the last decade but remains stubbornly high at about 30% (more than 55% in rural areas). After remaining almost static for about a decade, Peru's malnutrition rate began falling in 2005, when the government introduced a coordinated strategy focusing on hygiene, sanitation, and clean water. School enrollment has improved, but achievement scores reflect ongoing problems with educational quality. Many poor children temporarily or permanently drop out of school to help support their families. About a quarter to a third of Peruvian children aged 6 to 14 work, often putting in long hours at hazardous mining or construction sites. Peru was a country of immigration in the 19th and early 20th centuries, but has become a country of emigration in the last few decades. Beginning in the 19th century, Peru brought in Asian contract laborers mainly to work on coastal plantations. Populations of Chinese and Japanese descent—among the largest in Latin America—are economically and culturally influential in Peru today. Peruvian emigration began rising in the 1980s due to an economic crisis and a violent internal conflict, but outflows have stabilized in the last few years as economic conditions have improved. Nonetheless, more than 2 million Peruvians have emigrated in the last decade, principally to the US, Spain, and Argentina.

ECONOMY

Economy—overview: Peru’s economy reflects its varied geography—an arid lowland coastal region, the central high sierra of the Andes, the dense forest of the Amazon, with tropical lands bordering Colombia and Brazil. A wide range of important mineral resources are found in the mountainous and coastal areas, and Peru’s coastal waters provide excellent fishing grounds. The Peruvian economy has been growing by an average of 6.4% per year since 2002 with a stable/slightly appreciating exchange rate and low inflation, which in 2013 is expected to be below the upper limit of the Central Bank target range of 1 to 3%. Growth has been in the 6-9% range for the last three years, due partly to a leap in private investment, especially in the extractive sector, which accounts for more than 60% of Peru’s total exports. Despite Peru’s strong macroeconomic performance, dependence on minerals and metals exports and imported foodstuffs subjects the economy to fluctuations in world prices. Poor infrastructure hinders the spread of growth to Peru’s non-coastal areas. Peru’s rapid expansion coupled with cash transfers and other programs have helped to reduce the national poverty rate by 23 percentage points since 2002, but inequality persists and continues to pose a challenge for the new Ollanta HUMALA administration, which has championed a policy of social inclusion and a more equitable distribution of income. Peru’s free trade policy has continued under the HUMALA administration; since 2006, Peru has signed trade deals with the US, Canada, Singapore, China, Korea, Mexico, Japan, the European Free Trade Association, Chile, and four other countries; concluded negotiations with Venezuela, Costa Rica, and Guatemala; and begun trade talks with two other Central American countries and the Trans-Pacific Partnership. Peru also has signed a trade pact with Chile, Colombia, and Mexico called the Pacific Alliance that rivals Mercosur in combined population, GDP, and trade. The US-Peru Trade Promotion

Agreement entered into force 1 February 2009, opening the way to greater trade and investment between the two economies. Although Peru has continued to attract foreign investment, political activism and protests are hampering development of some projects related to natural resource extraction.

TRANSNATIONAL ISSUES

Disputes—international: Chile and Ecuador rejected Peru's November 2005 unilateral legislation to shift the axis of their joint treaty-defined maritime boundaries along the parallels of latitude to equidistance lines which favor Peru; organized illegal narcotics operations in Colombia have penetrated Peru's shared border; Peru rejects Bolivia's claim to restore maritime access through a sovereign corridor through Chile along the Peruvian

border

Refugees and internally displaced persons:

IDPs: 150,000 (civil war from 1980-2000; most IDPs are indigenous peasants in Andean and Amazonian regions; as of 2011, no new information on the situation of these IDPs) (2011)

Illicit drugs: until 1996 the world's largest coca leaf producer, Peru is now the world's second largest producer of coca leaf, though it lags far behind Colombia; cultivation of coca in Peru was estimated at 40,000 hectares in 2009, a slight decrease over 2008; second largest producer of cocaine, estimated at 225 metric tons of potential pure cocaine in 2009; finished cocaine is shipped out from Pacific ports to the international drug market; increasing amounts of base and finished cocaine, however, are being moved to Brazil, Chile, Argentina, and Bolivia for use in the Southern Cone or transshipment to Europe and Africa; increasing domestic drug consumption

PHILIPPINES

INTRODUCTION

Background: The Philippine Islands became a Spanish colony during the 16th century; they were ceded to the US in 1898 following the Spanish-American War. In 1935 the Philippines became a self-governing commonwealth. Manuel QUEZON was elected president and was tasked with preparing the country for independence after a 10-year transition. In 1942 the islands fell under Japanese occupation during World War II, and US forces and Filipinos fought together during 1944-45 to regain control. On 4 July 1946 the Republic of the Philippines attained its independence. A 20-year rule by Ferdinand MARCOS ended in 1986, when a “people power” movement in Manila (“EDSA 1”) forced him into exile and installed Corazon AQUINO as president. Her presidency was hampered by several coup attempts that prevented a return to full political stability and economic development. Fidel RAMOS was elected president in 1992. His administration was marked by increased stability and by progress on economic reforms. In 1992, the US closed its last military bases on the islands. Joseph ESTRADA was elected president in 1998. He was succeeded by his vice-president, Gloria MACAPAGAL-ARROYO, in January 2001 after ESTRADA’s stormy impeachment trial on corruption charges broke down and another “people power” movement (“EDSA 2”) demanded his resignation. MACAPAGAL-ARROYO was elected to a six-year term as president in May 2004. Her presidency was marred by several corruption allegations but the Philippine economy was one of the few to avoid contraction following the 2008 global financial crisis, expanding each year of her administration. Benigno AQUINO III was elected to a six-year term as president in May 2010. The Philippine Government faces threats from several groups, some of which are on the US Government’s Foreign Terrorist Organization list. Manila has waged a decades-long struggle against ethnic Moro insurgencies in the southern Philippines, which has led to a peace accord with the Moro National Liberation Front and ongoing peace talks with the Moro Islamic Liberation Front. The decades-long Maoist-inspired New People’s Army insurgency also operates through much of the country. The Philippines faces increased tension with China over disputed territorial and maritime claims in the South China Sea.

Flag description: two equal horizontal bands of blue (top) and red; a white equilateral triangle is based on the hoist side; the center of the triangle displays a yellow sun with eight primary rays; each corner of the triangle contains a small, yellow, five-pointed star; blue stands for peace and justice, red symbolizes courage, the white equal-sided triangle represents equality; the rays recall the first eight provinces that sought independence from Spain, while the stars represent the three major geographical divisions of the country: Luzon, Visayas, and Mindanao; the design of the flag dates to 1897
note: in wartime the flag is flown upside down with the red band at the top

National symbol(s): Philippine eagle

National anthem: *name:* “Lupang Hinirang” (Chosen Land)

lyrics/music: Jose PALMA (revised by Felipe PADILLA de Leon)/Julian FELIPE

note: music adopted 1898, original Spanish lyrics adopted 1899, Filipino (Tagalog) lyrics adopted 1956; although the original lyrics were written in Spanish, later English and Filipino versions were created; today, only the Filipino version is used

ECONOMY

Economy—overview: The economy has weathered global economic and financial downturns better than its regional peers due to minimal exposure to troubled international securities, lower dependence on exports, relatively resilient domestic consumption, large remittances from four- to five-million overseas Filipino workers, and a rapidly expanding business process outsourcing industry. The current account balance had recorded consecutive surpluses since 2003; international reserves are at record highs; the banking system is stable; and the stock market was Asia’s second best-performer in 2012. Efforts to improve tax administration and expenditure management have helped ease the Philippines’ tight fiscal situation and reduce high debt levels. The Philippines has received several credit rating upgrades on its sovereign debt, and has had little difficulty tapping domestic

and international markets to finance its deficits. Economic growth in the Philippines averaged 4.5% during the MACAPAGAL-ARROYO administration, but poverty worsened during her term. Growth has accelerated under the AQUINO government, but with limited progress thus far in bringing down unemployment, which hovers around 7%, and improving the quality of jobs. Underemployment is nearly 20% and more than 40% of the employed are estimated to be working in the informal sector. The AQUINO administration has been working to boost the budgets for education, health, cash transfers to the poor, and other social spending programs, and is relying on the private sector to help fund major infrastructure projects under its Public-Private Partnership program. Long term challenges include reforming governance and the judicial system, building infrastructure, improving regulatory predictability, and the ease of doing business, attracting higher levels of local and foreign investments. The Philippine Constitution and the other laws continue to restrict foreign ownership in important activities/sectors (such as land ownership and public utilities).

TRANSNATIONAL ISSUES

Disputes—international: Philippines claims sovereignty over Scarborough Reef (also claimed by China together with Taiwan) and over certain of the Spratly Islands, known locally as the Kalayaan (Freedom) Islands, also claimed by China, Malaysia, Taiwan, and Vietnam; the 2002 “Declaration on the Conduct of Parties in the South China Sea,” has eased tensions in the Spratly Islands but falls short of a legally binding “code of conduct” desired by several of the disputants; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Philippines retains a dormant claim to Malaysia’s Sabah State in northern Borneo based on the Sultanate of Sulu’s granting the Philippines Government power of attorney to pursue a sovereignty claim on his behalf; maritime delimitation negotiations continue with Palau

Refugees and internally displaced persons:

IDPs: about 4.5 million (government troops fighting the Moro Islamic Liberation Front, the Abu Sayyaf Group, and the New People’s Army; clan feuds; natural disasters including typhoon Bopha (December 2012), the Bohol earthquake (October 2013), and typhoon Haiyan (November 2013)) (2013)

stateless persons: at least 115,772 (2014)

Illicit drugs: domestic methamphetamine production has been a growing problem in recent years despite government crackdowns; major consumer of amphetamines; longstanding marijuana producer mainly in rural areas where Manila’s control is limited

PITCAIRN ISLANDS

INTRODUCTION

Background: Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to less than 50 today.

GEOGRAPHY

Location: Oceania, islands in the South Pacific Ocean, about midway between Peru and New Zealand

Geographic coordinates: 25 04 S, 130 06 W

ECONOMY

Economy—overview: The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships.

POLAND

INTRODUCTION

Background: Poland's history as a state begins near the middle of the 10th century. By the mid-16th century, the Polish-Lithuanian Commonwealth ruled a vast tract of land in central and eastern Europe. During the 18th century, internal disorders weakened the nation, and in a series of agreements between 1772 and 1795, Russia, Prussia, and Austria partitioned Poland among themselves. Poland regained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force with over ten million members. Free elections in

1989 and 1990 won Solidarity control of the parliament and the presidency, bringing the communist era to a close. A “shock therapy” program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe. Poland joined NATO in 1999 and the European Union in 2004. With its transformation to a democratic, market-oriented country largely completed and with large investments in defense, energy, and other infrastructure, Poland is an increasingly active member of Euro-Atlantic organizations.

Environment—current issues: situation has improved since 1989 due to decline in heavy industry and increased environmental concern by post-Communist governments; air pollution nonetheless remains serious because of sulfur dioxide emissions from coal-fired power plants, and the resulting acid rain has caused forest damage; water pollution from industrial and municipal sources is also a problem, as is disposal of hazardous wastes; pollution levels should continue to decrease as industrial establishments bring their facilities up to EU code, but at substantial cost to business and the government

Environment—international agreements:

ECONOMY

Economy—overview: Poland has pursued a policy of economic liberalization since 1990 and Poland’s economy was the only one in the EU to avoid a recession through the 2008-09 economic downturn. Although EU membership and access to EU structural funds have provided a major boost to the economy since 2004, GDP per capita remains significantly below the EU average while unemployment continues to exceed the EU average. The government of Prime Minister Donald TUSK steered the Polish economy through the economic downturn by skillfully managing public finances and adopting controversial pension and tax reforms to further shore up public finances. While the Polish economy has performed well over the past five years, growth slowed in 2012 and 2013, in part due to the ongoing economic difficulties in the euro zone. Short-term, the key policy challenge will be to consolidate debt and spending without stifling economic growth. Over the longer term, Poland’s economic performance could improve if the country addresses some of the remaining deficiencies in its road and rail infrastructure, business environment, rigid labor code, commercial court system, government red tape, and burdensome tax system.

synthetic drugs for the international market; minor transshipment point for Southwest Asian heroin and Latin American cocaine to Western Europe

PORTUGAL

INTRODUCTION

Background: Following its heyday as a global maritime power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence of Brazil, its wealthiest colony, in 1822. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal is a founding member of NATO and entered the EC (now the EU) in 1986.

Economy—overview: Portugal has become a diversified and increasingly service-based economy since joining the European Community—the EU's predecessor—in 1986. Over the following two decades, successive governments privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the Economic and Monetary Union (EMU) in 1998 and began circulating the euro on 1 January 2002 along with 11 other EU members. The economy grew by more than the EU average for much of the 1990s, but the rate of growth slowed in 2001-08. The economy contracted in 2009, and fell again from 2011 to 2013, as the government implemented spending cuts and tax increases to comply with conditions of an EU-IMF financial rescue package, signed in May 2011. Austerity measures also have contributed to record unemployment and a wave of emigration not seen since the 1960s. Booming exports will contribute to growth and employment in 2014, but the need to continue to reduce private- and public-sector debt could weigh on consumption and investment. The government of Pedro PASSOS COELHO has stated its intention to reduce labor market rigidity, and, this, along with steps to trim the budget deficit, could make Portugal more attractive to foreign investors. The government reduced the budget deficit from 10.1% of GDP in 2009 to 5.1% in 2013, lower than the EU-IMF fiscal target of 5.5%. Despite these efforts, public debt has continued to grow and, in 2013, stands among the highest in the EU. As a result, the government may have difficulty regaining full bond market financing when the EU-IMF financing program expires in May 2014.

PUERTO RICO

INTRODUCTION

Background: Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following Christopher COLUMBUS' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917. Popularly-elected governors have served since 1948. In 1952, a constitution was enacted providing for internal self government. In plebiscites held in 1967, 1993, and 1998, voters chose not to alter the existing political status with the US, but the results of a 2012 vote left open the possibility of American statehood.

National anthem: *name*: “La Borinquena” (The Puerto Rican)

lyrics/music: Manuel Fernandez JUNCOS/Felix Astol ARTES

note: music adopted 1952, lyrics adopted 1977; the local anthem's name is a reference to the indigenous name of the island, Borinquen; the music was originally composed as a dance in 1867 and gained popularity in the early 20th century; there is some evidence that the music was written by Francisco RAMIREZ; as a commonwealth of the United States, "The Star-Spangled Banner" is official (see United States)

ECONOMY

Economy—overview: Puerto Rico has one of the most dynamic economies in the Caribbean region, however, growth has been negative for the past four years, and unemployment rose to nearly 16% in 2011. The industrial sector has surpassed agriculture as the primary locus of economic activity and income. Mainland US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income with estimated arrivals of more than 3.6 million tourists in 2008. Closing the budget deficit while restoring economic growth and employment remain the central concerns of the government.

Q

QATAR

INTRODUCTION

Background: Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for

pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the Amir, who had ruled the country since 1972. His son, the current Amir HAMAD bin Khalifa Al Thani, overthrew the father in a bloodless coup in 1995. In short order, HAMAD oversaw the creation of the pan-Arab satellite news network Al-Jazeera and Qatar's pursuit of a leadership role in mediating regional conflicts. In the 2000s, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. As of 2007, oil and natural gas revenues had enabled Qatar to attain the highest per capita income in the world. Qatar has not experienced domestic unrest or violence like that seen in other Near Eastern and North African countries in 2010-11, due in part to its immense wealth. Since the outbreak of regional unrest, however, Doha has prided itself on its support for many of these popular revolutions, particularly in Libya and Syria. In mid-2013, HAMAD transferred power to his 33 year-old son, TAMIM bin Hamad—a peaceful abdication rare in the history of Arab Gulf states. TAMIM has prioritized improving the domestic welfare of Qataris, including establishing advanced healthcare and education systems and expanding the country's infrastructure in anticipation of Doha's hosting of the 2022 World Cup.

Flag description: maroon with a broad white serrated band (nine white points) on the hoist side; maroon represents the blood shed in Qatari wars, white stands for peace; the nine-pointed serrated edge signifies Qatar as the ninth member of the “reconciled emirates” in the wake of the Qatari-British treaty of 1916

note: the other eight emirates are the seven that compose the UAE and Bahrain; according to some sources, the dominant color was formerly red, but this darkened to maroon upon exposure to the sun and the new shade was eventually adopted

National anthem: *name:* “Al-Salam Al-Amiri” (The Peace for the Anthem)
lyrics/music: Sheikh MUBARAK bin Saif al-Thani/Abdul Aziz Nasser OBAIDAN

note: adopted 1996; the anthem was first performed that year at a meeting of the Gulf Cooperative Council hosted by Qatar

ECONOMY

Economy—overview: Qatar has prospered in the last several years with continued high real GDP growth. Throughout the financial crisis Qatari authorities sought to protect the local banking sector, with direct investments into domestic banks. GDP is driven largely by changes in oil prices and by investment in the energy sector. Economic policy is focused on developing Qatar’s nonassociated natural gas reserves and increasing private and foreign investment in non-energy sectors, but oil and gas still account for more than 50% of GDP, roughly 85% of export earnings, and 50% of government revenues. Oil and gas have made Qatar the world’s highest per-capita income country and the country with the lowest unemployment. Proved oil reserves in excess of 25 billion barrels should enable continued output at current levels for about 57 years. Qatar’s proved reserves of natural gas exceed 25 trillion cubic meters, about 13% of the world total and third largest in the world. Qatar’s successful 2022 World Cup bid is accelerating large-scale infrastructure projects such as Qatar’s metro system, light rail system, the construction of a new port, roads, stadiums and related sporting infrastructure. The new Hamad International Airport is expected to open in mid-2014 with an annual passenger capacity of 24 million on initial opening and 50 million when complete.

ROMANIA

INTRODUCTION

Background: The principalities of Wallachia and Moldavia—for centuries under the suzerainty of the Turkish Ottoman Empire—secured their autonomy in 1856; they were de facto linked in 1859 and formally united in 1862 under the new name of Romania. The country gained recognition of its independence in 1878. It joined the Allied Powers in World War I and

acquired new territories—most notably Transylvania—following the conflict. In 1940, Romania allied with the Axis powers and participated in the 1941 German invasion of the USSR. Three years later, overrun by the Soviets, Romania signed an armistice. The post-war Soviet occupation led to the formation of a communist “people’s republic” in 1947 and the abdication of the king. The decades-long rule of dictator Nicolae CEAUSESCU, who took power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown and executed in late 1989. Former communists dominated the government until 1996 when they were swept from power. Romania joined NATO in 2004 and the EU in 2007.

ECONOMY

Economy—overview: Romania, which joined the EU on 1 January 2007, began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country’s needs. The country emerged in 2000 from a punishing three-year recession due to strong demand in EU export markets. Domestic consumption and investment fueled strong GDP growth, but led to large current account imbalances. Romania’s macroeconomic gains have only recently started to spur creation of a middle class and to address Romania’s widespread poverty. Corruption and red tape continue to permeate the business environment. As a result of the global financial crisis, Romania signed on to a \$26 billion emergency assistance package from the IMF, the EU, and other international lenders. GDP contracted from 2009 to 2011. In March 2011, Romania and the IMF/EU/World Bank signed a 24-month precautionary stand-by agreement, worth \$6.6 billion, to promote fiscal discipline, encourage progress on structural reforms, and strengthen financial sector stability. In September 2013, the Romanian authorities and the IMF/EU agreed to a follow-on stand-by agreement, worth \$5.4 billion, to continue with reforms, although Bucharest announced that it does not intend to draw funds under the agreement. Economic growth accelerated in 2013, driven by strong industrial exports and an excellent agricultural harvest; in December 2013 inflation dropped to a historical low annual rate of 1.6%; and the current account deficit was reduced substantially. Yet, progress on structural reforms is uneven and the economy still is vulnerable to shocks.

TRANSNATIONAL ISSUES

Disputes—international: the ICJ ruled largely in favor of Romania in its dispute submitted in 2004 over Ukrainian-administered Zmiyinyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Refugees and internally displaced persons:

stateless persons: 248 (2012)

Illicit drugs: major transshipment point for Southwest Asian heroin transiting the Balkan route and small amounts of Latin American cocaine bound for Western Europe; although not a significant financial center, role as a narcotics conduit leaves it vulnerable to laundering, which occurs via the banking system, currency exchange houses, and casinos

RUSSIA

INTRODUCTION

Background: Founded in the 12th century, the Principality of Muscovy, was able to emerge from over 200 years of Mongol domination (13th-15th centuries) and to gradually conquer and absorb surrounding principalities. In the early 17th century, a new Romanov Dynasty continued this policy of expansion across Siberia to the Pacific. Under PETER I (ruled 1682-1725), hegemony was extended to the Baltic Sea and the country was renamed the Russian Empire. During the 19th century, more territorial acquisitions were made in Europe and Asia. Defeat in the Russo-Japanese War of 1904-05 contributed to the Revolution of 1905, which resulted in the formation of a parliament and other reforms. Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the imperial household. The communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Iosif STALIN (1928-53) strengthened communist rule and Russian dominance of the Soviet Union at a cost of tens of millions of lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize communism, but his initiatives inadvertently released

forces that by December 1991 splintered the USSR into Russia and 14 other independent republics. Since then, Russia has shifted its post-Soviet democratic ambitions in favor of a centralized semi-authoritarian state in which the leadership seeks to legitimize its rule through managed national elections, populist appeals by President PUTIN, and continued economic growth. Russia has severely disabled a Chechen rebel movement, although violence still occurs throughout the North Caucasus.

GEOGRAPHY

Location: North Asia bordering the Arctic Ocean, extending from Europe (the portion west of the Urals) to the North Pacific Ocean

Geographic coordinates: 60 00 N, 100 00 E

Map references: Asia

Area: *total:* 17,098,242 sq km

country comparison to the world: 1

land: 16,377,742 sq km

water: 720,500 sq km

Area—comparative: approximately 1.8 times the size of the US

border countries: Azerbaijan 284 km, Belarus 959 km, China (southeast) 3,605 km, China (south) 40 km, Estonia 290 km, Finland 1,313 km, Georgia 723 km, Kazakhstan 6,846 km, North Korea 17.5 km, Latvia 292 km, Lithuania (Kaliningrad Oblast) 227 km, Mongolia 3,441 km, Norway 196 km, Poland (Kaliningrad Oblast) 432 km, Ukraine 1,576 km

Coastline: 37,653 km

Maritime claims: *territorial sea:* 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: ranges from steppes in the south through humid continental in much of European Russia; subarctic in Siberia to tundra climate in the polar north; winters vary from cool along Black Sea coast to frigid in Siberia; summers vary from warm in the steppes to cool along Arctic coast

Terrain: broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Elevation extremes: *lowest point:* Caspian Sea -28 m

highest point: Gora El'brus 5,633 m (highest point in Europe)

Natural resources: wide natural resource base including major deposits of oil, natural gas, coal, and many strategic minerals, reserves of rare earth elements, timber

note: formidable obstacles of climate, terrain, and distance hinder exploitation of natural resources

Land use: *arable land:* 7.11%

permanent crops: 0.1%

other: 92.79% (2011)

Irrigated land: 43,460 sq km (2008)

Total renewable water resources: 4,508 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): *total:* 66.2 cu km/yr (20%/60%/20%)

per capita: 454.9 cu m/yr (2001)

Natural hazards: permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula; spring floods and summer/autumn forest fires throughout Siberia and parts of European Russia

volcanism: significant volcanic activity on the Kamchatka Peninsula and Kuril Islands; the peninsula alone is home to some 29 historically active volcanoes, with dozens more in the Kuril Islands; Kliuchevskoi (elev. 4,835 m), which erupted in 2007 and 2010, is Kamchatka's most active volcano; Avachinsky and Koryaksky volcanoes, which pose a threat to the city of Petropavlovsk-Kamchatskiy, have been deemed Decade Volcanoes by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Bezymianny, Chikurachki, Ebeko, Gorely, Grozny, Karymsky, Ketoi, Kronotsky, Ksudach, Medvezhia, Mutnovsky, Sarychev Peak, Shiveluch, Tiatia, Tolbachik, and Zheltovsky

Environment—current issues: air pollution from heavy industry, emissions of coal-fired electric plants, and transportation in major cities; industrial, municipal, and agricultural pollution of inland waterways and seacoasts; deforestation; soil erosion; soil contamination from improper application of agricultural chemicals; scattered areas of sometimes intense radioactive contamination; groundwater contamination from toxic waste; urban solid

waste management; abandoned stocks of obsolete pesticides

Environment—international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulfur 85, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Wetlands, Whaling

signed, but not ratified: Air Pollution-Sulfur 94

Geography—note: largest country in the world in terms of area but unfavorably located in relation to major sea lanes of the world; despite its size, much of the country lacks proper soils and climates (either too cold or too dry) for agriculture; Mount El'brus is Europe's tallest peak; Lake Baikal, the deepest lake in the world, is estimated to hold one fifth of the world's fresh water

elections: president elected by popular vote for a six-year term (eligible for a second term); election last held 4 March 2012 (next to be held in March 2018); note—the term length was extended from four to six years in late 2008 and went into effect after the 2012 election; there is no vice president; if the president dies in office, cannot exercise his powers because of ill health, is impeached, or resigns, the premier serves as acting president until a new presidential election is held, which must be within three months; premier appointed by the president with the approval of the Duma

election results: Vladimir PUTIN elected president; percent of vote—Vladimir PUTIN 63.6%, Gennadiy ZYUGANOV 17.2%, Mikhail PROKHOROV 8%, Vladimir ZHIRINOVSKIY 6.2%, Sergey MIRONOV 3.9%, other 1.1%; Dmitriy MEDVEDEV approved as premier by Duma 299

Legislative branch: bicameral Federal Assembly or Federalnoye Sobraniye consists of an upper house, the Federation Council or Sovet Federatsii (166 seats; members appointed by the top executive and legislative officials in each of the 83 federal administrative units—oblasts, krais, republics, autonomous okrugs and oblasts, and the federal cities of Moscow and Saint Petersburg; members to serve four-year terms) and a lower house, the State Duma or Gosudarstvennaya Duma (450 seats; as of 2007, all members elected by proportional representation from party lists winning at least 7% of the vote; members elected by popular vote to serve four-year terms)

elections: State Duma—last held on 4 December 2011 (next to be held in December 2015)

election results: State Duma—United Russia 49.6%, CPRF 19.2%, Just Russia 13.2%, LDPR 11.7%, other 6.3%; total seats by party—United Russia 238, CPRF 92, Just Russia 64, LDPR 56

Judicial branch: *highest court(s):* Supreme Court of the Russian Federation (consists of 23 members); Constitutional Court (consists of 19 members); Superior Court of Arbitration (consists of a chairman and 4 deputy chairmen); note—as of January 2014 legislation was pending that would merge the Constitutional Court and Superior Court of Arbitration

judge selection and term of office: all members of Russia's three highest courts nominated by the president and appointed by the Federation Council (the upper house of the legislature); members of all three courts appointed for life

subordinate courts: Higher Arbitration Court; regional (krai) and provincial (oblast) courts; Moscow and St. Petersburg city courts; autonomous province and district courts; note—the 14 Russian Republics have court systems specified by their own constitutions

Political parties and leaders: seventy eight political parties are registered with Russia's Ministry of Justice (as of January 2014), but only four parties maintain representation in Russia's national legislature:

A Just Russia [Sergey MIRONOV]; Communist Party of the Russian Federation or CPRF [Gennadiy ZYUGANOV]; Liberal Democratic Party of Russia or LDPR [Vladimir ZHIRINOVSKIY]; United Russia [Dmitriy MEDVEDEV]

Political pressure groups and leaders: Confederation of Labor of Russia (KTR); Federation of Independent Trade Unions of Russia; Golos Association in Defense of Voters' Rights; Memorial; Movement Against

Illegal Migration; Russkiye; Solidarnost; The World Russian People's Congress; Union of the Committees of Soldiers' Mothers; Union of Russian Writers; other—business associations, environmental organizations, religious groups (especially those with Orthodox or Muslim affiliation), and veterans groups

Flag description: three equal horizontal bands of white (top), blue, and red

note: the colors may have been based on those of the Dutch flag; despite many popular interpretations, there is no official meaning assigned to the colors of the Russian flag; this flag inspired other Slav countries to adopt horizontal tricolors of the same colors but in different arrangements, and so red, blue, and white became the Pan-Slav colors

National symbol(s): bear; double-headed eagle

National anthem: *name:* “Gimn Rossiyskoy Federatsii” (National Anthem of the Russian Federation)

lyrics/music: Sergey Vladimirovich MIKHALKOV/Aleksandr Vasilyevich ALEKSANDROV

note: in 2000, Russia adopted the tune of the anthem of the former Soviet Union (composed in 1939); the lyrics, also adopted in 2000, were written by the same person who authored the Soviet lyrics in 1943

ECONOMY

Economy—overview: Russia has undergone significant changes since the collapse of the Soviet Union, moving from a globally-isolated, centrally-planned economy towards a more market-based and globally-integrated economy, but stalling as a partially reformed, statist economy with a high concentration of wealth in officials’ hands. Economic reforms in the 1990s privatized most industry, with notable exceptions in the energy and defense-related sectors. The protection of property rights is still weak and the private sector remains subject to heavy state interference. Russia is one of the world’s leading producers of oil and natural gas and is also a top exporter of metals such as steel and primary aluminum. Russia’s manufacturing sector is generally uncompetitive on world markets and is geared toward domestic consumption. Russia’s reliance on commodity exports makes it vulnerable to boom and bust cycles that follow the volatile swings in global prices. The economy, which had averaged 7% growth during 1998-2008 as oil prices rose rapidly, was one of the hardest hit by the 2008-09 global economic crisis as oil prices plummeted and the foreign credits that Russian banks and firms relied on dried up. Slowly declining oil prices over the past few years and difficulty attracting foreign direct investment have contributed to a noticeable slowdown in GDP growth rates. In late 2013, the Russian Economic Development Ministry reduced its growth forecast through 2030 to an average of only 2.5% per year, down from its previous forecast of 4.0 to 4.2%. In 2014, following Russia’s military intervention in Ukraine, prospects for economic growth declined further, with expectations that GDP growth could drop as low as zero.

Telephone system: *general assessment:* the telephone system is experiencing significant changes; there are more than 1,000 companies licensed to offer communication services; access to digital lines has improved, particularly in urban centers; Internet and e-mail services are improving; Russia has made progress toward building the telecommunications infrastructure necessary for a market economy; the estimated number of mobile subscribers jumped from fewer than 1 million in 1998 to more than 235 million in 2011; fixed line service has improved but a large demand remains

domestic: cross-country digital trunk lines run from Saint Petersburg to Khabarovsk, and from Moscow to Novorossiysk; the telephone systems in 60 regional capitals have modern digital infrastructures; cellular services, both analog and digital, are available in many areas; in rural areas, the telephone services are still outdated, inadequate, and low density

international: country code—7; Russia is connected internationally by undersea fiber optic cables; satellite earth stations provide access to Intelsat, Intersputnik, Eutelsat, Inmarsat, and Orbita systems (2011)

Broadcast media: 6 national TV stations with the federal government owning 1 and holding a controlling interest in a second; state-owned Gazprom maintains a controlling interest in a third national channel; government-affiliated Bank Rossiya owns controlling interest in a fourth and fifth, while the sixth national channel is owned by the Moscow city administration; roughly 3,300 national, regional, and local TV stations with over two-thirds completely or partially controlled by the federal or local governments; satellite TV services are available; 2 state-run national radio networks with a third majority-owned by Gazprom; roughly 2,400 public and commercial radio stations (2007)

TRANSNATIONAL ISSUES

Disputes—international: Russia remains concerned about the smuggling

of poppy derivatives from Afghanistan through Central Asian countries; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with the 2004 Agreement, ending their centuries-long border disputes; the sovereignty dispute over the islands of Etorofu, Kunashiri, Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kurils,” occupied by the Soviet Union in 1945, now administered by Russia, and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Russia’s military support and subsequent recognition of Abkhazia and South Ossetia independence in 2008 continue to sour relations with Georgia; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on a one-fifth slice of the sea; Norway and Russia signed a comprehensive maritime boundary agreement in 2010; various groups in Finland advocate restoration of Karelia (Kareliya) and other areas ceded to the Soviet Union following World War II but the Finnish Government asserts no territorial demands; Russia and Estonia signed a technical border agreement in May 2005, but Russia recalled its signature in June 2005 after the Estonian parliament added to its domestic ratification act a historical preamble referencing the Soviet occupation and Estonia’s pre-war borders under the 1920 Treaty of Tartu; Russia contends that the preamble allows Estonia to make territorial claims on Russia in the future, while Estonian officials deny that the preamble has any legal impact on the treaty text; Russia demands better treatment of the Russian-speaking population in Estonia and Latvia; Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as an EU member state with an EU external border, where strict Schengen border rules apply; preparations for the demarcation delimitation of land boundary with Ukraine have commenced; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and on-going expert-level discussions; Kazakhstan and Russia boundary delimitation was ratified on November 2005 and field demarcation should commence in 2007; Russian Duma has not yet ratified 1990 Bering Sea Maritime Boundary Agreement with the US; Denmark (Greenland) and Norway have made submissions to the Commission on the Limits of the Continental shelf (CLCS) and Russia is collecting additional

data to augment its 2001 CLCS submission

Refugees and internally displaced persons:

IDPs: 8,500-28,450 (displacement from Chechnya and North Ossetia-Alania) (2011)

stateless persons: 178,000 (2012); note—Russia's stateless population consists of Roma, Meskhetian Turks, and ex-Soviet citizens from the former republics; between 2003 and 2010 more than 600,000 stateless people were naturalized; most Meskhetian Turks, followers of Islam with origins in Georgia, fled or were evacuated from Uzbekistan after a 1989 pogrom and have lived in Russia for more than the required five-year residency period; they continue to be denied registration for citizenship and basic rights by local Krasnodar Krai authorities on the grounds that they are temporary illegal migrants

Trafficking in persons: *current situation:* Russia is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking, although labor trafficking is the predominant problem; people from Russia and other countries in Europe, Central Asia, and Asia, including Vietnam and North Korea, are subjected to conditions of forced labor in Russia's construction, manufacturing, agriculture, repair shop, and domestic services industries, as well as forced begging and narcotics cultivation; North Koreans contracted under bilateral government arrangements to work in the timber industry in the Russian Far East reportedly are subjected to forced labor; Russian women and children were reported to be victims of sex trafficking in Russia, Northeast Asia, Europe, Central Asia, and the Middle East, while women from European, African, and Central Asian countries were reportedly forced into prostitution in Russia

tier rating: Tier 3—Russia does not fully comply with the minimum standards for the elimination of trafficking and because it is not deemed to be making significant efforts to do so was downgraded to Tier 3 after the maximum of two consecutive annual waivers; the number of prosecutions remains low compared to estimates of Russia's trafficking problem; the government did not develop or deploy a formal system for the identification of trafficking victims or their referral to protective services, although some victims were reportedly cared for through ad hoc efforts; the government has reported minimal efforts to identify or care for the large number of migrant workers vulnerable to labor exploitation and has not investigated allegations of slave-like conditions in North Korean-operated timber camps (2013)

Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of methamphetamine, mostly for domestic consumption; government has active illicit crop eradication program; used as transshipment point for Asian opiates, cannabis, and Latin American cocaine bound for growing domestic markets, to a lesser extent Western and Central Europe, and occasionally to the US; major source of heroin precursor chemicals; corruption and organized crime are key concerns; major consumer of opiates

RWANDA

INTRODUCTION

Background: In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994 in a state-orchestrated genocide, in which Rwandans killed up to a million of their fellow citizens, including approximately three-quarters of the Tutsi population. The genocide ended later that same year when the predominantly Tutsi RPF, operating out of Uganda and northern Rwanda,

defeated the national army and Hutu militias, and established an RPF-led government of national unity. Approximately 2 million Hutu refugees—many fearing Tutsi retribution—fled to neighboring Burundi, Tanzania, Uganda, and former Zaire. Since then, most of the refugees have returned to Rwanda, but several thousand remained in the neighboring Democratic Republic of the Congo (DRC, the former Zaire) and formed an extremist insurgency bent on retaking Rwanda, much as the RPF did in 1990. Rwanda held its first local elections in 1999 and its first post-genocide presidential and legislative elections in 2003. Rwanda in 2009 staged a joint military operation with the Congolese Army in DRC to rout out the Hutu extremist insurgency there, and Kigali and Kinshasa restored diplomatic relations. Rwanda also joined the Commonwealth in late 2009. In January 2013, Rwanda assumed a nonpermanent seat on the UN Security Council for the 2013-14 term.

ECONOMY

Economy—overview: Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture and some

mineral and agro-processing. Tourism, minerals, coffee and tea are Rwanda's main sources of foreign exchange. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and temporarily stalled the country's ability to attract private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels. GDP has rebounded with an average annual growth of 7%-8% since 2003 and inflation has been reduced to single digits. Nonetheless, a significant percent of the population still live below the official poverty line. Despite Rwanda's fertile ecosystem, food production often does not keep pace with demand, requiring food imports. Rwanda continues to receive substantial aid money and obtained IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in 2005-06. In recognition of Rwanda's successful management of its macro economy, in 2010, the IMF graduated Rwanda to a Policy Support Instrument (PSI). Rwanda also received a Millennium Challenge Threshold Program in 2008. Africa's most densely populated country is trying to overcome the limitations of its small, landlocked economy by leveraging regional trade. Rwanda joined the East African Community and is aligning its budget, trade, and immigration policies with its regional partners. The government has embraced an expansionary fiscal policy to reduce poverty by improving education, infrastructure, and foreign and domestic investment and pursuing market-oriented reforms. Energy shortages, instability in neighboring states, and lack of adequate transportation linkages to other countries continue to handicap private sector growth. The Rwandan Government is seeking to become regional leader in information and communication technologies. In 2010, Rwanda neared completion of the first modern Special Economic Zone (SEZ) in Kigali. The SEZ seeks to attract investment in all sectors, but specifically in agribusiness, information and communications technologies, trade and logistics, mining, and construction. The global downturn hurt export demand and tourism, but economic growth has recovered, driven in large part by the services sector, but inflation has grown. On the back of this growth, government is gradually ending its fiscal stimulus policy while protecting aid to the poor.

TRANSNATIONAL ISSUES

Disputes—international: Burundi and Rwanda dispute two sq km (0.8 sq mi) of Sabanerwa, a farmed area in the Rukurazi Valley where the Akanyaru/Kanyaru River shifted its course southward after heavy rains in 1965; fighting among ethnic groups—loosely associated political rebels, armed gangs, and various government forces in Great Lakes region transcending the boundaries of Burundi, Democratic Republic of the Congo (DROC), Rwanda, and Uganda—abated substantially from a decade ago due largely to UN peacekeeping, international mediation, and efforts by local governments to create civil societies; nonetheless, 57,000 Rwandan refugees still reside in 21 African states, including Zambia, Gabon, and 20,000 who fled to Burundi in 2005 and 2006 to escape drought and recriminations from traditional courts investigating the 1994 massacres; the 2005 DROC and Rwanda border verification mechanism to stem rebel actions on both sides of the border remains in place

Refugees and internally displaced persons:

refugees (country of origin): 57,857 (Democratic Republic of the Congo) (2012)

IDPs: undetermined (fighting between government and insurgency in 1998-99; returning refugees) (2012)

Trafficking in persons: *current situation:* Rwanda is a source and, to a lesser extent, transit and destination country for women and children subjected to forced labor and sex trafficking; Rwandan girls and, to a lesser extent, boys are exploited in domestic servitude within the country; Rwandan girls are also forced into prostitution by older girls, women, and loosely organized prostitution networks; Rwandan women and children are subjected to forced agricultural and industrial labor, domestic servitude, and prostitution in Kenya, Uganda, Democratic Republic of the Congo, Tanzania, Burundi, Zambia, South Africa, France, the Netherlands, Malaysia, China, and the US; children in Rwanda-based refugee camps are brought to Kigali, Uganda, Kenya, Sudan, and South Sudan for use in the sex trade; a limited number of foreign nationals are moved through Rwanda to be exploited in third countries

tier rating: Tier 2 Watch List—Rwanda does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government maintains strong efforts to investigate and prosecute some trafficking crimes but fails to stop M23 (an armed group in the eastern Democratic Republic of the Congo) from recruiting within Rwanda, which is at times reportedly supported by government officials, amounting to complicity in human trafficking; although the revised penal code covers almost all forms of human trafficking, its narrow definition may result in the confusion of trafficking with other crimes; other obstacles include a lack of awareness of human trafficking among officials and an inadequate number of investigators (2013)

SAINT BARTHELEMY

INTRODUCTION

Background: Discovered in 1493 by Christopher COLUMBUS who named it for his brother Bartolomeo, Saint Barthélemy was first settled by the French in 1648. In 1784, the French sold the island to Sweden, who renamed the largest town Gustavia, after the Swedish King GUSTAV III, and made it a free port; the island prospered as a trade and supply center

during the colonial wars of the 18th century. France repurchased the island in 1877 and took control the following year. It was placed under the administration of Guadeloupe. Saint Barthelemy retained its free port status along with various Swedish appellations such as Swedish street and town names, and the three-crown symbol on the coat of arms. In 2003 the populace of the island voted to secede from Guadeloupe, and in 2007 the island became a French overseas collectivity.

GEOGRAPHY

Location: Caribbean, island between the Caribbean Sea and the North Atlantic Ocean; located in the Leeward Islands (northern) group; Saint Barthelemy lies east of the US Virgin Islands

Geographic coordinates: 17 90 N, 62 85 W

Area: 21 sq km

Area—comparative: less than an eighth of the size of Washington, DC

Land boundaries: 0 km

Climate: tropical, with practically no variation in temperature; has two seasons (dry and humid)

Terrain: hilly, almost completely surrounded by shallow-water reefs, with plentiful beaches

Elevation extremes: *lowest point:* Caribbean Ocean 0 m

highest point: Morne du Vitet 286 m

Natural resources: has few natural resources, its beaches being the most important

Environment—current issues: with no natural rivers or streams, fresh water is in short supply, especially in summer, and provided by desalinization of sea water, collection of rain water, or imported via water tanker

ECONOMY

Economy—overview: The economy of Saint Barthelemy is based upon high-end tourism and duty-free luxury commerce, serving visitors primarily from North America. The luxury hotels and villas host 70,000 visitors each year with another 130,000 arriving by boat. The relative isolation and high cost of living inhibits mass tourism. The construction and public sectors also enjoy significant investment in support of tourism. With limited fresh water resources, all food must be imported, as must all energy resources and most manufactured goods. Employment is strong and attracts labor from Brazil and Portugal.

SAINT HELENA, ASCENSION, AND TRISTAN DA CUNHA

INTRODUCTION

Background: Saint Helena is a British Overseas Territory consisting of Saint Helena and Ascension Islands, and the island group of Tristan da Cunha. Saint Helena: Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. During the Anglo-Boer War in South Africa, several thousand Boer prisoners were confined on the island between 1900 and 1903.

Ascension Island: This barren and uninhabited island was discovered and named by the Portuguese in 1503. The British garrisoned the island in 1815 to prevent a rescue of Napoleon from Saint Helena. It served as a provisioning station for the Royal Navy's West Africa Squadron on anti-slavery patrol. The island remained under Admiralty control until 1922, when it became a dependency of Saint Helena. During World War II, the UK permitted the US to construct an airfield on Ascension in support of transatlantic flights to Africa and anti-submarine operations in the South Atlantic. In the 1960s the island became an important space tracking station for the US. In 1982, Ascension was an essential staging area for British forces during the Falklands War. It remains a critical refueling point in the air-bridge from the UK to the South Atlantic. the air-bridge from the UK to the South Atlantic.

Tristan da Cunha: The island group consists of the islands of Tristan da Cunha, Nightingale, Inaccessible, and Gough. Tristan da Cunha is named after its Portuguese discoverer (1506); it was garrisoned by the British in 1816 to prevent any attempt to rescue Napoleon from Saint Helena. Gough and Inaccessible Islands have been designated World Heritage Sites. South Africa leases a site for a meteorological station on Gough Island.

GEOGRAPHY

Location: islands in the South Atlantic Ocean, about midway between South America and Africa; Ascension Island lies 700 nm northwest of Saint Helena; Tristan da Cunha lies 2,300 nm southwest of Saint Helena

Geographic coordinates: *Saint Helena:* 15 57 S, 5 42 W

Climate:

Saint Helena: tropical marine; mild, tempered by trade winds

Ascension Island: tropical marine; mild, semi-arid

Tristan da Cunha: temperate marine; mild, tempered by trade winds (tends to be cooler than Saint Helena)

Terrain: the islands of this group result from volcanic activity associated with the Atlantic Mid-Ocean Ridge

Saint Helena: rugged, volcanic; small scattered plateaus and plains

Ascension: surface covered by lava flows and cinder cones of 44 dormant volcanoes; ground rises to the east

Tristan da Cunha: sheer cliffs line the coastline of the nearly circular island; the flanks of the central volcanic peak are deeply dissected; narrow coastal plain lies between The Peak and the coastal cliffs

Elevation extremes: *lowest point:* Atlantic Ocean 0 m

highest point: Queen Mary's Peak on Tristan da Cunha 2,060 m; Green Mountain on Ascension Island 859 m; Mount Actaeon on Saint Helena Island 818 m

SAINT KITTS AND NEVIS

INTRODUCTION

Background: Carib Indians occupied the islands of the West Indies for hundreds of years before the British began settlement in 1623. In 1967, the island territory of Saint Christopher-Nevis-Anguilla became an associated state of the UK with full internal autonomy. The island of Anguilla rebelled and was allowed to secede in 1971. The remaining islands achieved independence in 1983 as Saint Kitts and Nevis. In 1998, a vote in Nevis on a referendum to separate from Saint Kitts fell short of the two-thirds majority needed. Nevis continues in its efforts to separate from Saint Kitts.

ECONOMY

Economy—overview: The economy of Saint Kitts and Nevis depends on tourism; since the 1970s tourism has replaced sugar as the traditional mainstay of the economy. Following the 2005 harvest, the government closed the sugar industry, after several decades of losses. To compensate for lost jobs, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as export-oriented manufacturing and offshore banking. Roughly 200,000 tourists visited the islands in 2009, but reduced tourism arrivals and foreign investment led to an economic contraction in 2009-2012, and the economy returned to growth only in 2013. Like other tourist destinations in the Caribbean, St. Kitts and Nevis is vulnerable to damage from natural disasters and shifts in tourism demand. The government has made notable progress on reducing its public debt—from 154% of GDP in 2011 to 83% in 2013—although it still faces one of the highest levels in the world, largely attributable to public enterprise losses.

TRANSNATIONAL ISSUES

Disputes—international: joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under United Nations Convention on the Law of the Sea, which permits Venezuela to extend its Economic Exclusion Zone/continental shelf over a large portion of the eastern Caribbean Sea

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; some money-laundering activity

SAINT LUCIA

INTRODUCTION

Background: The island, with its fine natural harbor at Castries, was contested between England and France throughout the 17th and early 18th centuries (changing possession 14 times); it was finally ceded to the UK in 1814. Even after the abolition of slavery on its plantations in 1834, Saint Lucia remained an agricultural island, dedicated to producing tropical commodity crops. Self-government was granted in 1967 and independence in 1979.

ECONOMY

Economy—overview: The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries. Tourism is Saint Lucia’s main source of jobs and income—accounting for 65% of GDP—and the island’s main source of foreign exchange earnings. The manufacturing sector is the most diverse in the Eastern Caribbean area. Crops such as bananas, mangos, and avocados continue to be grown for export, but St. Lucia’s once solid banana industry has been devastated by strong competition. Saint Lucia is vulnerable to a variety of external shocks, including volatile tourism receipts, natural disasters, and dependence on foreign oil. Furthermore, high public debt—77% of GDP in 2012—and high debt servicing obligations constrain the ANTHONY administration’s ability to respond to adverse external shocks. St. Lucia has experienced anemic growth since the onset of the global financial crisis in 2008, largely because of a slowdown in tourism—airlines cut back on their routes to St. Lucia in 2012. Also, St. Lucia introduced a value added tax in 2012 of 15%, becoming the last country in the Eastern Caribbean to do so. In 2013, the government introduced a National Competitiveness and Productivity Council to address St. Lucia’s high public wages and lack of productivity.

TRANSNATIONAL ISSUES

Disputes—international: joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under United Nations Convention on the Law of the Sea, which permits Venezuela to extend its Economic Exclusion Zone/continental shelf over a large portion of the eastern Caribbean Sea

Trafficking in persons: *current situation:* St. Lucia is a destination country for persons subjected to forced prostitution and forced labor; legal and illegal immigrants from Haiti, Jamaica, the Dominican Republic, Guyana, and South Asia, especially those working in domestic service, are vulnerable to human trafficking; some children under 18 are coerced to work in St. Lucia's commercial sex industry

tier rating: Tier 2 Watch List—St. Lucia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government did not report any investigations, prosecutions, or convictions of trafficking offenders or public officials complicit in human trafficking in 2012 or 2011, although a counter-trafficking act was passed in 2010; the government helps protect trafficking victims by funding an NGO and running a system of informal shelters but lacks formal procedures for identifying victims and referring them to available protection and assistance services; St. Lucia is not a party to the 2000 UN TIP Protocol (2013)

Illicit drugs: transit point for South American drugs destined for the US and Europe

SAINT MARTIN

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished Saint Martin to the French and Dutch, who divided it between themselves in 1648. Friction between the two sides caused the border to frequently fluctuate over the next two centuries, with the French eventually holding the greater portion of the island (about 57%). The cultivation of sugar cane introduced African slavery to the island in the late 18th century; the practice was not abolished until 1848. The island became a free port in 1939; the tourism industry was dramatically expanded during the 1970s and

1980s. In 2003, the populace of Saint Martin voted to secede from Guadeloupe and in 2007, the northern portion of the island became a French overseas collectivity. In 2010, the southern Dutch portion of the island became the independent nation of Sint Maarten within the Kingdom of the Netherlands.

lyrics/music: Gerard KEMPS

note: the song, written in 1958, is used as an unofficial anthem for the entire island (both French and Dutch sides); as a collectivity of France, in addition to the local anthem, "La Marseillaise" remains official on the French side (see France); as a constituent part of the Kingdom of the Netherlands, in addition to the local anthem, "Het Wilhelmus" remains official on the Dutch side (see Netherlands)

ECONOMY

Economy—overview: The economy of Saint Martin centers around tourism with 85% of the labor force engaged in this sector. Over one million visitors come to the island each year with most arriving through the Princess Juliana International Airport in Sint Maarten. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported, primarily from Mexico and the United States. Saint Martin is reported to have the highest per capita income in the Caribbean.

ECONOMY

Economy—overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. France heavily subsidizes the islands to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Fish farming, crab fishing, and agriculture are being developed to diversify the local economy. Recent test drilling for oil may pave the way for development of the energy sector.

SAINT VINCENT AND THE GRENADINES

INTRODUCTION

Background: Resistance by native Caribs prevented colonization on Saint Vincent until 1719. Disputed between France and the United Kingdom for most of the 18th century, the island was ceded to the latter in 1783. Between 1960 and 1962, Saint Vincent and the Grenadines was a separate administrative unit of the Federation of the West Indies. Autonomy was granted in 1969 and independence in 1979.

ECONOMY

Economy—overview: Success of the economy hinges upon seasonal variations in agriculture, tourism, and construction activity as well as remittance inflows. Much of the workforce is employed in banana production and tourism, but persistent high unemployment has prompted many to leave the islands. This lower-middle-income country is vulnerable to natural disasters—tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002. In 2008, the islands had more than 200,000 tourist arrivals, mostly to the Grenadines, a drop of nearly 20% from 2007. Saint Vincent is home to a small offshore banking sector and has moved to adopt international regulatory standards. The government's ability to invest in social programs and respond to external shocks is constrained by its high public debt burden, which was 68% of GDP at the end of 2011. Weak recovery in the tourism and construction sectors will limit growth prospects in 2014.

SAMOA

INTRODUCTION

Background: New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the “Western” from its name in 1997.

ECONOMY

Economy—overview: The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, agriculture, and fishing. The country is vulnerable to devastating storms. Agriculture employs roughly two-thirds of the labor force and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. One factory in the Foreign Trade Zone employs 3,000 people to make automobile

electrical harnesses for an assembly plant in Australia. Tourism is an expanding sector accounting for 25% of GDP; 122,000 tourists visited the islands in 2007. In late September 2009, an earthquake and the resulting tsunami severely damaged Samoa, and nearby American Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. In December 2012, extensive flooding and wind damage from Tropical Cyclone Evan killed four people, displaced over 6,000, and damaged or destroyed an estimated 1,500 homes in Samoa's Upolu island. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, while at the same time protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

SAN MARINO

INTRODUCTION

Background: Geographically the third smallest state in Europe (after the Holy See and Monaco), San Marino also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marinus in A.D. 301. San Marino's foreign policy is aligned with that of the European Union, although it is not a member; social and political trends in the republic track closely with those of its larger neighbor, Italy.

ECONOMY

Economy—overview: San Marino's economy relies heavily on tourism, the banking industry and the manufacture and export of ceramics, clothing, fabrics, furniture, paints, spirits, tiles, and wine. The manufacturing and financial sectors account for more than half of San Marino's GDP. The per capita level of output and standard of living are comparable to those of the most prosperous regions of Italy. The economy benefits from foreign investment due to its relatively low corporate taxes and low taxes on interest earnings. The income tax rate is also very low, about one-third the average EU level. San Marino does not issue public debt securities; when necessary, it finances deficits by drawing down central bank deposits. San Marino's economy has been contracting since 2008, largely due to weakened demand from Italy—which accounts for nearly 90% of its export market—and financial sector consolidation. Difficulties in the banking sector, the recent global economic downturn, and the sizeable decline in tax revenues have

contributed to negative real GDP growth. The government has adopted measures to counter the economic downturn, including subsidized credit to businesses and is seeking to shift its growth model away from a reliance on bank and tax secrecy. San Marino continues to work towards harmonizing its fiscal laws with EU and international standards. In September 2009, the OECD removed San Marino from its list of tax havens that have yet to fully adopt global tax standards, and in 2010 San Marino signed Tax Information Exchange Agreements with most major countries. In 2013 San Marino's Government signed a Double Taxation Agreement with Italy, but a referendum on EU membership failed to reach the quorum needed to bring it to a vote.

SAO TOME AND PRINCIPE

INTRODUCTION

Background: Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century—all grown with African plantation slave labor, a form of which lingered into the 20th century. While independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The country held its first free elections in 1991, but frequent internal wrangling between the various political parties precipitated repeated changes in leadership and two failed coup attempts in 1995 and 2003. In 2012, three opposition parties combined in a no confidence vote to bring down the majority government of former Prime Minister Patrice TROVOADA. The new government of Prime Minister Gabriel Arcanjo Ferreira DA COSTA is entirely composed

of opposition party members with limited experience in governance. New oil discoveries in the Gulf of Guinea may attract increased attention to the small island nation.

ECONOMY

Economy—overview: This small, poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement. Sao Tome and Principe has to import fuels, most manufactured goods, consumer goods, and a substantial amount of food, making it vulnerable to fluctuations in global commodity prices. Over the years, it has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. Sao Tome and Principe benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program, which helped bring down the country's \$300 million debt burden. In August 2005, the

government signed on to a new 3-year IMF Poverty Reduction and Growth Facility (PRGF) program worth \$4.3 million. In April 2011 the country completed a Threshold Country Program with The Millennium Challenge Corporation to help increase tax revenues, reform customs, and improve the business environment. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Potential exists for the development of petroleum resources in Sao Tome and Principe's territorial waters in the oil-rich Gulf of Guinea, which are being jointly developed in a 60-40 split with Nigeria, but any actual production is at least several years off. The first production licenses were sold in 2004, though a dispute over licensing with Nigeria delayed the country's receipt of more than \$20 million in signing bonuses for almost a year. Maintaining control of inflation, fiscal discipline, and increasing flows of foreign direct investment into the oil sector are the major economic problems facing the country.

Military—note: Sao Tome and Principe’s army is a tiny force with almost no resources at its disposal and would be wholly ineffective operating unilaterally; infantry equipment is considered simple to operate and maintain but may require refurbishment or replacement after 25 years in tropical climates; poor pay, working conditions, and alleged nepotism in the promotion of officers have been problems in the past, as reflected in the 1995 and 2003 coups; these issues are being addressed with foreign assistance aimed at improving the army and its focus on realistic security concerns; command is exercised from the president, through the Minister of Defense, to the Chief of the Armed Forces staff (2005)

SAUDI ARABIA

INTRODUCTION

Background: Saudi Arabia is the birthplace of Islam and home to Islam's two holiest shrines in Mecca and Medina. The king's official title is the Custodian of the Two Holy Mosques. The modern Saudi state was founded in 1932 by ABD AL-AZIZ bin Abd al-Rahman Al SAUD (Ibn Saud) after a 30-year campaign to unify most of the Arabian Peninsula. One of his male descendants rules the country today, as required by the country's 1992 Basic Law. King ABDALLAH bin Abd al-Aziz ascended to the throne in 2005. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. The continuing presence of foreign troops on Saudi soil after the liberation

of Kuwait became a source of tension between the royal family and the public until all operational US troops left the country in 2003. Major terrorist attacks in May and November 2003 spurred a strong on-going campaign against domestic terrorism and extremism. King ABDALLAH since 2005 has worked to incrementally modernize the Kingdom—driven by personal ideology and political pragmatism—through a series of social and economic initiatives, including expanding employment and social opportunities for women, attracting foreign investment, increasing the role of the private sector in the economy, and discouraging businesses from hiring foreign workers. The Arab Spring inspired protests - increasing in number since 2011 but usually small in size—over primarily domestic issues among Saudi Arabia’s majority Sunni population. Riyadh has taken a cautious but firm approach by arresting some protesters but releasing most of them quickly, and by using its state-sponsored clerics to counter political and Islamist activism. In addition, Saudi Arabia has seen protests among the Shia populace in the Eastern Province, who have protested primarily against the detention of political prisoners, endemic discrimination, and Bahraini and Saudi Government actions in Bahrain. Protests are met by a strong police presence, with some arrests, but not the level of bloodshed seen in protests elsewhere in the region. In response to the unrest, King ABDALLAH in February and March 2011 announced a series of benefits to Saudi citizens including funds to build affordable housing, salary increases for government workers, and unemployment entitlements. To promote increased political participation, the government held elections nationwide in September 2011 for half the members of 285 municipal councils—a body that holds little influence in the Saudi Government. Also in September, the king announced that women will be allowed to run for and vote in future municipal elections—first held in 2005—and serve as full members of the advisory Consultative Council. The country remains a leading producer of oil and natural gas and holds about 17% of the world’s proven oil reserves. The government continues to pursue economic reform and diversification, particularly since Saudi Arabia’s accession to the WTO in 2005, and promotes foreign investment in the kingdom. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are ongoing governmental concerns.

Flag description: green, a traditional color in Islamic flags, with the Shahada or Muslim creed in large white Arabic script (translated as "There is no god but God; Muhammad is the Messenger of God") above a white horizontal saber (the tip points to the hoist side); design dates to the early twentieth century and is closely associated with the Al Saud family which

established the kingdom in 1932; the flag is manufactured with differing obverse and reverse sides so that the Shahada reads—and the sword points—correctly from right to left on both sides

note: one of only three national flags that differ on their obverse and reverse sides—the others are Moldova and Paraguay

National symbol(s): palm tree surmounting two crossed swords

National anthem: *name:* “Aash Al Maleek” (Long Live Our Beloved King)

lyrics/music: Ibrahim KHAFAJI/Abdul Rahman al-KHATEEB

note: music adopted 1947, lyrics adopted 1984

ECONOMY

Economy—overview: Saudi Arabia has an oil-based economy with strong government controls over major economic activities. It possesses about 16% of the world's proven petroleum reserves, ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 80% of budget revenues, 45% of GDP, and 90% of export earnings. Saudi Arabia is encouraging the growth of the private sector in order to diversify its economy and to employ more Saudi nationals. Diversification efforts are focusing on power generation, telecommunications, natural gas exploration, and petrochemical sectors. Over 6 million foreign workers play an important role in the Saudi economy, particularly in the oil and service sectors, while Riyadh is struggling to reduce unemployment among its own nationals. Saudi officials are particularly focused on employing its large youth population, which generally lacks the education and technical skills the private sector needs. Riyadh has substantially boosted spending on job training and education, most recently with the opening of the King Abdallah University of Science and Technology—Saudi Arabia's first co-educational university. As part of its effort to attract foreign investment, Saudi Arabia acceded to the WTO in 2005. The government has begun establishing six “economic cities” in different regions of the country to promote foreign investment and plans to spend \$373 billion between 2010 and 2014 on social development and infrastructure projects to advance Saudi Arabia's economic development.

TRANSNATIONAL ISSUES

Disputes—international: Saudi Arabia has reinforced its concrete-filled security barrier along sections of the now fully demarcated border with Yemen to stem illegal cross-border activities; Kuwait and Saudi Arabia continue discussions on a maritime boundary with Iran; Saudi Arabia claims Egyptian-administered islands of Tiran and Sanafir

Refugees and internally displaced persons:

refugees (country of origin): 291,000 (Palestinian Territories) (2009)

stateless persons: 70,000 (2012); note—thousands of biduns (stateless Arabs) are descendants of nomadic tribes who were not officially registered when national borders were established, while others migrated to Saudi Arabia in search of jobs; some have temporary identification cards that must be renewed every five years, but their rights remain restricted; most Palestinians have only legal resident status; some naturalized Yemenis were made stateless after being stripped of their passports when Yemen backed Iraq in its invasion of Kuwait in 1990; Saudi women cannot pass their citizenship on to their children, so if they marry a non-national, their children risk statelessness

Trafficking in persons: *current situation*: Saudi Arabia is a destination country for men and women subjected to forced labor and, to a lesser extent, forced prostitution; men and women from Bangladesh, India, Sri Lanka, Nepal, Pakistan, the Philippines, Indonesia, Sudan, Ethiopia, Kenya, and many other countries voluntarily travel to Saudi Arabia as domestic servants or other low-skilled laborers, but some subsequently face conditions indicative of involuntary servitude (many are forced to work months or years beyond their contract term because employers withhold passports and required exit visas); women, primarily from Asian and

African countries, are believed to be forced into prostitution in Saudi Arabia; others were reportedly kidnapped and forced into prostitution after running away from abusive employers; Yemeni, Nigerian, Pakistani, Afghan, Chadian, and Sudanese children were subjected to forced labor as beggars and street vendors in Saudi Arabia, facilitated by criminal gangs

tier rating: Tier 3—Saudi Arabia does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; fewer victims were identified and referred to protection services than in the previous reporting period; the sponsorship system, including the exit visa requirement, continues to restrict the freedom of movement of migrant workers and hamper the ability of victims to pursue legal cases against their employers; however, the government has implemented regulations mandating the formation of unified recruitment companies to replace the sponsorship model; no specialized shelter was available to victims of sex trafficking or male victims of trafficking (2013)

Illicit drugs: death penalty for traffickers; improving anti-money-laundering legislation and enforcement

SENEGAL

INTRODUCTION

Background: The French colonies of Senegal and the French Sudan were merged in 1959 and granted their independence as the Mali Federation in 1960. The union broke up after only a few months. Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. The envisaged integration of the two countries was never carried out, and the union was dissolved in 1989. The Movement of Democratic Forces in the Casamance (MFDC) has led a low-level separatist insurgency in southern Senegal since the 1980s, and several peace deals have failed to resolve the conflict. Nevertheless, Senegal remains one of the most stable democracies in Africa and has a long history of participating in international peacekeeping and regional mediation. Senegal was ruled by a Socialist Party

for 40 years until Abdoulaye WADE was elected president in 2000. He was reelected in 2007 and during his two terms amended Senegal's constitution over a dozen times to increase executive power and to weaken the opposition. His decision to run for a third presidential term sparked a large public backlash that led to his defeat in a March 2012 runoff election with Macky SALL.

ECONOMY

Economy—overview: Senegal’s economy is driven by agriculture and that sector is the primary source of employment for the rural areas. The

country's key export industries are phosphate mining, fertilizer production, and commercial fishing. The country is also working on iron ore and oil exploration projects. Senegal relies heavily on donor assistance and foreign direct investment. President Macky SALL, who was elected in March 2012 under a reformist policy agenda, inherited an economy with a weak infrastructure, challenging business environment, and a culture of overspending that still plagued the country in 2013. The IMF completed a non-dispersing, Policy Support Initiative program in December 2010 and approved a new three-year policy support instrument to assist with economic reforms. The economy continues to suffer from unreliable power supplies and rising costs of living, which has led to public protests and high unemployment and has prompted migrants to flee Senegal in search of better job opportunities in Europe.

SERBIA

INTRODUCTION

Background: The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Communist Partisans resisted the Axis occupation and division of Yugoslavia from 1941 to 1945 and fought nationalist opponents and collaborators as well. The military and political movement headed by Josip Broz “TITO” (Partisans) took full control of Yugoslavia when their domestic rivals and the occupiers were defeated in 1945. Although communists, TITO and his successors (Tito died in 1980) managed to steer their own path between the Warsaw Pact nations and the West for the next four and a half decades. In 1989, Slobodan MILOSEVIC became president of the Republic of Serbia and his ultranationalist calls for Serbian domination led to the violent breakup of

Yugoslavia along ethnic lines. In 1991, Croatia, Slovenia, and Macedonia declared independence, followed by Bosnia in 1992. The remaining republics of Serbia and Montenegro declared a new Federal Republic of Yugoslavia (FRY) in April 1992 and under MILOSEVIC's leadership, Serbia led various military campaigns to unite ethnic Serbs in neighboring republics into a "Greater Serbia." These actions were ultimately unsuccessful and, after international intervention, led to the signing of the Dayton Peace Accords in 1995. MILOSEVIC retained control over Serbia and eventually became president of the FRY in 1997. In 1998, an ethnic Albanian insurgency in the formerly autonomous Serbian province of Kosovo provoked a Serbian counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians living in Kosovo. The MILOSEVIC government's rejection of a proposed international settlement led to NATO's bombing of Serbia in the spring of 1999. Serbian military and police forces withdrew from Kosovo in June 1999, and the UN Security Council authorized an interim UN administration and a NATO-led security force in Kosovo. FRY elections in late 2000 led to the ouster of MILOSEVIC and the installation of democratic government. In 2003, the FRY became the State Union of Serbia and Montenegro, a loose federation of the two republics. Widespread violence predominantly targeting ethnic Serbs in Kosovo in March 2004 led to more intense calls to address Kosovo's status, and the UN began facilitating status talks in 2006. In June 2006, Montenegro seceded from the federation and declared itself an independent nation. Serbia subsequently gave notice that it was the successor state to the union of Serbia and Montenegro. In February 2008, after nearly two years of inconclusive negotiations, Kosovo declared itself independent of Serbia—an action Serbia refuses to recognize. At Serbia's request, the UN General Assembly (UNGA) in October 2008 sought an advisory opinion from the International Court of Justice (ICJ) on whether Kosovo's unilateral declaration of independence was in accordance with international law. In a ruling considered unfavorable to Serbia, the ICJ issued an advisory opinion in July 2010 stating that international law did not prohibit declarations of independence. In late 2010, Serbia agreed to an EU-drafted UNGA Resolution acknowledging the ICJ's decision and calling for a new round of talks between Serbia and Kosovo, this time on practical issues rather than Kosovo's status. The EU-moderated Belgrade-Pristina dialogue began in March 2011 and was raised to the level of prime ministers in October 2012. Serbia and Kosovo signed the first agreement of principles governing the normalization of relations between the two countries in April 2013 and are in the process of implementing its provisions.

Flag description: three equal horizontal stripes of red (top), blue, and white—the Pan-Slav colors representing freedom and revolutionary ideals; charged with the coat of arms of Serbia shifted slightly to the hoist side; the principal field of the coat of arms represents the Serbian state and displays a white two-headed eagle on a red shield; a smaller red shield on the eagle represents the Serbian nation, and is divided into four quarters by a white cross; interpretations vary as to the meaning and origin of the white, curved symbols resembling firesteels or Cyrillic “C’s” in each quarter; a royal crown surmounts the coat of arms

note: the Pan-Slav colors were inspired by the 19th-century flag of Russia

National symbol(s): double-headed eagle

National anthem: *name:* “Boze pravde” (God of Justice)

lyrics/music: Jovan DORDEVIC/Davorin JENKO

note: adopted 1904; the song was originally written as part of a play in 1872 and has been used as an anthem by the Serbian people throughout the 20th and 21st centuries

ECONOMY

Economy—overview: Serbia has a transitional economy largely dominated by market forces, but the state sector remains significant in certain areas and many institutional reforms are needed. The economy relies on manufacturing and exports, driven largely by foreign investment. MILOSEVIC-era mismanagement of the economy, an extended period of international economic sanctions, civil war, and the damage to Yugoslavia’s infrastructure and industry during the NATO airstrikes in 1999 left the economy only half the size it was in 1990. After the ousting of former Federal Yugoslav President MILOSEVIC in September 2000, the Democratic Opposition of Serbia (DOS) coalition government implemented stabilization measures and embarked on a market reform program. After renewing its membership in the IMF in December 2000, Serbia continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). Serbia has made progress in trade liberalization and enterprise restructuring and privatization, but many

large enterprises—including the power utilities, telecommunications company, natural gas company, and others—remain in state hands. Serbia has made some progress towards EU membership, signing a Stabilization and Association Agreement with Brussels in May 2008, and with full implementation of the Interim Trade Agreement with the EU in February 2010, gained candidate status in March 2012. In January 2014, Serbia's EU accession talks officially opened. Serbia's negotiations with the World Trade Organization are advanced, with the country's complete ban on the trade and cultivation of agricultural biotechnology products representing the primary remaining obstacle to accession. Serbia's program with the IMF was frozen in early 2012 because the 2012 budget approved by parliament deviated from the program parameters; the arrangement is now void. However, an IMF mission visited Serbia in February 2014 to initiate discussions with Serbian authorities on a possible new IMF arrangement and these talks will continue following the formation of the new government. High unemployment and stagnant household incomes are ongoing political and economic problems. Structural economic reforms needed to ensure the country's long-term prosperity have largely stalled since the onset of the global financial crisis. Growing budget deficits constrain the use of stimulus efforts to revive the economy and contribute to growing concern of a public debt crisis, given that Serbia's total public debt as a share of GDP doubled between 2008 and 2013. Serbia's concerns about inflation and exchange-rate stability may preclude the use of expansionary monetary policy. During the recent election campaign, the victorious SNS party promised comprehensive economic reform during the first half of 2014 to address issues with the fiscal deficit, state-owned enterprises, the labor market, construction permits, bankruptcy and privatization, and other areas. Major challenges ahead include: high unemployment rates and the need for job creation; high government expenditures for salaries, pensions, healthcare, and unemployment benefits; a growing need for new government borrowing; rising public and private foreign debt; attracting new foreign direct investment; and getting the IMF program back on track. Other serious longer-term challenges include an inefficient judicial system, high levels of corruption, and an aging population. Factors favorable to Serbia's economic growth include its strategic location, a relatively inexpensive and skilled labor force, and free trade agreements with the EU, Russia, Turkey, and countries that are members of the Central European Free Trade Agreement (CEFTA).

SEYCHELLES

INTRODUCTION

Background: A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. Independence came in 1976. Socialist rule was brought to a close with a new constitution and free elections in 1993. President France-Albert RENE, who had served since 1977, was re-elected in 2001, but stepped down in 2004. Vice President James Alix MICHEL took over the presidency and in July 2006 was elected to a new five-year term; he was reelected in May 2011.

ECONOMY

Economy—overview: Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle-income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. In 2008, having depleted its foreign exchange reserves, Seychelles defaulted on interest payments due on a \$230 million Eurobond, requested assistance from the International Monetary Fund (IMF), and immediately enacted a number of significant structural reforms, including liberalization of the exchange rate, reform of the public sector to include layoffs, and the selling of some state assets. In December 2013, the IMF declared that Seychelles had successfully transitioned to a market-based economy with full employment and a fiscal surplus.

TRANSNATIONAL ISSUES

Disputes—international: Mauritius and Seychelles claim the Chagos Islands (UK-administered British Indian Ocean Territory)

Trafficking in persons: *current situation:* Seychelles is a source and destination country for Seychellois children and foreign women subjected to sex trafficking; Seychellois girls and, to a lesser extent, boys are forced into prostitution in nightclubs, bars, guest houses, hotels, brothels, private homes, and on the streets by peers, family members, and pimps; foreign tourists, sailors, and migrant workers contribute to the demand for commercial sex acts in Seychelles; some of the large population of foreign migrant workers reportedly experience the underpayment of wages and substandard housing

tier rating: Tier 2 Watch List—Seychelles does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has failed to report any investigations, prosecutions, or convictions of trafficking offenses; the government also has not identified or provided protective services to any trafficking victims and punished victims for crimes committed as a result of being trafficked, although it has acknowledged the need for specialized training of officials in recognizing, investigating, and prosecuting trafficking offenses, it did not provide any such training during the reporting period (2013)

SIERRA LEONE

INTRODUCTION

Background: Democracy is slowly being reestablished after the civil war from 1991 to 2002 that resulted in tens of thousands of deaths and the displacement of more than 2 million people (about a third of the population). The military, which took over full responsibility for security following the departure of UN peacekeepers at the end of 2005, is increasingly developing as a guarantor of the country's stability. The armed forces remained on the sideline during the 2007 and 2012 national elections, and over the past year have deployed over 850 peacekeepers in the African Union Mission in Somalia (AMISOM). As of January 2014, Sierra Leone also fielded 122 staff for five UN peacekeeping missions. In March 2014, the closure of the UN Integrated Peacebuilding Office in Sierra Leone

(UNIPSIL) marked the end of more than 15 years of peacekeeping and political operations in Sierra Leone. The government's priorities include furthering development, creating jobs, and stamping out endemic corruption.

ECONOMY

Economy—overview: Sierra Leone is extremely poor. Nearly half of the working-age population engages in subsistence agriculture. The country possesses substantial mineral, agricultural, and fishery resources, but it is still recovering from a civil war that ended in the early 2000s that destroyed most institutions. In recent years economic growth has been driven by mining—particularly of iron ore and oil exploration. The country exports rutile, diamonds, and bauxite, and is vulnerable to fluctuations in international commodity prices. The country relies on external assistance to meet its budgetary needs; overseas grants make up one-fourth of total revenue. Corruption is a hindrance to foreign investment, although from 2011 to 2012 the country’s Anti-Corruption Commission increased convictions of high-level officials from nine to 22 and recovered millions of dollars. In December 2013, the US Millennium Challenge Corporation (MCC) did not hold a vote on the reselection of Sierra Leone because the country did not pass MCC’s Scorecard Corruption indicator; however, MCC continues compact development through a more limited engagement.

TRANSNATIONAL ISSUES

Disputes—international: as domestic fighting among disparate ethnic groups, rebel groups, warlords, and youth gangs in Cote d'Ivoire, Guinea, Liberia, and Sierra Leone gradually abates, the number of refugees in border areas has begun to slowly dwindle; Sierra Leone considers excessive Guinea's definition of the flood plain limits to define the left bank boundary of the Makona and Moa rivers and protests Guinea's continued occupation of these lands including the hamlet of Yenga occupied since 1998

SINGAPORE

INTRODUCTION

Background: Singapore was founded as a British trading colony in 1819. It joined the Malaysian Federation in 1963 but separated two years later and became independent. Singapore subsequently became one of the world's most prosperous countries with strong international trading links (its port is one of the world's busiest in terms of tonnage handled) and with per capita GDP equal to that of the leading nations of Western Europe.

ECONOMY

Economy—overview: Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. The economy depends heavily on exports, particularly in consumer electronics, information technology products, pharmaceuticals, and on a growing financial services sector. The economy contracted 0.6% in 2009 as a result of the global financial crisis, but rebounded 15.1% in 2010, on the strength of renewed exports, before slowing to in 2011-13, largely a result of soft demand for exports during the second European recession. Over the longer term, the government hopes to establish a new growth path that focuses on raising productivity. Singapore

has attracted major investments in pharmaceuticals and medical technology production and will continue efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

TRANSNATIONAL ISSUES

Disputes—international: disputes persist with Malaysia over deliveries of fresh water to Singapore, Singapore's extensive land reclamation works,

bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; piracy remains a problem in the Malacca Strait

Illicit drugs: drug abuse limited because of aggressive law enforcement efforts; as a transportation and financial services hub, Singapore is vulnerable, despite strict laws and enforcement, as a venue for money laundering

SLOVAKIA

INTRODUCTION

Background: Slovakia's roots can be traced to the 9th century state of Great Moravia. Subsequently, the Slovaks became part of the Hungarian Kingdom, where they remained for the next 1,000 years. Following the formation of the dual Austro-Hungarian monarchy in 1867, language and education policies favoring the use of Hungarian (Magyarization) resulted in a strengthening of Slovak nationalism and a cultivation of cultural ties with the closely related Czechs, who were under Austrian rule. After the dissolution of the Austro-Hungarian Empire at the close of World War I, the Slovaks joined the Czechs to form Czechoslovakia. During the interwar period, Slovak nationalist leaders pushed for autonomy within Czechoslovakia, and in 1939 Slovakia became an independent state allied with Nazi Germany. Following World War II, Czechoslovakia was reconstituted and came under communist rule within Soviet-dominated Eastern Europe. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize communist rule and create "socialism with a human face," ushering in a period of repression known as "normalization." The peaceful "Velvet Revolution" swept the Communist Party from power at the end of 1989 and inaugurated a return to democratic rule and a market economy. On 1 January 1993, the country underwent a nonviolent "velvet divorce" into its two national components, Slovakia and the Czech Republic. Slovakia joined both NATO and the EU in the spring of 2004 and the euro zone on 1 January 2009.

ECONOMY

Economy—overview: Slovakia has made significant economic reforms since its separation from the Czech Republic in 1993. After a period of relative stagnation in the early and mid 1990s, reforms to the taxation, healthcare, pension, and social welfare systems helped Slovakia consolidate its budget, get on track to join the EU in 2004, and adopt the euro in January 2009. Major privatizations are nearly complete, the banking sector is almost entirely in foreign hands, and the government has facilitated a foreign investment boom with business friendly policies. Foreign direct investment (FDI), especially in the automotive and electronic sectors, fueled much of the growth until 2008. Cheap, skilled labor, low taxes, no dividend taxes, a relatively liberal labor code, and a favorable geographical location are Slovakia’s main advantages to foreign investors. Growth returned, following a contraction in 2009, but has remained sluggish in large part due to continued weakness in external demand. In 2012 the government of Prime Minister Robert FICO rolled back some of Slovakia’s pro-growth reforms to help shore up public finances. Corruption and slow dispute resolution remain key factors constraining economic growth.

SLOVENIA

INTRODUCTION

Background: The Slovene lands were part of the Austro-Hungarian Empire until the latter's dissolution at the end of World War I. In 1918, the Slovenes joined the Serbs and Croats in forming a new multinational state, which was named Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a modern state. Slovenia acceded to both NATO and the EU in the spring of 2004; it joined the eurozone in 2007.

Flag description: three equal horizontal bands of white (top), blue, and red, derive from the medieval coat of arms of the Duchy of Carniola; the Slovenian seal (a shield with the image of Triglav, Slovenia's highest peak, in white against a blue background at the center; beneath it are two wavy blue lines depicting seas and rivers, and above it are three six-pointed stars arranged in an inverted triangle, which are taken from the coat of arms of the Counts of Celje, the great Slovene dynastic house of the late 14th and early 15th centuries) appears in the upper hoist side of the flag centered on the white and blue bands

National symbol(s): Mount Triglav

National anthem: *name:* "Zdravljica" (A Toast)

lyrics/music: France PRESEREN/Stanko PREMRL

note: adopted 1989; the anthem was originally written in 1848; the full poem, whose seventh verse is used as the anthem, speaks of pan-Slavic nationalism

ECONOMY

Economy—overview: With excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe, Slovenia has one of the highest per capita GDPs in Central Europe. Slovenia became the first 2004 European Union entrant to adopt the euro (on 1 January 2007) and has experienced one of the most stable political transitions in Central and Southeastern Europe. In March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. In 2007, Slovenia was invited to begin the process for joining the OECD; it became a member in 2012. However, long-delayed privatizations, particularly within Slovenia's largely state-owned and increasingly indebted banking sector, have fueled investor concerns since 2012 that the country would need EU-IMF financial assistance. In 2013, the European Commission granted Slovenia permission to begin recapitalizing ailing lenders and transferring their nonperforming assets into a "bad bank" established to restore bank balance sheets. Yield-seeking bond investors' strong demand for Slovenian debt helped the government in 2013 to continue to finance itself independently on international markets. The government has embarked on a program of state asset sales intended to bolster investor confidence in the economy, which in 2014 is poised to contract 1%, its third-year of recession.

TRANSNATIONAL ISSUES

Disputes—international: since the breakup of Yugoslavia in the early 1990s, Croatia and Slovenia have each claimed sovereignty over Pirin Bay and four villages, and Slovenia has objected to Croatia's claim of an exclusive economic zone in the Adriatic Sea; in 2009, however Croatia and Slovenia signed a binding international arbitration agreement to define their disputed land and maritime borders, which led to Slovenia lifting its objections to Croatia joining the EU; Slovenia continues to impose a hard border Schengen regime with Croatia, which joined the EU in 2013 but has not yet fulfilled Schengen requirements; as a member state that forms part of the EU's external border, Slovenia has implemented the strict Schengen border rules to curb illegal migration and commerce through southeastern Europe while encouraging close cross-border ties with Croatia

Illicit drugs: minor transit point for cocaine and Southwest Asian heroin bound for Western Europe, and for precursor chemicals

SOLOMON ISLANDS

INTRODUCTION

Background: The UK established a protectorate over the Solomon Islands in the 1890s. Some of the most bitter fighting of World War II occurred on this archipelago. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, and endemic crime have undermined stability and civil society. In June 2003, then Prime Minister Sir Allan KEMAKEZA sought the assistance of Australia in reestablishing law and order; the following month, an Australian-led multinational force arrived to restore peace and disarm ethnic militias. The Regional Assistance Mission to the Solomon Islands (RAMSI) has generally been effective in restoring law and order and rebuilding government institutions.

ECONOMY

Economy—overview: The bulk of the population depends on agriculture, fishing, and forestry for at least part of its livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of The Regional Assistance Mission to the Solomon Islands (RAMSI), severe ethnic violence, the closing of key businesses, and an empty government treasury culminated in economic collapse. RAMSI's efforts to restore law and order and economic stability have led to modest growth as the economy rebuilds.

TRANSNATIONAL ISSUES

Disputes—international: since 2003, the Regional Assistance Mission to Solomon Islands, consisting of police, military, and civilian advisors drawn from 15 countries, has assisted in reestablishing and maintaining civil and political order while reinforcing regional stability and security

Trafficking in persons: current situation: The Solomon Islands is a source and destination country for local and Southeast Asian men and women subjected to forced labor and forced prostitution; women from China, Indonesia, Malaysia, and the Philippines are recruited for legitimate work and upon arrival are forced into prostitution; men from Indonesia and Malaysia recruited to work in the Solomon Islands' mining and logging industries may be subjected to forced labor; local children are forced into prostitution near foreign logging camps, on fishing vessels, and at hotel and other entertainment venues; some local children are also sold by their parents for marriage to foreign workers or put up for "informal adoption" and then find themselves forced into domestic servitude or forced prostitution

tier rating: Tier 2 Watch List—The Solomon Islands does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has formed an ad hoc Solomon Islands Trafficking-in-Persons Advisory Committee and established an informal victim assistance referral procedure for law enforcement; the government did not pass the necessary implementing regulations for anti-trafficking legislation enacted in 2012, preventing authorities from using the new law to prosecute alleged traffickers; the government continues to rely on civil society or religious organizations to provide limited services to victims; the Solomon Islands is not a party to the 2000 UN TIP Protocol (2013)

SOMALIA

INTRODUCTION

Background: Britain withdrew from British Somaliland in 1960 to allow its protectorate to join with Italian Somaliland and form the new nation of Somalia. In 1969, a coup headed by Mohamed SIAD Barre ushered in an authoritarian socialist rule characterized by the persecution, jailing, and torture of political opponents and dissidents. After the regime's collapse early in 1991, Somalia descended into turmoil, factional fighting, and anarchy. In May 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence and continues efforts to establish a constitutional democracy, including holding municipal,

parliamentary, and presidential elections. The regions of Bari, Nugaal, and northern Mudug comprise a neighboring semi-autonomous state of Puntland, which has been self-governing since 1998 but does not aim at independence; it has also made strides toward reconstructing a legitimate, representative government but has suffered some civil strife. Puntland disputes its border with Somaliland as it also claims portions of eastern Sool and Sanaag. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. In 2000, the Somalia National Peace Conference (SNPC) held in Djibouti resulted in the formation of an interim government, known as the Transitional National Government (TNG). When the TNG failed to establish adequate security or governing institutions, the Government of Kenya, under the auspices of the Intergovernmental Authority on Development (IGAD), led a subsequent peace process that concluded in October 2004 with the election of Abdullahi YUSUF Ahmed as President of a second interim government, known as the Transitional Federal Government (TFG) of the Somali Republic. The TFG included a 275-member parliamentary body, known as the Transitional Federal Parliament (TFP). President YUSUF resigned late in 2008 while United Nations-sponsored talks between the TFG and the opposition Alliance for the Re-Liberation of Somalia (ARS) were underway in Djibouti. In January 2009, following the creation of a TFG-ARS unity government, Ethiopian military forces, which had entered Somalia in December 2006 to support the TFG in the face of advances by the opposition Islamic Courts Union (ICU), withdrew from the country. The TFP was doubled in size to 550 seats with the addition of 200 ARS and 75 civil society members of parliament. The expanded parliament elected Sheikh SHARIF Sheikh Ahmed, the former ICU and ARS chairman as president in January 2009. The creation of the TFG was based on the Transitional Federal Charter (TFC), which outlined a five-year mandate leading to the establishment of a new Somali constitution and a transition to a representative government following national elections. In 2009, the TFP amended the TFC to extend TFG's mandate until 2011 and in 2011 Somali principals agreed to institute political transition by August 2012. The transition process ended in September 2012 when clan elders replaced the TFP by appointing 275 members to a new parliament who subsequently elected a new president.

ECONOMY

Economy—overview: Despite the lack of effective national governance,

Somalia maintains an informal economy largely based on livestock, remittance/money transfer companies, and telecommunications. Agriculture is the most important sector with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. Mogadishu's main market offers a variety of goods from food to electronic gadgets. Hotels continue to operate and are supported with private-security militias. Somalia's government lacks the ability to collect domestic revenue, and arrears to the IMF have continued to grow. Somalia's capital city—Mogadishu—has witnessed the development of the city's first gas stations, supermarkets, and flights between Europe (Istanbul-Mogadishu) since the collapse of central authority in 1991. This economic growth has yet to expand outside of Mogadishu, and within the city, security concerns dominate business. In the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually, although international concerns over the money transfers into Somalia currently threatens these services.

Transportation—note: despite a dramatic drop in the number of attacks in 2012, the International Maritime Bureau continues to report the territorial and offshore waters in the Gulf of Aden and Indian Ocean as a region of significant risk for piracy and armed robbery against ships accounting for 25% of all attacks in 2012; 75 vessels, including commercial shipping and pleasure craft, were attacked or hijacked both at anchor and while underway compared with 237 in 2011; the number of hijackings off the coast of Somalia was reduced to 14 in 2012, down from 28 in 2011; as of April 2013, 77 vessels and 7 hostages were being held for ransom by Somali pirates; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators, including the use of on-board armed security teams, have reduced piracy incidents in that body of water; in response Somali-based pirates, using hijacked fishing trawlers as “mother ships” to extend their range, shifted operations as far south as the Mozambique Channel, eastward to the vicinity of the Maldives, and northeastward to the Strait of Hormuz

TRANSNATIONAL ISSUES

Disputes—international: Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; “Somaliland” secessionists provide port facilities in Berbera to landlocked Ethiopia and have established commercial ties with other regional states; “Puntland” and “Somaliland” “governments” seek international support in their secessionist aspirations and overlapping border claims; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia’s Ogaden and southern Somalia’s Oromo region; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading south across the border, which has long been open to nomadic pastoralists

Refugees and internally displaced persons:

IDPs: 1.1 million (civil war since 1988, clan-based competition for resources; 2011 famine; insecurity because of fighting between al-Shabaab and TFG allied forces) (2012)

SOUTH AFRICA

INTRODUCTION

Background: Dutch traders landed at the southern tip of modern day South Africa in 1652 and established a stopover point on the spice route between the Netherlands and the Far East, founding the city of Cape Town. After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments but were defeated in the Second Anglo Boer War (1899-1902); however, the British and the Afrikaners, as the Boers became known, ruled together beginning in 1910 under the Union of South Africa, which became a republic in 1961 after a whites-only

referendum. In 1948, the National Party was voted into power and instituted a policy of apartheid—the separate development of the races - which favored the white minority at the expense of the black majority. The African National Congress (ANC) led the opposition to apartheid and many top ANC leaders, such as Nelson MANDELA, spent decades in South Africa's prisons. Internal protests and insurgency, as well as boycotts by some Western nations and institutions, led to the regime's eventual willingness to negotiate a peaceful transition to majority rule. The first multi-racial elections in 1994 brought an end to apartheid and ushered in majority rule under an ANC-led government. South Africa since then has struggled to address apartheid-era imbalances in decent housing, education, and health care. ANC infighting, which has grown in recent years, came to a head in September 2008 when President Thabo MBEKI resigned, and Kgalema MOTLANTHE, the party's General-Secretary, succeeded him as interim president. Jacob ZUMA became president after the ANC won general elections in April 2009. National presidential and parliamentary elections are scheduled for May 2014.

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band that splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes; the flag colors do not have any official symbolism, but the Y

stands for the “convergence of diverse elements within South African society, taking the road ahead in unity”; black, yellow, and green are found on the flag of the African National Congress, while red, white, and blue are the colors in the flags of the Netherlands and the UK, whose settlers ruled South Africa during the colonial era

note: the South African flag is one of only two national flags to display six colors as part of its primary design, the other is South Sudan’s

National symbol(s): springbok antelope

National anthem: *name:* “National Anthem of South Africa”

lyrics/music: Enoch SONTONGA and Cornelius Jacob LANGENHOVEN/
Enoch SONTONGA and Marthinus LOURENS de Villiers

note: adopted 1994; the anthem is a combination of “N’kosi Sikelel’ iAfrica” (God Bless Africa) and “Die Stem van Suid Afrika” (The Call of South Africa), which were respectively the anthems of the non-white and white communities under apartheid; the official lyrics contain a mixture of Xhosa, Zulu, Sesotho, Afrikaans, and English; the music incorporates the melody used in the Tanzanian and Zambian anthems

ECONOMY

Economy—overview: South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors and a stock exchange that is the 16th largest in the world. Even though the country’s modern infrastructure supports a relatively efficient distribution of goods to major urban centers throughout the region, unstable electricity supplies retard growth. The global financial crisis reduced commodity prices and world demand. GDP fell nearly 2% in 2009 but has recovered since then, albeit slowly with 2014 growth projected at about 2%. Unemployment, poverty, and inequality—among the highest in the world—remain a challenge. Official unemployment is at nearly 25% of the work force, and runs significantly higher among black youth. Eskom, the state-run power company, has built two new power stations and installed new power demand management programs to improve power grid reliability. Construction delays at two additional plants, however, mean South Africa is operating on a razor thin margin; economists judge that growth cannot exceed 3% until those plants come on line. South Africa’s economic policy has focused on controlling inflation, however, the country has had significant budget deficits that restrict its ability to deal with pressing

economic problems. The current government faces growing pressure from special interest groups to use state-owned enterprises to deliver basic services to low-income areas and to increase job growth.

Military—note: with the end of apartheid and the establishment of majority rule, former military, black homelands forces, and ex-opposition forces were integrated into the South African National Defense Force (SANDF); as of 2003 the integration process was considered complete

TRANSNATIONAL ISSUES

Disputes—international: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River

Refugees and internally displaced persons:

refugees (country of origin): 17,864 (Somalia); 13,386 (Democratic Republic of Congo); 5,805 (Angola); 5,538 (Ethiopia) (2012)

Illicit drugs: transshipment center for heroin, hashish, and cocaine, as well as a major cultivator of marijuana in its own right; cocaine and heroin consumption on the rise; world's largest market for illicit methaqualone, usually imported illegally from India through various east African countries, but increasingly producing its own synthetic drugs for domestic consumption; attractive venue for money launderers given the increasing level of organized criminal and narcotics activity in the region and the size of the South African economy

SOUTH GEORGIA AND SOUTH SANDWICH ISLANDS

INTRODUCTION

Background: The islands, with large bird and seal populations, lie approximately 1,000 km east of the Falkland Islands and have been under British administration since 1908 - except for a brief period in 1982 when Argentina occupied them. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. Famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses scientists from the British

Antarctic Survey. Recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone from 12 nm to 200 nm around each island.

GEOGRAPHY

Location: Southern South America, islands in the South Atlantic Ocean, east of the tip of South America

Geographic coordinates: 54 30 S, 37 00 W

Map references: South America

Area: *total:* 3,903 sq km

country comparison to the world: 177

land: 3,903 sq km

water: 0 sq km

note: includes Shag Rocks, Black Rock, Clerke Rocks, South Georgia Island, Bird Island, and the South Sandwich Islands, which consist of 11 islands

Area—comparative: slightly larger than Rhode Island

Land boundaries: 0 km

Coastline: NA

Maritime claims: *territorial sea:* 12 nm

exclusive fishing zone: 200 nm

Climate: variable, with mostly westerly winds throughout the year interspersed with periods of calm; nearly all precipitation falls as snow

Terrain: most of the islands, rising steeply from the sea, are rugged and mountainous; South Georgia is largely barren and has steep, glacier-covered mountains; the South Sandwich Islands are of volcanic origin with some active volcanoes

Elevation extremes: *lowest point:* Atlantic Ocean 0 m

highest point: Mount Paget (South Georgia) 2,934 m

Natural resources: fish

Land use: *arable land:* 0%

permanent crops: 0%

other: 100% (largely covered by permanent ice and snow with some sparse vegetation consisting of grass, moss, and lichen) (2011)

Irrigated land: 0 sq km (2011)

Natural hazards: the South Sandwich Islands have prevailing weather conditions that generally make them difficult to approach by ship; they are also subject to active volcanism

Environment—current issues: NA

Geography—note: the north coast of South Georgia has several large bays, which provide good anchorage; reindeer, introduced early in the 20th century, live on South Georgia

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: the small military garrison on South Georgia withdrew in March 2001 replaced by a permanent group of scientists of the British Antarctic Survey, which also has a biological station on Bird Island; the South Sandwich Islands are uninhabited

GOVERNMENT

Country name: *conventional long form:* South Georgia and the South Sandwich Islands

conventional short form: South Georgia and South Sandwich Islands

abbreviation: SGSSI

Dependency status: overseas territory of the UK, also claimed by Argentina; administered from the Falkland Islands by a commissioner, who is concurrently governor of the Falkland Islands, representing Queen ELIZABETH II

Legal system: the laws of the UK where applicable apply; the senior magistrate from the Falkland Islands presides over the Magistrates Court

Diplomatic representation in the US: none (overseas territory of the UK, also claimed by Argentina)

Diplomatic representation from the US: none (overseas territory of the UK, also claimed by Argentina)

Flag description: blue, with the flag of the UK in the upper hoist-side quadrant and the South Georgia and South Sandwich Islands coat of arms centered on the outer half of the flag; the coat of arms features a shield with a golden lion rampant, holding a torch; the shield is supported by a fur seal

on the left and a Macaroni penguin on the right; a reindeer appears above the crest, and below the shield on a scroll is the motto LEO TERRAM PROPRIAM PROTEGAT (Let the Lion Protect its Own Land)); the lion with the torch represents the UK and discovery; the background of the shield, blue and white estoiles, are found in the coat of arms of James Cook, discoverer of the islands; all the outer supporting animals represented are native to the islands

ECONOMY

Economy—overview: Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

TRANSPORTATION

Ports and terminals: *major seaport(s):* Grytviken

MILITARY

Military—note: defense is the responsibility of the UK

TRANSNATIONAL ISSUES

Disputes—international: Argentina, which claims the islands in its constitution and briefly occupied them by force in 1982, agreed in 1995 to no longer seek settlement by force

SOUTHERN OCEAN

Introduction

Background: A large body of recent oceanographic research has shown that the Antarctic Circumpolar Current (ACC), an ocean current that flows from west to east around Antarctica, plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border - the Antarctic Convergence—which fluctuates with the seasons, but which encompasses a discrete body of water and a unique ecologic region. The Convergence concentrates nutrients, which promotes marine plant life, and which, in turn, allows for a greater abundance of animal life. In 2000, the International Hydrographic Organization delimited the waters within the Convergence as a fifth world ocean—the Southern Ocean—by combining the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific

Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which coincides with the Antarctic Treaty Limit and which approximates the extent of the Antarctic Convergence. As such, the Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean). It should be noted that inclusion of the Southern Ocean does not imply recognition of this feature as one of the world's primary oceans by the US Government.

GEOGRAPHY

Location: body of water between 60 degrees south latitude and Antarctica

Geographic coordinates: 60 00 S, 90 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references: Antarctic Region

Area: *total:* 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area—comparative: slightly more than twice the size of the US

Coastline: 17,968 km

Climate: sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain: the Southern Ocean is deep, 4,000 to 5,000 m over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400

to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second—100 times the flow of all the world's rivers

Elevation extremes: *lowest point:* -7,235 m at the southern end of the South Sandwich Trench

highest point: sea level 0 m

Natural resources: probable large and possible giant oil and gas fields on the continental margin; manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals—none exploited; krill, fish

Natural hazards: huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 m thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment—current issues: increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment—international agreements: the Southern Ocean is subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic

region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence), which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the cold polar surface waters to the south and the warmer waters to the north

Geography—note: the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

ECONOMY

Economy—overview: Fisheries in 2006-07 landed 126,976 metric tons, of which 82% (104,586 tons) was krill (*Euphausia superba*) and 9.5% (12,027 tons) Patagonian toothfish (*Dissostichus eleginoides*—also known as Chilean sea bass), compared to 127,910 tons in 2005-06 of which 83% (106,591 tons) was krill and 9.7% (12,396 tons) Patagonian toothfish (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Southern Ocean area). International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2007-08 Antarctic summer, 45,213 tourists visited the Southern Ocean, compared to 35,552 in 2006-07, and 29,799 in 2005-06 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO), and does not include passengers on overflights and those flying directly in and out of Antarctica). flying directly in and out of Antarctica).

TRANSPORTATION

Ports and terminals: *major seaport(s):* McMurdo, Palmer, and offshore anchorages in Antarctica

note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most to short periods in midsummer; even then

some cannot be entered without icebreaker escort; most Antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels

Transportation—note: Drake Passage offers alternative to transit through the Panama Canal

TRANSNATIONAL ISSUES

Disputes—international: Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

SOUTH SUDAN

INTRODUCTION

Background: Egypt attempted to colonize the region of southern Sudan by establishing the province of Equatoria in the 1870s. Islamic Mahdist revolutionaries overran the region in 1885, but in 1898 a British force was able to overthrow the Mahdist regime. An Anglo-Egyptian Sudan was established the following year with Equatoria being the southernmost of its eight provinces. The isolated region was largely left to itself over the following decades, but Christian missionaries converted much of the population and facilitated the spread of English. When Sudan gained its independence in 1956, it was with the understanding that the southerners would be able to participate fully in the political system. When the Arab Khartoum government reneged on its promises, a mutiny began that led to two prolonged periods of conflict (1955-1972 and 1983-2005) in which

perhaps 2.5 million people died—mostly civilians - due to starvation and drought. Ongoing peace talks finally resulted in a Comprehensive Peace Agreement, signed in January 2005. As part of this agreement the south was granted a six-year period of autonomy to be followed by a referendum on final status. The result of this referendum, held in January 2011, was a vote of 98% in favor of secession. Independence was attained on 9 July 2011. Since independence South Sudan has struggled with good governance and nation building and has attempted to control rebel militia groups operating in its territory. Economic conditions have deteriorated since January 2012 when the government decided to shut down oil production following bilateral disagreements with Sudan.

ECONOMY

Economy—overview: Following several decades of civil war with Sudan, industry and infrastructure in landlocked South Sudan are severely underdeveloped and poverty is widespread. Subsistence agriculture provides a living for the vast majority of the population. Property rights are insecure and price signals are weak, because markets are not well organized. South Sudan has little infrastructure—approximately 250 of paved roads. Electricity is produced mostly by costly diesel generators and indoor plumbing and potable water are scarce. South Sudan depends largely on imports of goods, services, and capital—mainly from Uganda, Kenya and Sudan. Nevertheless, South Sudan does have abundant natural resources. At independence in 2011, South Sudan produced nearly three-fourths of former Sudan's total oil output of nearly a half million barrels per day. The government of South Sudan derives nearly 98% of its budget revenues from oil. Oil is exported through two pipelines that run to refineries and shipping facilities at Port Sudan on the Red Sea. The economy of South Sudan will remain linked to Sudan for some time, given the long lead time and great expense required to build another pipeline, should the government decide to do so. In January 2012 South Sudan suspended production of oil because of its dispute with Sudan over transshipment fees. This suspension lasted fifteen months and had a devastating impact on GDP, which declined by 48% in 2012. With the resumption of oil flows the economy rebounded strongly during the second half of calendar year 2013. This occurred in spite of the fact that oil production, at an average level of 222,000 barrels per day, was 40% lower compared with 2011, prior to the shutdown. GDP is estimated to have grown by about 25% in 2013. However, the outbreak of conflict on December 15, 2013 combined with a further reduction of oil exports, means that GDP growth forecasts for 2014 are being revised downwards again, and poverty and food insecurity are rising. South Sudan holds one of the richest agricultural areas in Africa with fertile soils and abundant water supplies. Currently the region supports 10-20 million head of cattle. South Sudan is currently burdened by considerable debt, accrued largely in 2012, based on rapidly accumulating arrears, and increased military spending. South Sudan has received more than \$4 billion in foreign aid since 2005, largely from the UK, the US, Norway, and the Netherlands. Following independence, South Sudan's central bank issued a new currency, the South Sudanese Pound, allowing a short grace period for turning in the

old currency. Annual inflation peaked at 79.5% in May 2012 but declined rapidly thereafter, to an average of 1.7% in 2013. Following the December 2013 outbreak of violence, inflation is on the rise again. Long-term challenges include diversifying the formal economy, alleviating poverty, maintaining macroeconomic stability, improving tax collection and financial management and improving the business environment.

TRANSNATIONAL ISSUES

Disputes—international: South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan; periodic violent skirmishes with South Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; the boundary that separates Kenya and South Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

Refugees and internally displaced persons:

refugees (country of origin): 214,722 (Sudan); 14,208 (Democratic Republic of the Congo); 6,052 (Ethiopia) (2014)

IDPs: 916,900 (alleged coup attempt and ethnic conflict beginning in December 2013; information is lacking on those displaced in earlier years by: fighting in Abyei between the Sudanese Armed Forces and the Sudan People's Liberation Army (SPLA) in May 2011; clashes between the SPLA and dissident militia groups in South Sudan; inter-ethnic conflicts over resources and cattle; attacks from the Lord's Resistance Army; floods and drought) (2014)

Trafficking in persons: *current situation:* South Sudan is a source and destination country for men, women, and children subjected to forced labor and sex trafficking; South Sudanese women and girls, particularly those who are internally displaced or from rural areas, are vulnerable to forced labor and sexual exploitation in urban centers; the rising number of street children and child laborers are also exploited for forced labor and prostitution; women and girls from Uganda, Kenya, Ethiopia, and Democratic Republic of the Congo are trafficked to South Sudan with promises of legitimate jobs and are forced into the sex trade; inter-ethnic abductions continue in some communities in South Sudan

tier rating: Tier 2 Watch List—South Sudan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has made progress in implementing its UN-backed action plan to eliminate the use of child soldiers in its armed forces, but it has not demonstrated evidence of increasing efforts to address other forms of trafficking; the government has not taken steps to proactively identify trafficking victims among vulnerable populations and has not deployed a system to transfer victims to organizations to receive care; the government continues to indiscriminately arrest individuals in prostitution, including child sex trafficking victims, and sentence them to prison (2013)

SPAIN

INTRODUCTION

Background: Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World War I and II but suffered through a devastating civil war (1936-39). A peaceful transition to democracy following the death of dictator Francisco FRANCO in 1975, and rapid economic modernization (Spain joined the EU in 1986) gave Spain a dynamic and rapidly growing economy and made it a global champion of freedom and human rights. More recently the government has had to focus on measures to reverse a severe economic recession that began in mid-2008.

Austerity measures implemented to reduce a large budget deficit and reassure foreign investors have led to one of the highest unemployment rates in Europe.

Flag description: three horizontal bands of red (top), yellow (double width), and red with the national coat of arms on the hoist side of the yellow band; the coat of arms is quartered to display the emblems of the traditional kingdoms of Spain (clockwise from upper left, Castile, Leon, Navarre, and Aragon) while Granada is represented by the stylized pomegranate at the bottom of the shield; the arms are framed by two columns representing the Pillars of Hercules, which are the two promontories (Gibraltar and Ceuta) on either side of the eastern end of the Strait of Gibraltar; the red scroll across the two columns bears the imperial motto of “Plus Ultra” (further beyond) referring to Spanish lands beyond Europe; the triband arrangement with the center stripe twice the width of the outer dates to the 18th century

note: the red and yellow colors are related to those of the oldest Spanish kingdoms: Aragon, Castile, Leon, and Navarre

National symbol(s): Pillars of Hercules

National anthem: *name:* “Himno Nacional Espanol” (National Anthem of Spain)

lyrics/music: none/unknown

note: officially in use between 1770 and 1931, restored in 1939; the Spanish anthem has no lyrics; in the years prior to 1931 it became known as “Marcha Real” (The Royal March); it first appeared in a 1761 military bugle call book and was replaced by “Himno de Riego” in the years between 1931 and 1939; the long version of the anthem is used for the king, while the short version is used for the prince, prime minister, and occasions such as sporting events

ECONOMY

Economy—overview: Spain experienced a prolonged recession in the wake of the global financial crisis. GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and continued contracting through most of 2013. Economic growth resumed in late 2013, albeit only modestly, as credit contraction in the private sector, fiscal austerity, and high unemployment continued to weigh on domestic consumption and investment. Exports, however, have been resilient throughout the economic downturn, partially

offsetting declines in domestic consumption and helped to bring Spain's current account into surplus in 2013 for the first time since 1986. The unemployment rate rose from a low of about 8% in 2007 to more than 26% in 2013, straining Spain's public finances as spending on social benefits increased while tax revenues fell. Spain's budget deficit peaked at 11.4% of GDP in 2009. Spain gradually reduced the deficit to just under 7% of GDP in 2013, slightly above the 6.5% target negotiated between Spain and the EU. Public debt has increased substantially – from 60.1% of GDP in 2010 to 93.4% in 2013. Rising labor productivity, moderating labor costs, and lower inflation have helped to improve foreign investor interest in the economy and to reduce government borrowing costs. The government's ongoing efforts to implement reforms—labor, pension, health, tax, and education—are aimed at supporting investor sentiment. The government also has shored up struggling banks exposed to Spain's depressed domestic construction and real estate sectors by successfully completing an EU-funded restructuring and recapitalization program in December 2013.

Illicit drugs: despite rigorous law enforcement efforts, North African, Latin American, Galician, and other European traffickers take advantage of Spain’s long coastline to land large shipments of cocaine and hashish for distribution to the European market; consumer for Latin American cocaine and North African hashish; destination and minor transshipment point for Southwest Asian heroin; money-laundering site for Colombian narcotics trafficking organizations and organized crime

SPRATLY ISLANDS

INTRODUCTION

Background: The Spratly Islands consist of more than 100 small islands or reefs. They are surrounded by rich fishing grounds and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 45 islands are occupied by relatively small numbers of military forces from China, Malaysia, the Philippines, Taiwan, and Vietnam. Since 1985 Brunei has claimed a continental shelf that overlaps a southern reef but has not made any formal claim to the reef. Brunei claims an exclusive economic zone over this area.

GEOGRAPHY

Location: Southeastern Asia, group of reefs and islands in the South China Sea, about two-thirds of the way from southern Vietnam to the southern Philippines

Geographic coordinates: 8 38 N, 111 55 E

Map references: Southeast Asia

Area: *total:* less than 5 sq km

country comparison to the world: 248

land: less than 5 sq km

water: 0 sq km

note: includes 100 or so islets, coral reefs, and sea mounts scattered over an area of nearly 410,000 sq km of the central South China Sea

Area—comparative: NA

Land boundaries: 0 km

Coastline: 926 km

Maritime claims: NA

Climate: tropical

Terrain: flat

Elevation extremes: *lowest point:* South China Sea 0 m

highest point: unnamed location on Southwest Cay 4 m

Natural resources: fish, guano, undetermined oil and natural gas potential

Land use: *arable land:* 0%

permanent crops: 0%

other: 100% (2011)

Irrigated land: 5,700 sq km (2006)

Natural hazards: typhoons; numerous reefs and shoals pose a serious maritime hazard

Environment—current issues: NA

Geography—note: strategically located near several primary shipping lanes in the central South China Sea; includes numerous small islands, atolls, shoals, and coral reefs

Population: no indigenous inhabitants

note: there are scattered garrisons occupied by military personnel of several claimant states

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: Spratly Islands

ECONOMY

Economy—overview: Economic activity is limited to commercial fishing. The proximity to nearby oil—and gas-producing sedimentary basins suggests the potential for oil and gas deposits, but the region is largely unexplored. There are no reliable estimates of potential reserves. Commercial exploitation has yet to be developed.

MILITARY

Military—note: Spratly Islands consist of more than 100 small islands or reefs of which about 45 are claimed and occupied by China, Malaysia, the Philippines, Taiwan, and Vietnam

TRANSNATIONAL ISSUES

Disputes—international: all of the Spratly Islands are claimed by China (including Taiwan) and Vietnam; parts of them are claimed by Brunei,

Malaysia and the Philippines; despite no public territorial claim to Louisa Reef, Brunei implicitly lays claim by including it within the natural prolongation of its continental shelf and basis for a seabed median with Vietnam; claimants in November 2002 signed the “Declaration on the Conduct of Parties in the South China Sea,” which has eased tensions but falls short of a legally binding “code of conduct”; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands

SRI LANKA

INTRODUCTION

Background: The first Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The coastal areas of the island were controlled by the Portuguese in the 16th century and by the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was formally united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority

and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering peace negotiations. Violence between the LTTE and government forces intensified in 2006, but the government regained control of the Eastern Province in 2007. By May 2009, the government announced that its military had defeated the remnants of the LTTE. Since the end of the conflict, the government has enacted an ambitious program of economic development projects, many of which are financed by loans from the Government of China. In addition to efforts to reconstruct its economy, the government has resettled more than 95% of those civilians who were displaced during the final phase of the conflict and released the vast majority of former LTTE combatants captured by Government Security Forces. At the same time, there has been little progress on more contentious and politically difficult issues such as reaching a political settlement with Tamil elected representatives and holding accountable those alleged to have been involved in human rights violations and other abuses during the conflict.

ECONOMY

Economy—overview: Sri Lanka continues to experience strong economic growth following the end of the 26-year conflict with the Liberation Tigers of Tamil Eelam. The government has been pursuing large-scale reconstruction and development projects in its efforts to spur growth in war-torn and disadvantaged areas, develop small and medium enterprises and increase agricultural productivity. The government's high debt payments and bloated civil service have contributed to historically high budget deficits, but fiscal consolidation efforts and strong GDP growth in recent years have helped bring down the government's fiscal deficit. However, low tax revenues are a major concern. The 2008-09 global financial crisis and recession exposed Sri Lanka's economic vulnerabilities and nearly caused a balance of payments crisis. Agriculture slowed due to a drought and weak global demand affected exports and trade. In early 2012, Sri Lanka floated the rupee, resulting in a sharp depreciation, and took steps to curb imports. A large trade deficit remains a concern, but strong remittances from Sri Lankan workers abroad help offset the trade deficit. Government debt of about 80% of GDP remains among the highest in emerging markets.

TRANSNATIONAL ISSUES

Disputes—international: none

Refugees and internally displaced persons:

IDPs: as many as 90,000 (civil war; more than half displaced prior to 2008; many of the more than 480,000 IDPs registered as returnees have not reached durable solutions) (2014)

Trafficking in persons: *current situation:* Sri Lanka is primarily a source and, to a much lesser extent, a destination country for men, women, and children subjected to forced labor and sex trafficking; some Sri Lankan adults and children who migrate willingly to Saudi Arabia, Kuwait, Qatar, the United Arab Emirates, Jordan, Bahrain, Lebanon, Iraq, Afghanistan, Malaysia, and Singapore to work as domestic servants, construction workers, or garment factory workers face conditions indicative of forced labor; some Sri Lankan women are forced into prostitution in Jordan,

Singapore, Maldives, and other countries; within Sri Lanka, women and children are subjected to sex trafficking in brothels, while other children are forced to work in the agriculture, fireworks, and fish-drying industries

tier rating: Tier 2 Watch List—Sri Lanka does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; law enforcement efforts and victim protection, particularly identification, are very weak, with no reported prosecutions or convictions under the country's penal code article prohibiting human trafficking; government employees' complicity in trafficking offenses remains a problem; the government has not approved its draft standard operating procedures for identifying trafficking victims and referring them to protective services, consequently, victims may have been punished for crimes committed as a direct result of being trafficked; the government adopted an anti-trafficking action plan in 2012 (2013)

SUDAN

INTRODUCTION

Background: Military regimes favoring Islamic-oriented governments have dominated national politics since independence from Anglo-Egyptian co rule in 1956. Sudan was embroiled in two prolonged civil wars during most of the remainder of the 20th century. These conflicts were rooted in northern economic, political, and social domination of largely non-Muslim, non-Arab southern Sudanese. The first civil war ended in 1972 but another broke out in 1983. Peace talks gained momentum in 2002-04 with the signing of several accords. The final North/South Comprehensive Peace Agreement (CPA), signed in January 2005, granted the southern rebels autonomy for six years followed by a referendum on independence for Southern Sudan. The referendum was held in January 2011 and indicated

overwhelming support for independence. South Sudan became independent on 9 July 2011. Sudan and South Sudan have yet to fully implement security and economic agreements signed on September 27, 2012 relating to the normalization of relations between the two countries. The final disposition of the contested Abyei region has also to be decided. Since South Sudan's independence, conflict has broken out between the government and the Sudan People's Liberation Movement-North (SPLM-N) in Southern Kordofan and Blue Nile states, which has resulted in 1.2 million internally displaced persons or severely affected persons in need of humanitarian assistance. A separate conflict, which broke out in the western region of Darfur in 2003, has displaced nearly two million people and caused an estimated 200,000 to 400,000 deaths. Violence in Darfur in 2013 resulted in an additional estimated 6,000 civilians killed and 500,000 displaced. The UN and the African Union have jointly commanded a Darfur peacekeeping operation known as the African Union-United Nations Hybrid Mission in Darfur (UNAMID) since 2007. Peacekeeping troops have struggled to stabilize the situation and have increasingly become targets for attacks by armed groups. In 2013, 16 peacekeepers were killed, UNAMID's deadliest year so far. Sudan also has faced refugee influxes from neighboring countries, primarily Ethiopia, Eritrea, Chad, Central African Republic, and South Sudan. Armed conflict, poor transport infrastructure, and government denial of access have impeded the provision of humanitarian assistance to affected populations. ECONOMY

Economy—overview: Sudan is an extremely poor country that has experienced protracted social conflict, civil war, and, in July 2011, the loss of three-quarters of its oil production due to the secession of South Sudan. The oil sector had driven much of Sudan’s GDP growth since 1999. For nearly a decade, the economy boomed on the back of rising oil production, high oil prices, and significant inflows of foreign direct investment. Since the economic shock of South Sudan’s secession, Sudan has struggled to stabilize its economy and make up for the loss of foreign exchange earnings. The interruption of oil production in South Sudan in 2012 for over a year and the consequent loss of oil transit fees further exacerbated the fragile state of Sudan’s economy. Sudan is also subject to comprehensive US sanctions. Sudan is attempting to develop non-oil sources of revenues, such as gold mining, while carrying out an austerity program to reduce expenditures. The world’s largest exporter of gum Arabic, Sudan produces

75-80% of the world's total output. Agriculture continues to employ 80% of the work force. Sudan introduced a new currency, still called the Sudanese pound, following South Sudan's secession, but the value of the currency has fallen since its introduction. Khartoum formally devalued the currency in June 2012, when it passed austerity measures that included gradually repealing fuel subsidies. Sudan also faces rising inflation, which reached 47% on an annual basis in November 2012, but subsided to 25% in 2013. Ongoing conflicts in Southern Kordofan, Darfur, and the Blue Nile states, lack of basic infrastructure in large areas, and reliance by much of the population on subsistence agriculture keep close to half of the population at or below the poverty line.

TRANSNATIONAL ISSUES

Disputes—international: the effects of Sudan's almost constant ethnic and rebel militia fighting since the mid-20th century have penetrated all of the neighboring states; Chad wishes to be a helpful mediator in resolving the Darfur conflict, and in 2010 established a joint border monitoring force

with Sudan, which has helped to reduce cross-border banditry and violence; as of 2006, Chad, Ethiopia, Kenya, Central African Republic, Democratic Republic of the Congo, and Uganda provided shelter for over a half million Sudanese refugees, which include 240,000 Darfur residents driven from their homes by Janjawid armed militia and Sudanese military forces; as of January 2011, Sudan, in turn, hosted about 138,700 Eritreans, 43,000 Chadians, and smaller numbers of Ethiopians; Sudan accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia proceed slowly due to civil and ethnic fighting in eastern Sudan; Sudan claims but Egypt de facto administers security and economic development of Halaib region north of the 22nd parallel boundary; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan

Refugees and internally displaced persons:

refugees (country of origin): 112,283 (Eritrea); 32,220 (Chad) (2012); 60,568 (South Sudan) (2014)

IDPs: 2.641 million (civil war 1983-2005; ongoing conflict in Darfur region; government and rebel fighting along South Sudan border; inter-tribal clashes) (2013)

Trafficking in persons: *current situation:* Sudan is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking; Sudanese women and girls, particularly those from rural areas or who are internally displaced, are vulnerable to forced labor as domestic workers in homes throughout the country; some of these women and girls are subsequently sexually abused by male occupants of the household or forced to engage in commercial sex acts; Sudanese women and girls are subjected to domestic servitude in Middle Eastern countries and to forced sex trafficking in European countries; some Sudanese men who voluntarily migrate to the Middle East as low-skilled laborers face conditions indicative of forced labor; Sudanese children in Saudi Arabia are used in forced begging and street vending; Sudan is a transit and destination country for Ethiopian and Eritrean women subjected to domestic servitude in Sudan and Middle Eastern countries; Sudan is a destination for Ethiopian, Somali, and possibly Thai women subjected to forced prostitution; Sudanese children in Darfur are forcibly conscripted, at

times through abduction, and used by armed groups and government security forces

tier rating: Tier 3—Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; while the government has taken some initial steps to draft anti-trafficking legislation, prosecute suspected traffickers, demobilize and reintegrate child soldiers, and has convened its first workshop to discuss human trafficking, its efforts to combat human trafficking through law enforcement, protection, or prevention measures are undertaken in an ad hoc fashion, rather than as the result of strategic planning; the government has not employed a system for proactively identifying trafficking victims among vulnerable populations or a referral process for transferring victims to organizations providing care; its proxy militias reportedly unlawfully recruited and used child soldiers during the reporting period; the government has not taken action to conclude a proposed action plan with the UN to address the problem (2013)

SURINAME

INTRODUCTION

Background: First explored by the Spaniards in the 16th century and then settled by the English in the mid-17th century, Suriname became a Dutch colony in 1667. With the abolition of African slavery in 1863, workers were brought in from India and Java. Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to exert control through a succession of nominally civilian administrations until 1987, when international pressure finally forced a democratic election. In 1990, the military overthrew the civilian leadership, but a democratically elected government—a four-party coalition—returned to power in 1991. The coalition expanded to eight parties in 2005 and ruled until August

2010, when voters returned former military leader Desire BOUTERSE and his opposition coalition to power.

PEOPLE AND SOCIETY

Nationality: *noun:* Surinamer(s)
adjective: Surinamese

Ethnic groups: Hindustani (also known locally as “East Indians”; their ancestors emigrated from northern India in the latter part of the 19th century) 37%, Creole (mixed white and black) 31%, Javanese 15%, “Maroons” (their African ancestors were brought to the country in the 17th and 18th centuries as slaves and escaped to the interior) 10%, Amerindian 2%, Chinese 2%, white 1%, other 2%

Languages: Dutch (official), English (widely spoken), Sranang Tongo (Surinamese, sometimes called Taki-Taki, is native language of Creoles and much of the younger population and is lingua franca among others), Caribbean Hindustani (a dialect of Hindi), Javanese

Religions: Hindu 27.4%, Protestant 25.2% (predominantly Moravian), Roman Catholic 22.8%, Muslim 19.6%, indigenous beliefs 5%

Demographic profile: Suriname is a pluralistic society consisting primarily of Creoles (persons of mixed African and European heritage), the descendants of escaped African slaves known as Maroons, and the descendants of Indian and Javanese contract workers. The country overall is in full, post-industrial demographic transition, with a low fertility rate, a moderate mortality rate, and a rising life expectancy. However, the Maroon population of the rural interior lags behind because of lower educational attainment and contraceptive use, higher malnutrition, and significantly less access to electricity, potable water, sanitation, infrastructure, and health care. Some 350,000 people of Surinamese descent live in the Netherlands,

Suriname's former colonial ruler. In the 19th century, better-educated, largely Dutch-speaking Surinamese began emigrating to the Netherlands. World War II interrupted the outflow, but it resumed after the war when Dutch labor demands grew—emigrants included all segments of the Creole population. Suriname still is strongly influenced by the Netherlands because most Surinamese have relatives living there and it is the largest supplier of development aid. Other emigration destinations include French Guiana and the United States. Suriname's immigration rules are flexible, and the country is easy to enter illegally because rainforests obscure its borders. Since the mid-1980s, Brazilians have settled in Suriname's capital, Paramaribo, or eastern Suriname, where they mine gold. This immigration is likely to slowly re-orient Suriname toward its Latin American roots.

note: adopted 1959; the anthem, originally adapted from a Sunday school song written in 1893, contains lyrics in both Dutch and Sranang Tongo

ECONOMY

Economy—overview: The economy is dominated by the mining industry, with exports of alumina, gold, and oil accounting for about 85% of exports and 25% of government revenues, making the economy highly vulnerable to mineral price volatility. Economic growth has remained at about 4-5% per year in 2010-13, but the government’s budget was strained by high inflation in 2010. In January 2011, the government devalued the currency by 20% and raised taxes to reduce the budget deficit. As a result of these measures, inflation has receded to about 4% in 2013. Suriname’s economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition. The government’s reliance on revenue from extractive industries will temper Suriname’s economic outlook, especially if gold prices continue their downward trend.

TRANSNATIONAL ISSUES

Disputes—international: area claimed by French Guiana between Riviere Litani and Riviere Marouini (both headwaters of the Lawa); Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks United Nations Convention on the Law of the Sea arbitration to resolve the longstanding dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Trafficking in persons: *current situation:* Suriname is a source, destination, and transit country for women, men, and children who are subjected to sex trafficking and forced labor; women and girls from Suriname, Guyana, Brazil, and the Dominican Republic are subjected to sex trafficking in the country, sometimes around mining camps; debt bondage and sex trafficking are reported to occur within the Chinese migrant community; migrant workers in agriculture and on fishing boats and children working in informal urban sectors and gold mines are vulnerable to forced labor

tier rating: Tier 2 Watch List—Suriname does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has prosecuted an increased

number of sex trafficking cases and identified an increased number of child sex trafficking victims; accountability for trafficking offenses continues to be a problem as no offenders have been convicted and the complicity of local officials remains a concern; authorities do not have a formal system for referring victims to NGOs that provide services but reported doing so on an ad hoc basis; the government's interagency anti-trafficking working group drafted an anti-trafficking policy in 2012 (2013)

Illicit drugs: growing transshipment point for South American drugs destined for Europe via the Netherlands and Brazil; transshipment point for arms-for-drugs dealing

SVALBARD

INTRODUCTION

Background: First discovered by the Norwegians in the 12th century, the islands served as an international whaling base during the 17th and 18th centuries. Norway's sovereignty was recognized in 1920; five years later it officially took over the territory.

ECONOMY

Economy—overview: Coal mining, tourism, and international research are the major revenue sources on Svalbard. Coal mining is the dominant economic activity and a treaty of 9 February 1920 gave the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some hunting of seal, reindeer, and fox. Goods such as alcohol, tobacco, and vehicles, normally highly taxed on mainland Norway, are considerably cheaper in Svalbard in an effort by the Norwegian government to entice more people to live on the Arctic archipelago. By law, the Norwegians collect only enough taxes to pay for the needs of the local government; none of tax proceeds go to Norway.

SWAZILAND

INTRODUCTION

Background: Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s pressured King MSWATI III, Africa's last absolute monarch, to grudgingly allow political reform and greater democracy, although he has backslid on these promises in recent years. A constitution came into effect in 2006, but the legal status of political parties remains unclear. The African United Democratic Party tried unsuccessfully to register as an official political party in mid 2006. Talks over the constitution broke down between the government and progressive groups in 2007. Swaziland recently surpassed Botswana as the country with the world's highest known HIV/AIDS prevalence rate.

ECONOMY

Economy—overview: Surrounded by South Africa, except for a short border with Mozambique, Swaziland depends heavily on South Africa from which it receives more than 90% of its imports and to which it sends 60% of its exports. Swaziland's currency is pegged to the South African rand, effectively subsuming Swaziland's monetary policy to South Africa. The government is heavily dependent on customs duties from the Southern African Customs Union (SACU), and worker remittances from South Africa supplement domestically earned income. Subsistence agriculture employs approximately 70% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp were major foreign exchange earners; however, the wood pulp producer closed in January 2010, and sugar is now the main export earner. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Customs revenues plummeted due to the global economic crisis and a drop in South African imports. The resulting decline in revenue has pushed the country into a fiscal crisis. Swaziland is looking to other countries, including South Africa, for assistance, but continues to struggle to meet its monthly payroll and fund government programs. With an estimated 40% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and attract foreign direct investment is acute. Overgrazing, soil depletion, drought, and floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2006-07 because of drought, and more than one-quarter of the adult population has been infected by HIV/AIDS, as of 2013.

SWEDEN

INTRODUCTION

Background: A military power during the 17th century, Sweden has not participated in any war for almost two centuries. An armed neutrality was preserved in both world wars. Sweden's long-successful economic formula of a capitalist system intermixed with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000-02 and 2009 by the global economic downturns, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Sweden joined the EU in 1995, but the public rejected the introduction of the euro in a 2003 referendum.

Flag description: blue with a golden yellow cross extending to the edges of the flag; the vertical part of the cross is shifted to the hoist side in the style of the Dannebrog (Danish flag); the colors reflect those of the Swedish coat of arms—three gold crowns on a blue field

National symbol(s): three crowns; lion

National anthem: *name:* “Du Gamla, Du Fria” (Thou Ancient, Thou Free)

lyrics/music: Richard DYBECK/traditional

note: in use since 1844; the anthem, also known as “Sang till Norden” (Song of the North), is based on a Swedish folk tune; it has never been officially adopted by the government; “Kungssangen” (The King’s Song) serves as the royal anthem and is played in the presence of the royal family and during certain state ceremonies

ECONOMY

Economy—overview: Aided by peace and neutrality for the whole of the 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a highly skilled labor force. In September 2003, Swedish voters turned down entry into the euro system concerned about the impact on the economy and sovereignty. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for vast majority of industrial

output, of which the engineering sector accounts for about 50% of output and exports. Agriculture accounts for little more than 1% of GDP and of employment. Until 2008, Sweden was in the midst of a sustained economic upswing, boosted by increased domestic demand and strong exports. This, and robust finances, offered the center-right government considerable scope to implement its reform program aimed at increasing employment, reducing welfare dependence, and streamlining the state's role in the economy. Despite strong finances and underlying fundamentals, the Swedish economy slid into recession in the third quarter of 2008 and the contraction continued in 2009 as deteriorating global conditions reduced export demand and consumption. Strong exports of commodities and a return to profitability by Sweden's banking sector drove a rebound in 2010, but growth slipped in 2013, as a result of continued economic weakness in the EU—Sweden's main export market.

SWITZERLAND

INTRODUCTION

Background: The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence from the Holy Roman Empire in 1499. A constitution of 1848, subsequently modified in 1874, replaced the confederation with a centralized federal government. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two world wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN and international organizations but retains a strong commitment to neutrality.

ECONOMY

Economy—overview: Switzerland is a peaceful, prosperous, and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP among the highest in the world. Switzerland’s economy benefits from a highly developed service sector, led by financial services, and a manufacturing industry that specializes in high-technology, knowledge-based production. Its economic and political stability, transparent legal system, exceptional infrastructure, efficient capital markets, and low corporate tax rates also make Switzerland one of the world’s most competitive economies. The Swiss have brought their economic practices largely into conformity with the EU’s to enhance their international competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The fate of the Swiss economy is tightly linked to that of its neighbors in the euro zone, which purchases half of all Swiss exports. The global financial crisis of 2008 and resulting economic downturn in 2009 stalled export demand and put Switzerland in a recession. The Swiss National Bank (SNB) during this period effectively implemented a zero-interest rate policy to boost the economy as well as prevent appreciation of the franc, and Switzerland’s economy began to recover in 2010. The sovereign debt crises currently unfolding in neighboring euro-zone countries pose a significant risk to Switzerland’s financial stability and are driving up demand for the Swiss franc by investors seeking a safe-haven currency. The independent SNB has upheld its zero-interest rate policy and conducted major market interventions to prevent further appreciation of the Swiss franc, but parliamentarians have urged it to do more to weaken the currency. The franc’s strength has made Swiss exports less competitive and weakened the country’s growth outlook; GDP growth fell below 2% per year during 2011-13. Switzerland has also come under increasing pressure from individual neighboring countries, the

EU, the US, and international institutions to reform its banking secrecy laws. Consequently, the government agreed to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The government has renegotiated its double taxation agreements with numerous countries, including the US, to incorporate the OECD standard, and is considering the possibility of imposing taxes on bank deposits held by foreigners. These steps will have a lasting impact on Switzerland's long history of bank secrecy.

SYRIA

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French administered the area as Syria until granting it independence in 1946. The new country lacked political stability, however, and experienced a series of military coups during its first decades. Syria united with Egypt in February 1958 to form the United Arab Republic. In September 1961, the two entities separated, and the Syrian Arab Republic was reestablished. In November 1970, Hafiz al-ASAD, a member of the socialist Ba'th Party and the minority Alawi sect, seized power in a bloodless coup and brought political stability to the country. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. During the 1990s, Syria and Israel held occasional

peace talks over its return. Following the death of President al-ASAD, his son, Bashar al-ASAD, was approved as president by popular referendum in July 2000. Syrian troops—stationed in Lebanon since 1976 in an ostensible peacekeeping role - were withdrawn in April 2005. During the July-August 2006 conflict between Israel and Hizballah, Syria placed its military forces on alert but did not intervene directly on behalf of its ally Hizballah. In May 2007 Bashar al-ASAD's second term as president was approved by popular referendum. Influenced by major uprisings that began elsewhere in the region, antigovernment protests broke out in the southern province of Dar'a in March 2011 with protesters calling for the repeal of the restrictive Emergency Law allowing arrests without charge, the legalization of political parties, and the removal of corrupt local officials. Since then demonstrations and unrest have spread to nearly every city in Syria, but the size and intensity of protests have fluctuated over time. The government responded to unrest with a mix of concessions—including the repeal of the Emergency Law and approving new laws permitting new political parties and liberalizing local and national elections—and force. However, the government's response has failed to meet opposition demands for ASAD to step down, and the government's ongoing security operations to quell unrest and widespread armed opposition activity have led to extended violent clashes between government forces and oppositionists. International pressure on the ASAD regime has intensified since late 2011, as the Arab League, EU, Turkey, and the United States have expanded economic sanctions against the regime. Lakhdar BRAHIMI, current Joint Special Representative of the United Nations and the League of Arab States on the Syrian crisis, in October 2012 began meeting with regional heads of state to assist in brokering a cease-fire. In December 2012, the National Coalition of Syrian Revolution and Opposition Forces was recognized by more than 130 countries as the sole legitimate representative of the Syrian people. Unrest persisted in 2013, and the death toll among Syrian Government forces, opposition forces, and civilians has topped 100,000. In January 2014, the Syrian Opposition Coalition and Syrian regime began peace talks at the UN sponsored Geneva II conference.

ECONOMY

Economy—overview: Despite modest economic growth and reform prior to the outbreak of unrest, Syria’s economy continues to deteriorate amid the ongoing conflict that began in 2011. The economy further contracted in 2013 because of international sanctions, widespread infrastructure damage, reduced domestic consumption and production, and sharply rising inflation. The government has struggled to address the effects of economic decline, which include dwindling foreign exchange reserves, rising budget and trade deficits, and the decreasing value of the Syrian pound. The ongoing conflict and economic decline have created a humanitarian crisis,

prompting widespread need for international aid. Prior to the unrest, Damascus began liberalizing economic policies, including cutting lending interest rates, opening private banks, consolidating multiple exchange rates, raising prices on some subsidized items, and establishing the Damascus Stock Exchange. The economy remains highly regulated by the government. Long-run economic constraints include foreign trade barriers, declining oil production, high unemployment, rising budget deficits, increasing pressure on water supplies caused by heavy use in agriculture, rapid population growth, industrial expansion, and water pollution.

note: the ongoing civil war had created more than 2.7 million Syrian refugees—dispersed in Egypt, Iraq, Jordan, Lebanon, and Turkey—as of February 2014

IDPs: 6.5 million (ongoing civil war since 2011) (2014)

*stateless persons: 221,000 (2012); note—*Syria's stateless population is composed of Kurds and Palestinians; stateless persons are prevented from voting, owning land, holding certain jobs, receiving food subsidies or public healthcare, enrolling in public schools, or being legally married to Syrian citizens; in 1962, some 120,000 Syrian Kurds were stripped of their Syrian citizenship, rendering them and their descendants stateless; in 2011, the Syrian Government granted citizenship to thousands of Syrian Kurds as a means of appeasement; however, resolving the question of statelessness is not a priority given Syria's ongoing civil war

Trafficking in persons: *current situation:* due to Syria's political uprising and violent unrest, hundreds of thousands of Syrians, foreign migrant workers, and refugees have fled the country and are vulnerable to human trafficking; the lack of security and inaccessibility of the majority of the country makes it impossible to conduct a thorough analysis of the ongoing conflict and the scope and magnitude of Syria's human trafficking situation;

prior to the uprising, Syria was principally a destination country for women and children subjected to forced labor or sex trafficking; thousands of women—the majority from Indonesia, the Philippines, Somalia, and Ethiopia—were recruited to work as domestic servants but were subsequently subjected to forced labor; Filipina domestic workers continue to be sent to Syria and are vulnerable to forced labor; the Syrian armed forces and opposition forces are using Syrian children in combat and support roles and as human shields; Iraqi women and girls continue to be sexually exploited, and Syrian children still face conditions of

forced labor tier rating: Tier 3—the government does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government does not demonstrate evidence of increasing efforts to investigate and punish trafficking offenses, provide protective services to victims, inform the public about human trafficking, or provide much-needed anti-trafficking training to law enforcement and social welfare officials; the government does not refer any victims to NGO-operated shelters and has failed to institute procedures for the identification, interview, and referral of trafficking victims; the status of the national plan of action against trafficking is unknown (2013)

Illicit drugs: a transit point for opiates, hashish, and cocaine bound for regional and Western markets; weak anti-money-laundering controls and bank privatization may leave it vulnerable to money laundering

TAIWAN

INTRODUCTION

Background: In 1895, military defeat forced China's Qing Dynasty to cede Taiwan to Japan. Taiwan came under Chinese Nationalist control after World War II. Following the communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the

1947 constitution drawn up for all of China. Beginning in the 1950s, the ruling authorities gradually democratized and incorporated the local population within the governing structure. This process expanded rapidly in the 1980s. In 2000, Taiwan underwent its first peaceful transfer of power from the Nationalist (Kuomintang or KMT) to the Democratic Progressive Party. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be management of sensitive relations between Taiwan and China—specifically the question of Taiwan's eventual status—as well as domestic priorities for economic reform and growth.

Flag description: red field with a dark blue rectangle in the upper hoist-side corner bearing a white sun with 12 triangular rays; the blue and white design of the canton (symbolizing the sun of progress) dates to 1895; it was later adopted as the flag of the Kuomintang Party; blue signifies liberty, justice, and democracy; red stands for fraternity, sacrifice, and nationalism, white represents equality, frankness, and the people's livelihood; the 12 rays of the sun are those of the months and the twelve traditional Chinese hours (each ray equals two hours)

National symbol(s): white, 12-rayed sun on blue field

National anthem: *name:* “Zhonghua Minguo guoge” (National Anthem of the Republic of China)

lyrics/music: HU Han-min, TAI Chi-t'ao, and LIAO Chung-k'ai/CHENG Mao-Yun

note: adopted 1930; the anthem is also the song of the Kuomintang Party; it is informally known as “San Min Chu I” or “San Min Zhu Yi” (Three Principles of the People); because of political pressure from China, “Guo Qi Ge” (National Banner Song) is used at international events rather than the official anthem of Taiwan; the “National Banner Song” has gained popularity in Taiwan and is commonly used during flag raisings

ECONOMY

Economy—overview: Taiwan has a dynamic capitalist economy with gradually decreasing government guidance of investment and foreign trade. Exports, led by electronics, machinery, and petrochemicals have provided the primary impetus for economic development. This heavy dependence on exports exposes the economy to fluctuations in world demand. Taiwan's diplomatic isolation, low birth rate, and rapidly aging population are other major long-term challenges. Free trade agreements have proliferated in East Asia over the past several years, and following the landmark Economic Cooperation Framework Agreement (ECFA) signed with China in June 2010, Taiwan in July 2013 signed a free trade deal with New Zealand—Taipei's first-ever with a country with which it does not maintain diplomatic relations—and in November inked a trade pact with Singapore. Negotiations continue on follow-on components of ECFA regarding trade in goods and a dispute resolution mechanism; a trade in services agreement is under review in the legislature. Taiwan's Total Fertility rate of just over

one child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 accounting for 11.2% of the island's total population as of 2012. The island runs a large overall trade surplus largely because of its surplus with China, and its foreign reserves are the world's sixth largest, behind China, Japan, Saudi Arabia, Russia, and Switzerland. In 2006 China overtook the US to become Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Taiwan since 2009 has gradually loosened rules governing Chinese investment on the island, and has also secured greater market access for its investors in the mainland. In August 2012, Taiwan Central Bank signed a memorandum of understanding on cross-strait currency settlement with its Chinese counterpart. The MOU allows for the direct settlement of Chinese RMB and the New Taiwan dollar across the Strait, which could help develop Taiwan into a local RMB hub. Closer economic links with the mainland bring greater opportunities for the Taiwan economy, but also poses new challenges as the island becomes more economically dependent on China while political differences remain unresolved.

MILITARY

Military branches: Army, Navy (includes Marine Corps), Air Force, Coast Guard Administration, Armed Forces Reserve Command, Combined Service Forces Command, Armed Forces Police Command

Military service age and obligation: 18-35 years of age for compulsory and voluntary military service; service obligation is 2 years; women may enlist; women in Air Force service are restricted to noncombat roles; reserve obligation to age 30 (Army); the Ministry of Defense is in the process of implementing a voluntary enlistment system over the period 2010-2015, although nonvolunteers will still be required to perform alternative service or go through 4 months of military training (2012)

Manpower available for military service:

males age 16-49: 6,183,567

females age 16-49: 6,006,676 (2010 est.)

Manpower fit for military service:

males age 16-49: 5,074,173

females age 16-49: 4,951,088 (2010 est.)

Manpower reaching militarily significant age annually: *male:* 166,190

female: 155,306 (2010 est.)

TRANSNATIONAL ISSUES

Disputes—international: involved in complex dispute with Brunei, China, Malaysia, the Philippines, and Vietnam over the Spratly Islands, and with China and the Philippines over Scarborough Reef; the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions but falls short of a legally binding “code of conduct” desired by several of the disputants; Paracel Islands are occupied by China, but claimed by Taiwan

and Vietnam; in 2003, China and Taiwan became more vocal in rejecting both Japan's claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared exclusive economic zone in the East China Sea where all parties engage in hydrocarbon prospecting

Illicit drugs: regional transit point for heroin, methamphetamine, and precursor chemicals; transshipment point for drugs to Japan; major problem with domestic consumption of methamphetamine and heroin; rising problems with use of ketamine and club drugs

TAJIKISTAN

INTRODUCTION

Background: The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bands of indigenous guerrillas (called "basmachi") fiercely contested Bolshevik control of the area, which was not fully reestablished until 1925. Tajikistan was first created as an autonomous republic within Uzbekistan in 1924, but the USSR designated Tajikistan a separate republic in 1929 and transferred to it much of present-day Sughd province. Ethnic Uzbeks form a substantial minority in Tajikistan. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992 to 1997. Tajikistan endured several domestic security incidents during 2010-12, including armed conflict between government forces and local strongmen in the Rasht Valley and between government forces and criminal groups in Gorno-Badakhshan Autonomous Oblast. The country remains the poorest in the former Soviet sphere. Tajikistan became a member of the World Trade Organization in March 2013. However, its economy continues to face major challenges, including dependence on remittances from Tajikistanis working in Russia, pervasive corruption, and the major role narcotics trafficking plays in the country's informal economy.

Flag description: three horizontal stripes of red (top), a wider stripe of white, and green; a gold crown surmounted by seven gold, five-pointed stars is located in the center of the white stripe; red represents the sun, victory, and the unity of the nation, white stands for purity, cotton, and mountain snows, while green is the color of Islam and the bounty of nature; the crown symbolizes the Tajik people; the seven stars signify the Tajik magic number “seven”—a symbol of perfection and the embodiment of happiness

National symbol(s): crown surmounted by seven, five-pointed stars

National anthem: *name:* “Surudi milli” (National Anthem)

lyrics/music: Gulnazar KELDI/Suleiman YUDAKOV

note: adopted 1991; after the fall of the Soviet Union, Tajikistan kept the music of the anthem from its time as a Soviet republic but adopted new lyrics

ECONOMY

Economy—overview: Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. The 1992-1997 civil war severely damaged an already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Because of a lack of employment opportunities in Tajikistan, more than one million Tajik citizens work abroad—roughly 90% in Russia—supporting families in Tajikistan through remittances. Less than 7% of the land area is arable and cotton is the most important crop. Until 2008, cotton production was closely monitored and controlled by the government. In the wake of the National Bank of Tajikistan’s admission in December 2007 that it had directed the AgroInvestBank to improperly lend money to politically

connected investors in the cotton sector, the IMF canceled its stand-by assistance program in Tajikistan. As part of the Tajik government's subsequent reforms, over a half billion dollars in farmer debt has been forgiven. In 2008 Tajikistan passed new law authorizing farmers to decide for themselves what crops to grow, and this has resulted in a gradual decrease in cotton output. Tajikistan imports approximately 60% of its food, most of which comes by rail. Uzbekistan closed one of the rail lines into Tajikistan in late 2011, hampering the transit of goods to and from the southern part of the country. As a result, food and fuel prices increased to the highest levels since 2002. Mineral resources include silver, gold, uranium, and tungsten. Industry consists mainly of small obsolete factories in food processing and light industry, substantial hydropower facilities, and a large aluminum plant—currently operating below 25% of capacity. Electricity output expanded with the completion of the Sangtuda-1 hydropower dam—finished in 2009 with Russian investment. The smaller Sangtuda-2 hydropower dam, built with Iranian investment, began operating in 2012 at a limited capacity. The Tajik government is tens of millions of dollars in arrears for both Sangtuda dams, and Sangtuda-2 has been closed for “maintenance” since January 2014. The government is pinning its drive for energy independence on completion of the Roghun dam, which is scheduled for mid-2014. In 2010, the government began a coerced sale of shares in the Roghun enterprise to its population, ultimately raising over \$180 million before stopping under intense criticism from international donors, but the dam is likely to cost billions of dollars. The World Bank funded two feasibility studies (technical-economic, and social-environmental) for the dam. If built according to plan, Roghun will be the tallest dam in the world, will operate year around, and will significantly expand Tajikistan's electricity output. In 2013, the Tajik government finalized an agreement to import one million tons of fuel and oil products from Russia each year, at reduced prices. Tajikistan's economic situation remains fragile due to uneven implementation of structural reforms, corruption, weak governance, seasonal power shortages, and its large external debt burden.

Illicit drugs: major transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of opium poppy for domestic consumption; Tajikistan seizes roughly 80% of all drugs captured in Central Asia and stands third worldwide in seizures of opiates (heroin and raw opium); significant consumer of opiates

TANZANIA

INTRODUCTION

Background: Shortly after achieving independence from Britain in the early 1960s, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule ended in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities. The formation of a government of national unity between Zanzibar's two leading parties succeeded in minimizing electoral tension in 2010.

GEOGRAPHY

Location: Eastern Africa, bordering the Indian Ocean, between Kenya and Mozambique

Geographic coordinates: 6 00 S, 35 00 E

Map references: Africa

ECONOMY

Economy—overview: Tanzania is one of the world's poorest economies in terms of per capita income, however, it has achieved high overall growth rates based on gold production and tourism. Tanzania has largely completed its transition to a liberalized market economy, though the government retains a presence in sectors such as telecommunications, banking, energy, and mining. The economy depends on agriculture, which accounts for more than one-quarter of GDP, provides 85% of exports, and employs about 80% of the work force. The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging economic infrastructure, including rail and port infrastructure that are important trade links for inland countries. Recent banking reforms have helped increase private-sector growth and investment, and the government has increased spending

on agriculture to 7% of its budget. The financial sector in Tanzania has expanded in recent years and foreign-owned banks account for about 48% of the banking industry's total assets. Competition among foreign commercial banks has resulted in significant improvements in the efficiency and quality of financial services, though interest rates are still relatively high, reflecting high fraud risk. All land in Tanzania is owned by the government, which can lease land for up to 99 years. Proposed reforms to allow for land ownership, particularly foreign land ownership, remain unpopular. Continued donor assistance and solid macroeconomic policies supported a positive growth rate, despite the world recession. In 2008, Tanzania received the world's largest Millennium Challenge Compact grant, worth \$698 million, and in December 2012 the Millennium Challenge Corporation selected Tanzania for a second Compact. Dar es Salaam used fiscal stimulus and loosened monetary policy to ease the impact of the global recession. GDP growth in 2009-13 was a respectable 6-7% per year due to high gold prices and increased production.

TRANSNATIONAL ISSUES

Disputes—international: Tanzania still hosts more than a half million refugees, more than any other African country, mainly from Burundi and the Democratic Republic of the Congo, despite the international community's efforts at repatriation; disputes with Malawi over the boundary in Lake Nyasa (Lake Malawi) and the meandering

Songwe River remain dormant Refugees and internally displaced persons:

refugees (country of origin): 63,330 (Democratic Republic of the Congo); 35,343 (Burundi) (2012)

Trafficking in persons: *current situation:* Tanzania is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; the exploitation of young girls in domestic servitude continues to be Tanzania's largest human trafficking problem; Tanzanian boys are subject to forced labor mainly on farms but also in mines, in the commercial service sector, in the sex trade, and possibly on small fishing boats; internal trafficking is more prevalent than transnational trafficking and is usually facilitated by friends, family members, or intermediaries offering education or legitimate job opportunities; trafficking victims from Burundi, Kenya, Bangladesh, Nepal, Yemen, and India are to work in Tanzania's agricultural, mining, and domestic service sectors or may be sex trafficked

tier rating: Tier 2 Watch List—Tanzania does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; law enforcement made modest anti-trafficking efforts but imposed punishments on offenders that were inadequate for the seriousness of the crimes committed; key victim protection provisions of the 2008 anti-trafficking act remain unimplemented; the government continues to refer child trafficking victims to NGOs for care but has no procedure for the referral of adult victims; the national anti-trafficking action plan has not been implemented; no public awareness campaigns about the dangers of trafficking are conducted (2013)

Illicit drugs: targeted by traffickers moving hashish, Afghan heroin, and South American cocaine transported down the East African coastline, through airports, or overland through Central Africa; Zanzibar likely used by traffickers for drug smuggling; traffickers in the past have recruited Tanzanian couriers to move drugs through Iran into East Asia

THAILAND

INTRODUCTION

Background: A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US treaty ally in 1954 after sending troops to Korea and later fighting alongside the United States in Vietnam. Thailand since 2005 has experienced several rounds of political turmoil including a military coup in 2006 that ousted then Prime Minister THAKSIN Chinnawat, followed by large-scale street protests by competing political factions in 2008, 2009, and 2010. Demonstrations in 2010 culminated with clashes between security forces and pro-THAKSIN protesters, elements of which were armed, and resulted in at least 92 deaths and an estimated \$1.5 billion in arson-related property losses. THAKSIN's youngest sister, YINGLAK Chinnawat, in 2011 led the Puea Thai Party to an electoral win and assumed control of the government. YINGLAK's leadership was almost immediately challenged by historic flooding in late 2011 that had large swathes of the country underwater and threatened to inundate Bangkok itself. A blanket amnesty bill for individuals involved in street protests, altered at the last minute to include all political crimes—including all convictions against THAKSIN—triggered large protests in Bangkok. In late 2013 demonstrations led by former opposition deputy leader SUTHEP Thaugsuban called for the establishment of an unelected “people's council” to replace YINGLUCK's government and reform the Thai political system. YINGLUCK dissolved parliament in December 2013 and proposed a new election for February 2014. Thailand's Constitutional Court invalidated the election in March 2014 on grounds that it was not completed within one day throughout the nation. Thailand has also experienced violence associated with the ethno-nationalist insurgency in Thailand's southern Malay-Muslim majority provinces. Since January 2004, thousands have been killed and wounded in the insurgency.

Flag description: five horizontal bands of red (top), white, blue (double width), white, and red; the red color symbolizes the nation and the blood of life; white represents religion and the purity of Buddhism; blue stands for the monarchy

note: similar to the flag of Costa Rica but with the blue and red colors reversed

National symbol(s): garuda (mythical half-man, half-bird figure); elephant

National anthem: *name:* “Phleng Chat Thai” (National Anthem of Thailand)

lyrics/music: Luang SARANUPRAPAN/Phra JENDURIYANG

note: music adopted 1932, lyrics adopted 1939; by law, people are required to stand for the national anthem at 0800 and 1800 every day; the anthem is played in schools, offices, theaters, and on television and radio during this time; “Phleng Sansaoen Phra Barami” (A Salute to the Monarch) serves as the royal anthem and is played in the presence of the royal family and during certain state ceremonies

ECONOMY

Economy—overview: With a well-developed infrastructure, a free-enterprise economy, generally pro-investment policies, and strong export industries, Thailand achieved steady growth due largely to industrial and agriculture exports - mostly electronics, agricultural commodities, automobiles and parts, and processed foods. Unemployment, at less than 1% of the labor force, stands as one of the lowest levels in the world, which puts upward pressure on wages in some industries. Thailand also attracts nearly 2.5 million migrant workers from neighboring countries. The Thai government in 2013 implemented a nation-wide 300 baht (\$10) per day minimum wage policy and deployed new tax reforms designed to lower rates on middle-income earners. The Thai economy has weathered internal and external economic shocks in recent years. The global economic recession severely cut Thailand’s exports, with most sectors experiencing double-digit drops. In late 2011 Thailand’s recovery was interrupted by historic flooding in the industrial areas in Bangkok and its five surrounding provinces, crippling the manufacturing sector. The government approved flood mitigation projects worth \$11.7 billion, which were started in 2012, to prevent similar economic damage, and an additional \$75 billion for infrastructure over the following seven years. This was expected to lead to an economic upsurge but growth has remained slow, in part due to ongoing

political unrest and resulting uncertainties. Spending on infrastructure will require re-approval once a new government is seated.

TRANSNATIONAL ISSUES

Disputes—international: separatist violence in Thailand's predominantly Malay-Muslim southern provinces prompt border closures and controls with Malaysia to stem insurgent activities; Southeast Asian states have enhanced border surveillance to check the spread of avian flu; talks continue on completion of demarcation with Laos but disputes remain over

several islands in the Mekong River; despite continuing border committee talks, Thailand must deal with Karen and other ethnic rebels, refugees, and illegal cross-border activities; Cambodia and Thailand dispute sections of boundary; in 2011 Thailand and Cambodia resorted to arms in the dispute over the location of the boundary on the precipice surmounted by Preah Vihear temple ruins, awarded to Cambodia by ICJ decision in 1962 and part of a planned UN World Heritage site; Thailand is studying the feasibility of jointly constructing the Hatgyi Dam on the Salween river near the border with Burma; in 2004, international environmentalist pressure prompted China to halt construction of 13 dams on the Salween River that flows through China, Burma, and Thailand; 140,000 mostly Karen refugees fleeing civil strife, political upheaval and economic stagnation in Burma live in remote camps in Thailand near the border

Refugees and internally displaced persons:

refugees (country of origin): 83,317 (Burma) (2012)

IDPs: undetermined (resurgence in ethno-nationalist violence in south of country since 2004) (2011)

stateless persons: 506,197 (2012); note—about half of Thailand's northern hill tribe people do not have citizenship and make up the bulk of Thailand's stateless population; most lack documentation showing they or one of their parents were born in Thailand; children born to Burmese refugees are not eligible for Burmese or Thai citizenship and are stateless; most Chao Lay, maritime nomadic peoples, who travel from island to island in the Andaman Sea west of Thailand are also stateless; stateless Rohingya refugees from Burma are considered illegal migrants by Thai authorities and are detained in inhumane conditions or expelled; stateless persons are denied access to voting, property, education, employment, healthcare, and driving

Trafficking in persons: *current situation:* Thailand is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; victims, who are most often from neighboring countries, especially Burma, and also China, Vietnam, Russia, Uzbekistan, and Fiji, migrate to Thailand in search of economic opportunities but are forced, coerced, or defrauded into labor or commercial sexual exploitation; forced laborers are exploited in fishing, low-end garment production, domestic service, and some are forced to beg; some men forced to work on fishing boats have reportedly been kept at sea for years; sex trafficking of Thai and migrant children and sex tourism remain significant problems; Thailand is a transit country for victims from North Korea, China, Vietnam, Pakistan, and Burma destined for exploitation in third countries, including Malaysia,

Indonesia, Singapore, Russia, the Republic of Korea, the US, and Western European countries tier rating: Tier 2 Watch List—Thailand does not fully comply with the minimum standards for the elimination of trafficking; the government investigated more trafficking-related cases but prosecuted and convicted fewer trafficking offender in 2012 than it did in the previous year; widespread corruption among law enforcement personnel creates an enabling environment for human trafficking; local authorities lack an awareness of the elements of trafficking and are deficient at identifying and protecting victims; weak law enforcement, inadequate human and financial resources, and fragmented coordination among regulatory agencies in the fishing industry contributes to overall impunity for exploitive labor practices in this sector; no labor recruitment companies have been punished for forced labor or trafficking allegations (2013)

Illicit drugs: a minor producer of opium, heroin, and marijuana; transit point for illicit heroin en route to the international drug market from Burma and Laos; eradication efforts have reduced the area of cannabis cultivation and shifted some production to neighboring countries; opium poppy cultivation has been reduced by eradication efforts; also a drug money-laundering center; minor role in methamphetamine production for regional consumption; major consumer of methamphetamine since the 1990s despite a series of government crackdowns

TIMOR-LESTE

INTRODUCTION

Background: The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied Portuguese Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November 1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of Timor Timur (East Timor). An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 individuals lost their lives.

On 30 August 1999, in a UN-supervised popular referendum, an overwhelming majority of the people of Timor-Leste voted for independence from Indonesia. However, in the next three weeks, anti-independence Timorese militias—organized and supported by the Indonesian military—commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forcibly pushed 300,000 people into western Timor as refugees. Most of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly 100% of the country's electrical grid were destroyed. On 20 September 1999, Australian-led peacekeeping troops deployed to the country and brought the violence to an end. On 20 May 2002, Timor-Leste was internationally recognized as an independent state. In 2006, internal tensions threatened the new nation's security when a military strike led to violence and a breakdown of law and order. At Dili's request, an Australian-led International Stabilization Force (ISF) deployed to Timor-Leste, and the UN Security Council established the UN Integrated Mission in Timor-Leste (UNMIT), which included an authorized police presence of over 1,600 personnel. The ISF and UNMIT restored stability, allowing for presidential and parliamentary elections in 2007 in a largely peaceful atmosphere. In February 2008, a rebel group staged an unsuccessful attack against the president and prime minister. The ringleader was killed in the attack, and most of the rebels surrendered in April 2008. Since the attack, the government has enjoyed one of its longest periods of post-independence stability, including successful 2012 elections for both the parliament and president. In late 2012, the UN Security Council voted to end its peacekeeping mission in Timor-Leste and both the ISF and UNMIT departed the country by the end of the year.

note: adopted 2002; the song was first used as an anthem when Timor-Leste declared its independence from Portugal in 1975; the lyricist, Francisco Borja DA COSTA, was killed in the Indonesian invasion just days after independence was declared

ECONOMY

Economy—overview: Since its 1999 independence, Timor-Leste has faced great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in offshore waters has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs for the unemployed in part because there are no production facilities in Timor-Leste. Gas is piped to Australia. In June 2005, the National Parliament unanimously approved the creation of a Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of US\$9.3 billion as of December 2011. The economy continues to recover from the mid-2006 outbreak of violence and civil unrest, which disrupted both private and public sector economic activity. Government spending increased markedly from 2009 through 2012, primarily on basic infrastructure, including electricity and roads. Limited experience in procurement and infrastructure building has hampered these projects. The underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty. On the strength of its oil-wealth, the economy has achieved real growth between 8-12% per year for the last several years, among the highest sustained growth rates in the world.

TOGO

INTRODUCTION

Background: French Togoland became Togo in 1960. Gen. Gnassingbe EYADEMA, installed as military ruler in 1967, ruled Togo with a heavy hand for almost four decades. Despite the facade of multi-party elections instituted in the early 1990s, the government was largely dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has maintained power almost continually since 1967 and maintains a majority of seats in today's legislature. Upon EYADEMA's death in February 2005, the military installed the president's son, Faure GNASSINGBE, and then engineered his formal election two months later. Democratic gains since then allowed Togo to hold its first relatively free and fair legislative elections in October 2007. After years of political unrest and condemnation from

international organizations for human rights abuses, Togo is finally being re-welcomed into the international community.

ECONOMY

Economy—overview: This small, sub-Saharan economy depends heavily on both commercial and subsistence agriculture, which provides employment for a significant share of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings with cotton being the most important cash crop. Togo is among the world's largest producers of phosphate and Togo seeks to develop its carbonate phosphate reserves. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on follow through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors. Foreign direct investment inflows have slowed over recent years. Togo completed its IMF Extended Credit Facility in 2011 and reached a HIPC debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Togo continues to work with the IMF on structural reforms.

TOKELAU

INTRODUCTION

Background: Originally settled by Polynesian emigrants from surrounding island groups, the Tokelau Islands were made a British protectorate in 1889. They were transferred to New Zealand administration in 1925. Referenda held in 2006 and 2007 to change the status of the islands from that of a New Zealand territory to one of free association with New Zealand did not meet the needed threshold for approval.

National symbol(s): tuluma (fishing tackle box)

National anthem: *name:* “Te Atua” (For the Almighty)

lyrics/music: unknown/Falani KALOLO

note: adopted 2008; in preparation for eventual self governance, Tokelau held a national contest to choose an anthem; as a territory of New Zealand, “God Defend New Zealand” and “God Save the Queen” are official (see New Zealand)

ECONOMY

Economy—overview: Tokelau’s small size (three villages), isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The people rely heavily on aid from New Zealand—about \$10 million annually in 2008 and 2009—to maintain public services. New Zealand’s support amounts to 80% of Tokelau’s recurrent government budget. An international trust fund, currently worth nearly US \$32 million, was established in 2004 to provide Tokelau an independent source of revenue. The principal sources of revenue come from sales of copra, postage stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

TONGA

INTRODUCTION

Background: Tonga—unique among Pacific nations—never completely lost its indigenous governance. The archipelagos of “The Friendly Islands” were united into a Polynesian kingdom in 1845. Tonga became a constitutional monarchy in 1875 and a British protectorate in 1900; it withdrew from the protectorate and joined the Commonwealth of Nations in 1970. Tonga remains the only monarchy in the Pacific.

ECONOMY

Economy—overview: Tonga has a small, open, South Pacific island economy. It has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 39,000 visitors in 2006. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well developed social services. High unemployment among the young, moderate inflation, pressures for democratic reform, and rising civil service expenditures are major issues facing the government.

TRINIDAD AND TOBAGO

INTRODUCTION

Background: First colonized by the Spanish, the islands came under British control in the early 19th century. The islands' sugar industry was hurt by the emancipation of the slaves in 1834. Manpower was replaced with the importation of contract laborers from India between 1845 and 1917, which boosted sugar production as well as the cocoa industry. The discovery of oil on Trinidad in 1910 added another important export. Independence was attained in 1962. The country is one of the most prosperous in the Caribbean thanks largely to petroleum and natural gas production and processing. Tourism, mostly in Tobago, is targeted for expansion and is growing. The government is coping with a rise in violent crime.

ECONOMY

Economy—overview: Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses and has one of the highest per capita incomes in Latin America. Economic growth; between 2000 and 2007 averaged slightly over 8%, significantly above the regional average of about 3.7% for that same period; however, GDP; has slowed down since then and contracted during 2009-2011 due to depressed natural gas prices and changing markets. Growth had been; fueled by investments in liquefied natural gas, petrochemicals, and steel with additional upstream and downstream investment planned.; Trinidad and Tobago is the leading Caribbean producer of oil and gas, and its economy is heavily dependent upon these resources but it also; supplies manufactured goods, notably food products and beverages, as well as cement to the Caribbean region. Oil and gas account for; about 40% of GDP and 80% of exports, but only 5% of employment. Oil; production has declined over the last decade as the country focused; the majority of its efforts on natural gas. However, declining reserves, lack of government investment in the sector, and the changing global; gas market raises concern for the long-term growth of the country's; energy sector. Although Trinidad and Tobago enjoys cheap electricity; from natural gas, the renewable energy sector has recently garnered; increased interest. The country is also a regional financial center with; a well-regulated and stable financial system. Other sectors the; Government of Trinidad and Tobago targeted for increased; investment and projected growth include tourism, agriculture, information and communications technology, and shipping. The; economy benefits from a

growing trade surplus with the US. The US is; Trinidad and Tobago's leading trade partner. The previous MANNING; administration benefited from fiscal surpluses fueled by the dynamic; export sector; however, declines in oil and gas prices have reduced; government revenues, challenging the current government's; commitment to maintaining high levels of public investment. Crime; and bureaucratic hurdles continue to be the biggest deterrents for; attracting more foreign direct investment and business. The; government's 2013 budget aims to boost revenue through increased; taxation and competitiveness.

TRANSNATIONAL ISSUES

Disputes—international: Barbados and Trinidad and Tobago abide by the April 2006 Permanent Court of Arbitration decision delimiting a maritime boundary and limiting catches of flying fish in Trinidad and Tobago's exclusive economic zone; in 2005, Barbados and Trinidad and Tobago agreed to compulsory international arbitration under United Nations Convention on the Law of the Sea challenging whether the northern limit of Trinidad and Tobago's and Venezuela's maritime boundary extends into Barbadian waters; Guyana has also expressed its intention to include itself in the arbitration as the Trinidad and Tobago-Venezuela maritime boundary may extend into its waters as well

Trafficking in persons: *current situation:* Trinidad and Tobago is a destination and transit country for adults and children subjected to sex trafficking and adults subjected to forced labor; local victims have been trafficked to the US and the UK for sexual exploitation, while women and girls from South America and the Dominican Republic have been subjected to sex trafficking in Trinidad and Tobago's brothels and clubs; some economic migrants from the Caribbean region and Asia have had their passports held and experienced forced labor conditions; children are vulnerable to forced labor, including scavenging trash; the country is a potential transit point for human trafficking to Caribbean and South American destinations

tier rating: Tier 2 Watch List—Trinidad and Tobago does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2013, the government proclaimed its anti-trafficking law and established a counter-trafficking unit, but authorities did not use the law to its full effect; despite victim protections in the new law, the government has failed to properly screen and protect hundreds of potential trafficking victims; the reported complicity of public officials in trafficking offenses is also an obstacle (2013)

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; producer of cannabis

TUNISIA

INTRODUCTION

Background: Rivalry between French and Italian interests in Tunisia culminated in a French invasion in 1881 and the creation of a protectorate. Agitation for independence in the decades following World War I was finally successful in getting the French to recognize Tunisia as an independent state in 1956. The country's first president, Habib BOURGUIBA, established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In November 1987, BOURGUIBA was removed from office and replaced by Zine el Abidine BEN ALI in a bloodless coup. Street protests that began in Tunis in December 2010 over high unemployment, corruption, widespread poverty, and high food prices escalated in January 2011, culminating in rioting that led to hundreds of deaths. On 14 January 2011, the same day BEN ALI dismissed the government, he fled the country, and by late January 2011, a "national unity government" was formed. Elections for the new Constituent Assembly were held in late October 2011, and in December, it elected human rights activist Moncef MARZOUKI as interim president. The Assembly began drafting a new constitution in February 2012 and, after several iterations and a months-long political crisis that stalled the transition, ratified the document in January 2014. Presidential and parliamentary elections for a permanent government could be held by the end of 2014.

ECONOMY

Economy—overview: Tunisia's diverse, market-oriented economy has long been cited as a success story in Africa and the Middle East, but it faces an array of challenges during the country's ongoing political transition. Following an ill-fated experiment with socialist economic policies in the 1960s, Tunisia embarked on a successful strategy focused on bolstering exports, foreign investment, and tourism, all of which have become central to the country's economy. Key exports now include textiles and apparel, food products, petroleum products, chemicals, and phosphates, with about 80% of exports bound for Tunisia's main economic partner, the European Union. Tunisia's liberal strategy, coupled with investments in education and infrastructure, fueled decades of 4-5% annual GDP growth and improving living standards. Former President (1987-2011) Zine el Abidine BEN ALI continued these policies, but as his reign wore on cronyism and corruption stymied economic performance and unemployment rose among the country's growing ranks of university graduates. These grievances contributed to the January 2011 overthrow of BEN ALI, sending Tunisia's economy into a tailspin as tourism and investment declined sharply. During 2012 and 2013, the Tunisian Government's focus on the political transition led to a neglect of the economy that resulted in several downgrades of Tunisia's credit rating. As the economy recovers, Tunisia's government faces challenges reassuring businesses and investors, bringing budget and current account deficits under control, shoring up the country's financial system, bringing down high unemployment, and reducing economic disparities between the more developed coastal region and the impoverished interior.

TRANSNATIONAL ISSUES

Disputes—international: none

Trafficking in persons: *current situation:* Tunisia is a source, destination, and possible transit country for men, women, and children subjected to forced labor and sex trafficking; Tunisia's increased number of street children, children working to support their families, and migrants who have fled unrest in neighboring countries are vulnerable to human trafficking; Tunisian women recruited into Lebanon's entertainment industry are forced into prostitution on arrival and other Tunisian women are forced into prostitution in Jordan; some Tunisian girls employed in domestic work are held in conditions of forced labor

tier rating: Tier 2 Watch List—Tunisia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government continues to maintain that human trafficking is not a widespread problem in Tunisia, which undermines awareness campaigns and does not differentiate human trafficking from migrant smuggling; prior commitments to enact draft anti-trafficking legislation were not fulfilled, and the government has not developed or implemented procedures to identify proactively trafficking victims; the government has assisted an unidentified number of trafficking victims in its shelters for vulnerable groups (2013)

TURKEY

INTRODUCTION

Background: Modern Turkey was founded in 1923 from the Anatolian remnants of the defeated Ottoman Empire by national hero Mustafa KEMAL, who was later honored with the title Atatürk or “Father of the Turks.” Under his leadership, the country adopted wide-ranging social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democratic Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and intermittent military coups (1960, 1971, 1980), which in each case eventually resulted in a return of political power to civilians. In 1997, the military again helped engineer the ouster—popularly dubbed a “post-modern coup”—of the then Islamic-oriented government. Turkey intervened militarily on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the “Turkish Republic of Northern Cyprus,” which only Turkey recognizes. A separatist insurgency begun in 1984 by the Kurdistan Workers’ Party (PKK)—now known as the Kurdistan People’s Congress or Kongra-Gel (KGK)—has dominated the Turkish military’s attention and claimed more than 30,000 lives. After the capture of the group’s leader in 1999, the insurgents largely withdrew from

Turkey mainly to northern Iraq. In 2013, KGK and the Turkish Government agreed to a ceasefire that continues despite slow progress in ongoing peace talks. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1964, Turkey became an associate member of the European Community. Over the past decade, it has undertaken many reforms to strengthen its democracy and economy; it began accession membership talks with the European Union in 2005.

ECONOMY

Economy—overview: Turkey’s largely free-market economy is increasingly driven by its industry and service sectors, although its traditional agriculture sector still accounts for about 25% of employment. An aggressive privatization program has reduced state involvement in basic industry, banking, transport, and communication, and an emerging cadre of middle-class entrepreneurs is adding dynamism to the economy and expanding production beyond the traditional textiles and clothing sectors. The automotive, construction, and electronics industries, are rising in importance and have surpassed textiles within Turkey’s export mix. Oil began to flow through the Baku-Tbilisi-Ceyhan pipeline in May 2006, marking a major milestone that will bring up to 1 million barrels per day from the Caspian to market. Several gas pipelines projects also are moving forward to help transport Central Asian gas to Europe through Turkey, which over the long term will help address Turkey’s dependence on imported oil and gas to meet 97% of its energy needs. After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and

fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth—averaging more than 6% annually until 2008. Global economic conditions and tighter fiscal policy caused GDP to contract in 2009, but Turkey's well-regulated financial markets and banking system helped the country weather the global financial crisis and GDP rebounded strongly to around 9% in 2010-11, as exports returned to normal levels following the recession. Growth dropped to roughly 3% in 2012-13. Turkey's public sector debt to GDP ratio has fallen below 40%, and at least one rating agency upgraded Turkey's debt to investment grade in 2012. Turkey remains dependent on often volatile, short-term investment to finance its large trade deficit. The stock value of FDI reached nearly \$195 billion at year-end 2013, reflecting Turkey's good growth even in the face of economic turmoil in Europe, the source of much of Turkey's FDI. Turkey's relatively high current account deficit, uncertainty related to monetary policy-making, and political turmoil within Turkey's neighborhood leave the economy vulnerable to destabilizing shifts in investor confidence.

Military—note: the ruling Justice and Development Party (AKP) has actively pursued the goal of asserting civilian control over the military since first taking power in 2002; the Turkish Armed Forces (TSK) role in internal security has been significantly reduced; the TSK leadership continues to be an influential institution within Turkey, but plays a much smaller role in politics; the Turkish military remains focused on the threats emanating from the Syrian civil war, Russia's actions in Ukraine, and the PKK insurgency; primary domestic threats are listed as fundamentalism (with the definition in some dispute with the civilian government), separatism (Kurdish discontent), and the extreme left wing; Ankara strongly opposed establishment of an autonomous Kurdish region in Iraq; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the "Force 2014" program is to produce 20-30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peacekeeping responsibilities including in Afghanistan; the Turkish Navy is a regional naval power that wants to develop the capability to project power beyond Turkey's coastal waters; the Navy is heavily involved in NATO, multinational, and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an "Aerospace and Missile Defense Concept" in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system;

Turkey is a NATO ally and hosts NATO's Land Forces Command in Izmir, as well as the AN/TPY-2 radar as part of NATO Missile Defense (2008)

TRANSNATIONAL ISSUES

Disputes—international: complex maritime, air, and territorial disputes with Greece in the Aegean Sea; status of north Cyprus question remains; Syria and Iraq protest Turkish hydrological projects to control upper Euphrates waters; Turkey has expressed concern over the status of Kurds in Iraq; in 2009, Swiss mediators facilitated an accord reestablishing diplomatic ties between Armenia and Turkey, but neither side has ratified the agreement and the rapprochement effort has faltered; Turkish authorities have complained that blasting from quarries in Armenia might be damaging the medieval ruins of Ani, on the other side of the Arpacay valley;

Refugees and internally displaced persons:

refugees (country of origin): 11,322 (Iraq) (2012); 714,552 (Syria) (2014)

IDPs: at least 954,000-1.2 million (displaced from 1984-2005 because of fighting between Kurdish PKK and Turkish military; most IDPs are Kurds from eastern and southeastern provinces; no information available on persons displaced by development projects) (2012)

stateless persons: 780 (2012)

Illicit drugs: key transit route for Southwest Asian heroin to Western Europe and, to a lesser extent, the US—via air, land, and sea routes; major Turkish and other international trafficking organizations operate out of Istanbul; laboratories to convert imported morphine base into heroin exist in remote regions of Turkey and near Istanbul; government maintains strict controls over areas of legal opium poppy cultivation and over output of poppy straw concentrate; lax enforcement of money-laundering controls

TURKMENISTAN

INTRODUCTION

Background: Present-day Turkmenistan covers territory that has been at the crossroads of civilizations for centuries. The area was ruled in antiquity by various Persian empires, and was conquered by Alexander the Great, Muslim crusaders, the Mongols, Turkic warriors, and eventually the Russians. In medieval times Merv (today known as Mary) was one of the great cities of the Islamic world and an important stop on the Silk Road. Annexed by Russia in the late 1800s, Turkmenistan later figured prominently in the anti-Bolshevik movement in Central Asia. In 1924, Turkmenistan became a Soviet republic; it achieved independence upon the dissolution of the USSR in 1991. Extensive hydrocarbon/natural gas reserves, which have yet to be fully exploited, have begun to transform the

country. Turkmenistan is moving to expand its extraction and delivery projects. The Government of Turkmenistan is actively working to diversify its gas export routes beyond the still important Russian pipeline network. In 2010, new gas export pipelines that carry Turkmen gas to China and to northern Iran began operating, effectively ending the Russian monopoly on Turkmen gas exports. President for Life Saparmurat NYIAZOW died in December 2006, and Turkmenistan held its first multi-candidate presidential election in February 2007. Gurbanguly BERDIMUHAMEDOW, a deputy cabinet chairman under NYIAZOW, emerged as the country's new president; he was chosen as president again in February 2012, in an election that the OSCE said lacked the freedoms necessary to create a competitive environment.

ECONOMY

Economy—overview: Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and sizeable gas and oil resources. The two largest crops are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for roughly 7% of GDP, it continues to employ nearly half of the country’s workforce. Turkmenistan’s authoritarian regime has taken a cautious approach to economic reform, hoping to use gas and cotton export revenues to sustain its inefficient and highly corrupt economy. The government introduced a privatization plan in 2012, but the implementation of this initiative has been slow. Privatization goals remain limited. From 1998-2005, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by an average of roughly 15% per year from 2003-08, largely because of higher international oil and gas prices. Additional pipelines to China, that began operation in early 2010, and increased pipeline capacity to Iran, have expanded Turkmenistan’s export routes for its gas. Overall prospects in the near future are discouraging because of endemic corruption, a poor educational system, government misuse of oil and gas revenues, and Ashgabat’s reluctance to adopt market-oriented reforms. The majority of Turkmenistan’s economic statistics are state secrets. The present government established a State

Agency for Statistics, but GDP numbers and other publicized figures are subject to wide margins of error. In particular, the rate of GDP growth is uncertain. Since his election, President BERDIMUHAMEDOW unified the country's dual currency exchange rate, ordered the redenomination of the manat, reduced state subsidies for gasoline, and initiated development of a special tourism zone on the Caspian Sea. Although foreign investment is encouraged, and some improvements in macroeconomic policy have been made, numerous bureaucratic obstacles impede international business activity.

country comparison to the world: 94

Telephones—mobile cellular: 3.953 million (2012)

country comparison to the world: 123

Telephone system: *general assessment:* telecommunications network remains underdeveloped and progress toward improvement is slow; strict government control and censorship inhibits liberalization and modernization

domestic: Turkmentelekom, in cooperation with foreign partners, has installed high-speed fiber-optic lines and has upgraded most of the country's telephone exchanges and switching centers with new digital technology; combined fixed-line and mobile teledensity is about 80 per 100 persons; Russia's Mobile Telesystems, the only foreign mobile-cellular service provider in Turkmenistan, had its operating license suspended in December 2010 but was able to resume operations in September 2012;

Turkmenistan's first telecommunication satellite is scheduled to be launched by the end of 2014; once in orbit, it is expected that the satellite will greatly improve connectivity in the country

international: country code—993; linked by fiber-optic cable and microwave radio relay to other CIS republics and to other countries by leased connections to the Moscow international gateway switch; an exchange in Ashgabat switches international traffic through Turkey via Intelsat; satellite earth stations—1 Orbita and 1 Intelsat (2012)

Broadcast media: broadcast media is government controlled and censored; 7 state-owned TV and 4 state-owned radio networks; satellite dishes and programming provide an alternative to the state-run media; officials sometimes limit access to satellite TV by removing satellite dishes (2007)

TRANSNATIONAL ISSUES

Disputes—international: cotton monoculture in Uzbekistan and Turkmenistan creates water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2005, but Caspian seabed delimitation remains stalled with Azerbaijan, Iran, and Kazakhstan due to Turkmenistan's indecision over how to allocate the sea's waters and seabed; bilateral talks continue with Azerbaijan on dividing the

seabed and contested oilfields in the middle of the Caspian

Refugees and internally displaced persons:

stateless persons: 8,947 (2012)

Trafficking in persons: *current situation*: Turkmenistan is a source, and to a much lesser degree, destination country for men, women, and children subjected to forced labor and sex trafficking; Turkmen in search of work in other countries are forced to work in textile sweatshops, construction, and domestic service; some Turkmen women and girls are sex trafficked abroad; Turkey is the primary trafficking destination, followed by Russia, the United Arab Emirates, and, to a lesser extent, the UK, Kazakhstan, and Cyprus; labor trafficking occurs within Turkmenistan, particularly in the construction industry, with victims identified from Uzbekistan, Ukraine, and Azerbaijan

tier rating: Tier 2 Watch List—Turkmenistan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government continues to convict trafficking offenders under its anti-trafficking statute; it employs no formal victim identification procedures and does not provide services or fund NGOs to provide services to victims; authorities punish some victims for crimes committed as a result of being trafficked; there continues to be no governmental coordinating body for anti-trafficking efforts or a national anti-trafficking action plan (2013)

Illicit drugs: transit country for Afghan narcotics bound for Russian and Western European markets; transit point for heroin precursor chemicals bound for Afghanistan

TURKS AND CAICOS ISLANDS

INTRODUCTION

Background: The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory.

TUVALU

INTRODUCTION

Background: In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name “.tv” for \$50 million in royalties over a 12-year period.

GEOGRAPHY

Irrigated land: NA

Natural hazards: severe tropical storms are usually rare, but in 1997 there were three cyclones; low levels of islands make them sensitive to changes in sea level

Environment—current issues: since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which

threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Environment—international agreements:

party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Law of the Sea, Ozone Layer Protection, Ship Pollution, Whaling

signed, but not ratified: none of the selected agreements

Geography—note: one of the smallest and most remote countries on Earth; six of the nine coral atolls—Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and Nukulaelae—have lagoons open to the ocean; Nanumaya and Niutao have landlocked lagoons; Niulakita does not have a lagoon

ECONOMY

Economy—overview: Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. Only eight of the atolls are inhabited. The country has no known mineral resources and few exports and is almost entirely dependent upon imported food and fuel. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Job opportunities are scarce and public sector workers make up most of those employed. About 15% of the adult male population work as seamen on merchant ships abroad, and remittances are a vital source of income contributing around \$2 million in 2007. Substantial income is received annually from the Tuvalu Trust Fund (TTF) an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this fund grew from an initial \$17 million to an estimated value of \$77 million in 2006. The TTF contributed nearly \$9 million towards the government budget in 2006 and is an important cushion for meeting shortfalls in the government's budget. The US Government is also a major revenue source for Tuvalu because of payments from a 1988 treaty on fisheries. In an effort to ensure financial stability and sustainability, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts. Tuvalu also derives royalties from the lease of its ".tv" Internet domain name with revenue of more than \$2 million in 2006. A minor source of government revenue comes from the sale of stamps and coins. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and income from overseas investments. Growing income disparities and the vulnerability of the country to climatic change are among leading concerns for the nation.

UGANDA

INTRODUCTION

Background: The colonial boundaries created by Britain to delimit Uganda grouped together a wide range of ethnic groups with different political systems and cultures. These differences prevented the establishment of a working political community after independence was achieved in 1962. The dictatorial regime of Idi AMIN (1971-79) was responsible for the deaths of

some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980-85) claimed at least another 100,000 lives. The rule of Yoweri MUSEVENI since 1986 has brought relative stability and economic growth to Uganda. A constitutional referendum in 2005 cancelled a 19-year ban on multi-party politics.

ECONOMY

Economy—overview: Uganda has substantial natural resources, including fertile soils, regular rainfall, small deposits of copper, gold, and other minerals, and recently discovered oil. Uganda has never conducted a

national minerals survey. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government—with the support of foreign countries and international agencies—has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. Since 1990 economic reforms ushered in an era of solid economic growth based on continued investment in infrastructure, improved incentives for production and exports, lower inflation, better domestic security, and the return of exiled Indian-Ugandan entrepreneurs. The global economic downturn hurt Uganda's exports; however, Uganda's GDP growth has largely recovered due to past reforms and sound management of the downturn. Oil revenues and taxes will become a larger source of government funding as oil comes on line in the next few years. Instability in South Sudan is a risk for the Ugandan economy because Uganda's main export partner is Sudan, and Uganda is a key destination for Sudanese refugees. Unreliable power, high energy costs, inadequate transportation infrastructure, and corruption inhibit economic development and investor confidence.

UKRAINE

INTRODUCTION

Background: Ukraine was the center of the first eastern Slavic state, Kyivan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kyivan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kyivan Rus laid the foundation for Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse of czarist Russia in 1917, Ukraine was able to achieve a short-lived period of independence (1917-20), but was reconquered and forced to endure a brutal Soviet rule that engineered two forced famines (1921-22 and 1932-33) in which over 8 million died. In World War II, German and Soviet armies were responsible for some 7 to 8 million more deaths. Although final independence for Ukraine was achieved in 1991 with the dissolution of the USSR, democracy and prosperity remained elusive as the legacy of state

control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties. A peaceful mass protest “Orange Revolution” in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. Subsequent internal squabbles in the YUSHCHENKO camp allowed his rival Viktor YANUKOVYCH to stage a comeback in parliamentary (Rada) elections and to become prime minister in August of 2006, and to be elected president in February 2010. In October 2012, Ukraine held Rada elections, widely criticized by Western observers as flawed due to use of government resources to favor ruling party candidates, interference with media access, and harassment of opposition candidates. President YANUKOVYCH’s backtracking on a trade and cooperation agreement with the EU in November 2013—in favor of closer economic ties with Russia—led to a three-month protest occupation of Kyiv’s central square. The government’s eventual use of force to break up the protest camp in February 2014 led to all out pitched battles, scores of deaths, international condemnation, and the president’s abrupt departure to Russia. An interim government under Acting President Oleksandr TURCHYNOV has scheduled new presidential elections for 25 May 2014. On 1 March 2014, one week after the overthrow in Kyiv, Russian President PUTIN ordered the invasion of Ukraine’s Crimean Peninsula claiming the action was to protect ethnic Russians living there. On 16 March 2014, a “referendum” was held regarding the integration of Crimea into the Russian Federation. The “referendum” was condemned as illegitimate by the Ukrainian Government, the EU, the US, and the UN General Assembly. Russian forces now occupy Crimea and Russian authorities claim it as Russian territory. The Ukrainian Government asserts that Crimea remains part of Ukraine.

ECONOMY

Economy—overview: After Russia, the Ukrainian republic was the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Ukraine’s dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukraine depends on imports to meet about three-fourths of its annual oil and natural gas requirements and 100% of its nuclear fuel needs. After a two-week dispute that saw gas supplies cutoff to Europe, Ukraine agreed to 10-year gas supply and transit contracts with Russia in January

2009 that brought gas prices to “world” levels. The strict terms of the contracts have further hobbled Ukraine’s cash-strapped state gas company, Naftohaz. Outside institutions—particularly the IMF—have encouraged Ukraine to quicken the pace and scope of reforms to foster economic growth. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine’s large shadow economy, but more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework. Ukraine’s economy was buoyant despite political turmoil between the prime minister and president until mid-2008. The economy contracted nearly 15% in 2009, among the worst economic performances in the world. In April 2010, Ukraine negotiated a price discount on Russian gas imports in exchange for extending Russia’s lease on its naval base in Crimea. Movement toward an Association Agreement with the European Union, which would commit Ukraine to economic and financial reforms in exchange for preferential access to EU markets, was curtailed by the November 2013 decision of President YANUKOVYCH against signing this treaty. In response, on 17 December 2013 President YANUKOVYCH and President PUTIN concluded a financial assistance package containing \$15 billion in loans and lower gas prices. However, the end of the YANUKOVYCH government in February 2014 caused Russia to halt further funding. With the formation of an interim government in late February 2014, the international community began efforts to stabilize the Ukrainian economy, including a 27 March 2014 IMF assistance package of \$14-18 billion.

country comparison to the world: 19

Telephones—mobile cellular: 59.344 million (2012)

country comparison to the world: 22

Telephone system: *general assessment:* Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system

domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is rising and the domestic trunk system is being improved; about one-third of Ukraine's networks are digital and a majority of regional centers now have digital switching stations; improvements in local networks and local exchanges continue to lag; the mobile-cellular telephone system's expansion has slowed, largely due to saturation of the market which has reached 125 mobile phones per 100 people

international: country code—380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems (2010)

Broadcast media: Ukraine's state-controlled nationwide TV broadcast channel (UT1) and a number of privately owned TV networks provide basic TV coverage; multi-channel cable and satellite TV services are available; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; Ukraine's radio broadcast market, a mix of independent and state-owned networks, is comprised of some 300 stations (2007)

TRANSNATIONAL ISSUES

Disputes—international: 1997 boundary delimitation treaty with Belarus remains unratified due to unresolved financial claims, stalling demarcation and reducing border security; delimitation of land boundary with Russia is complete with preparations for demarcation underway; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and ongoing expert-level discussions; Moldova and Ukraine operate joint customs posts to monitor transit of people and commodities through Moldova's break-away Transnistria Region, which remains under the auspices of an Organization for Security and Cooperation in Europe-mandated peacekeeping mission comprised of Moldovan, Transnistrian, Russian, and Ukrainian troops; the ICJ ruled largely in favor of Romania in its dispute submitted in 2004 over Ukrainian-administered Zmiyinyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Refugees and internally displaced persons:

stateless persons: 35,000 (2012); note—citizens of the former USSR who were permanently resident in Ukraine were granted citizenship upon Ukraine's independence in 1991, but some missed this window of opportunity; people arriving after 1991, Crimean Tatars, ethnic Koreans, people with expired Soviet passports, and people with no documents have

difficulty acquiring Ukrainian citizenship; following the fall of the Soviet Union in 1989, thousands of Crimean Tatars and their descendants deported from Ukraine under the STALIN regime returned to their homeland, some being stateless and others holding the citizenship of Uzbekistan or other former Soviet republics; a 1998 bilateral agreement between Ukraine and Uzbekistan simplified the process of renouncing Uzbek citizenship and obtaining Ukrainian citizenship

Trafficking in persons: *current situation:* Ukraine is a source, transit, and, increasingly, destination country for men, women, and children subjected to forced labor and sex trafficking; Ukrainian victims are sex trafficked within Ukraine as well as in Russia, Poland, Iraq, Spain, Turkey, Cyprus, Seychelles, Portugal, the Czech Republic, Israel, Italy, the United Arab Emirates, Montenegro, UK, and Tunisia; foreigners from Moldova, Uzbekistan, Pakistan, Cameroon, and Azerbaijan are victims of labor trafficking in Ukraine; Ukrainian recruiters most often target Ukrainians from rural areas with limited job prospects by using fraud, coercion, and debt bondage

tier rating: Tier 2 Watch List—Ukraine does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government reduced its anti-trafficking law enforcement efforts in 2012; as a result of the dismantling of the specialized anti-trafficking police unit in 2011, the number of trafficking investigations, prosecutions, and convictions have decreased; fewer victims are identified and the national referral mechanism does not function effectively in many regions, resulting in few victims being granted victim status by the government; the government did not fund any anti-trafficking protection activities in 2012 and continues to rely on international donors to assist victims (2013)

Illicit drugs: limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

UNITED ARAB EMIRATES

INTRODUCTION

Background: The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states—Abu Dhabi, ‘Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn—merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra’s al Khaymah. The UAE’s per capita GDP is on par with those of leading West European nations. Its high oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region. For more than three decades, oil and global finance drove the UAE’s economy. However, in 2008-09, the confluence of falling oil prices, collapsing real estate prices, and the international banking crisis hit the UAE especially hard. The UAE has essentially avoided the “Arab Spring” unrest seen elsewhere in the Middle East, though in March 2011, political activists and intellectuals signed a petition calling for greater public participation in governance that was widely circulated on the Internet. In an effort to stem potential further unrest, the government announced a multi-year, \$1.6-billion infrastructure investment plan for the poorer northern emirates and aggressively pursued advocates of political reform.

ECONOMY

Economy—overview: The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP based on oil and gas output to 25%. Since the discovery of oil in the UAE more than 30 years ago, the country has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. In April 2004, the UAE signed a Trade and Investment Framework Agreement with Washington and in November 2004 agreed to undertake negotiations toward a Free Trade Agreement with the US; however, those talks have not moved forward. The country's Free Trade Zones—offering 100% foreign ownership and zero taxes—are helping to attract foreign investors. The global financial crisis, tight international credit, and deflated asset prices constricted the economy in 2009. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency. The UAE Central Bank and Abu Dhabi-based banks bought the largest shares. In December 2009 Dubai received an additional \$10 billion loan from the emirate of Abu Dhabi. Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges. The UAE's strategic plan for the next few years focuses on diversification and creating more opportunities for nationals through improved education and increased private sector employment.

Disputes—international: boundary agreement was signed and ratified with

Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves, but contents of the agreement and detailed maps showing the alignment have not been published; Iran and UAE dispute Tunb Islands and Abu Musa Island, which Iran occupies

Illicit drugs: the UAE is a drug transshipment point for traffickers given its proximity to Southwest Asian drug-producing countries; the UAE's position as a major financial center makes it vulnerable to money laundering; anti-money-laundering controls improving, but informal banking remains unregulated

UNITED KINGDOM

INTRODUCTION

Background: The United Kingdom has historically played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith in the 19th century, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two world wars and the Irish Republic's withdrawal from the union. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council and a founding member of NATO and the Commonwealth, the UK pursues a global approach to foreign policy. The UK is also an active member of the EU, although it chose to remain outside the Economic and Monetary Union. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999. The latter was suspended until May 2007 due to wrangling over the peace process, but devolution was fully completed in March 2010.

GEOGRAPHY

Location: Western Europe, islands—including the northern one-sixth of the island of Ireland—between the North Atlantic Ocean and the North Sea; northwest of France

Geographic coordinates: 54 00 N, 2 00 W

Map references: Europe

Area: *total:* 243,610 sq km

country comparison to the world: 80

land: 241,930 sq km

water: 1,680 sq km

note: includes Rockall and Shetland Islands

Area—comparative: twice the size of Pennsylvania; slightly smaller than Oregon

Land boundaries: *total:* 360 km

border countries: Ireland 360 km

Coastline: 12,429 km

Maritime claims: *territorial sea:* 12 nm

exclusive fishing zone: 200 nm

continental shelf: as defined in continental shelf orders or in accordance with agreed upon boundaries

Climate: temperate; moderated by prevailing southwest winds over the North Atlantic Current; more than one-half of the days are overcast

Terrain: mostly rugged hills and low mountains; level to rolling plains in east and southeast

Elevation extremes: *lowest point:* The Fens -4 m

highest point: Ben Nevis 1,343 m

Natural resources: coal, petroleum, natural gas, iron ore, lead, zinc, gold, tin, limestone, salt, clay, chalk, gypsum, potash, silica sand, slate, arable land

Land use: *arable land:* 24.88%

permanent crops: 0.18%

other: 74.93% (2011)

Irrigated land: 2,280 sq km (2005)

Total renewable water resources: 147 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): *total:* 13.03 cu km/yr (58%/33%/9%)

per capita: 213.2 cu m/yr (2008)

Natural hazards: winter windstorms; floods

Environment—current issues: continues to reduce greenhouse gas emissions (has met Kyoto Protocol target of a 12.5% reduction from 1990 levels and intends to meet the legally binding target and move toward a domestic goal of a 20% cut in emissions by 2010); by 2005 the government reduced the amount of industrial and commercial waste disposed of in landfill sites to 85% of 1998 levels and recycled or composted at least 25% of household waste, increasing to 33% by 2015

Environment—international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulfur 94, Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered

Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: lies near vital North Atlantic sea lanes; only 35 km from France and linked by tunnel under the English Channel; because of heavily indented coastline, no location is more than 125 km from tidal waters

Flag description: blue field with the red cross of Saint George (patron saint of England) edged in white superimposed on the diagonal red cross of Saint Patrick (patron saint of Ireland), which is superimposed on the diagonal white cross of Saint Andrew (patron saint of Scotland); properly known as the Union Flag, but commonly called the Union Jack; the design and colors (especially the Blue Ensign) have been the basis for a number of other flags including other Commonwealth countries and their constituent states or provinces, and British overseas territories

National symbol(s): lion (Britain in general); lion, Tudor rose (England); lion, unicorn, thistle (Scotland); dragon, daffodil, leek (Wales); harp, flax (Northern Ireland)

National anthem: *name:* “God Save the Queen”

lyrics/music: unknown

note: in use since 1745; by tradition, the song serves as both the national and royal anthem of the United Kingdom; it is known as either “God Save the Queen” or “God Save the King,” depending on the gender of the reigning monarch; it also serves as the royal anthem of many Commonwealth nations

ECONOMY

Economy—overview: The UK, a leading trading power and financial center, is the third largest economy in Europe after Germany and France. Over the past two decades, the government has greatly reduced public ownership. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil resources, but its oil and natural gas reserves are declining and the UK became a net importer of energy in 2005. Services, particularly banking, insurance, and business services, are key drivers of British GDP growth. Manufacturing, meanwhile, has declined in importance but still accounts for about 10% of economic output. After emerging from recession in 1992, Britain's economy enjoyed the longest period of expansion on record during which time growth outpaced most of Western Europe. In 2008, however, the global financial crisis hit the economy particularly hard, due to the importance of its financial sector. Falling home prices, high consumer debt, and the global economic slowdown compounded Britain's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN (Labour) government to implement a number of measures to stimulate the economy and stabilize the financial markets; these included nationalizing parts of the banking system, temporarily cutting taxes, suspending public sector borrowing rules, and moving forward public spending on capital projects. Facing burgeoning public deficits and debt levels, in 2010 the CAMERON-led coalition government (between Conservatives and Liberal Democrats) initiated a five-year austerity program, which aimed to lower London's budget deficit from about 11% of GDP in 2010 to nearly 1% by 2015. In November 2011, Chancellor of the Exchequer George OSBORNE announced additional austerity measures through 2017 largely due to the euro-zone debt crisis. The CAMERON government raised the value added tax from 17.5% to 20% in 2011. It has pledged to reduce the corporation tax rate to 21% by 2014. The Bank of England (BoE) implemented an asset purchase program of £375 billion (approximately \$605 billion) as of December 2013. During times of economic crisis, the BoE coordinates interest rate moves with the European Central Bank, but Britain remains outside the European Economic and Monetary Union (EMU). In 2012, weak consumer spending and subdued business investment weighed on the economy, however, in 2013 GDP grew 1.4%, accelerating unexpectedly in the second half of the year because of greater consumer spending and a recovering housing market. The budget

deficit is falling but remains high at nearly 7% and public debt has continued to increase.

UNITED STATES

INTRODUCTION

Background: Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65), in which a northern Union of states defeated a secessionist Confederacy of 11 southern slave states, and the Great Depression of the 1930s, an economic downturn during which about a quarter of the labor force lost its jobs. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation state. Since the end of World War II, the economy has achieved relatively steady growth, low unemployment and inflation, and rapid advances in technology.

GEOGRAPHY

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates: 38 00 N, 97 00 W

Map references: North America

Area: *total:* 9,826,675 sq km

country comparison to the world: 3

land: 9,161,966 sq km

water: 664,709 sq km

note: includes only the 50 states and District of Columbia

Area—comparative: about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; more than twice the size of the European Union

Land boundaries: *total:* 12,034 km

border countries: Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km

note: US Naval Base at Guantanamo Bay, Cuba is leased by the US and is part of Cuba; the base boundary is 28 km

Coastline: 19,924 km

Maritime claims: *territorial sea:* 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: not specified

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes: *lowest point:* Death Valley -86 m

highest point: Mount McKinley (Denali) 6,194 m (highest point in North America)

note: the peak of Mauna Kea (4,207 m above sea level) on the island of Hawaii rises about 10,200 m above the Pacific Ocean floor; by this measurement, it is the world's tallest mountain—higher than Mount Everest (8,850 m), which is recognized as the tallest mountain above sea level

Natural resources: coal, copper, lead, molybdenum, phosphates, rare earth elements, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

note: the US has the world's largest coal reserves with 491 billion short tons accounting for 27% of the world's total

Land use: *arable land:* 16.29%

permanent crops: 0.26%

other: 83.44% (2011)

Irrigated land: 266,440 sq km (2007)

Total renewable water resources: 3,069 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): *total:* 478.4 cu km/yr (14%/46%/40%)

per capita: 1,583 cu m/yr (2005)

Natural hazards: tsunamis; volcanoes; earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the Midwest and Southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

volcanism: volcanic activity in the Hawaiian Islands, Western Alaska, the Pacific Northwest, and in the Northern Mariana Islands; both Mauna Loa (elev. 4,170 m) in Hawaii and Mount Rainier (elev. 4,392 m) in Washington have been deemed Decade Volcanoes by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; Pavlof (elev. 2,519 m) is the most active volcano in Alaska's Aleutian Arc and poses a significant threat to air travel since the area constitutes a major flight path between North America and East Asia; St. Helens (elev. 2,549 m), famous for the devastating 1980 eruption, remains active today; numerous other historically active volcanoes exist, mostly concentrated in the

Aleutian arc and Hawaii; they include: in Alaska: Aniakchak, Augustine, Chiginagak, Fourpeaked, Iliamna, Katmai, Kupreanof, Martin, Novarupta, Redoubt, Spurr, Wrangell; in Hawaii: Trident, Ugashik-Peulik, Ukinrek Maars, Veniaminof; in the Northern Mariana Islands:

Anatahan; and in the Pacific Northwest: Mount Baker, Mount Hood

Environment—current issues: air pollution resulting in acid rain in both the US and Canada; large emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; limited

natural freshwater resources in much of the western part of the country require careful management; desertification

Environment—international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Climate Change, Desertification, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

signed, but not ratified: Air Pollution-Persistent Organic Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity, Climate Change-Kyoto Protocol, Hazardous Wastes

Geography—note: world's third-largest country by size (after Russia and Canada) and by population (after China and India); Mt. McKinley is highest point in North America and Death Valley the lowest point on the continent

Flag description: 13 equal horizontal stripes of red (top and bottom) alternating with white; there is a blue rectangle in the upper hoist-side corner bearing 50 small, white, five-pointed stars arranged in nine offset horizontal rows of six stars (top and bottom) alternating with rows of five stars; the 50 stars represent the 50 states, the 13 stripes represent the 13 original colonies; the blue stands for loyalty, devotion, truth, justice, and friendship; red symbolizes courage, zeal, and fervency, while white denotes purity and rectitude of conduct; commonly referred to by its nickname of Old Glory

note: the design and colors have been the basis for a number of other flags, including Chile, Liberia, Malaysia, and Puerto Rico

National symbol(s): bald eagle

National anthem: *name:* "The Star-Spangled Banner"

lyrics/music: Francis Scott KEY/John Stafford SMITH

note: adopted 1931; during the War of 1812, after witnessing the successful American defense of Fort McHenry in Baltimore following British naval bombardment, Francis Scott KEY wrote the lyrics to what would become the national anthem; the lyrics were set to the tune of “The Anacreontic Song”; only the first verse is sung

ECONOMY

Economy—overview: The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$49,800. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, they face higher barriers to enter their rivals’ home markets than foreign firms face entering US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a “two-tier labor market” in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. Since 1996, dividends and capital gains have grown faster than wages or any other category of after-tax income. Imported oil accounts for nearly 55% of US consumption. Crude oil prices doubled between 2001 and 2006, the year home prices peaked; higher gasoline prices ate into consumers’ budgets and many individuals fell behind in their mortgage payments. Oil prices climbed another 50% between 2006 and 2008, and bank foreclosures more than doubled in the same period. Besides dampening the housing market, soaring oil prices caused a drop in the value of the dollar and a deterioration in the US merchandise trade deficit, which peaked at \$840 billion in 2008. The sub-prime mortgage crisis, falling home prices, investment bank failures, tight credit, and the global economic downturn pushed the United States into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, in October 2008 the US Congress established a \$700 billion

Troubled Asset Relief Program (TARP). The government used some of these funds to purchase equity in US banks and industrial corporations, much of which had been returned to the government by early 2011. In January 2009 the US Congress passed and President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years—two-thirds on additional spending and one-third on tax cuts—to create jobs and to help the economy recover. In 2010 and 2011, the federal budget deficit reached nearly 9% of GDP. In 2012 the federal government reduced the growth of spending and the deficit shrank to 7.6% of GDP. Wars in Iraq and Afghanistan required major shifts in national resources from civilian to military purposes and contributed to the growth of the budget deficit and public debt. Through 2011, the direct costs of the wars totaled nearly \$900 billion, according to US government figures. US revenues from taxes and other sources are lower, as a percentage of GDP, than those of most other countries. In March 2010, President OBAMA signed into law the Patient Protection and Affordable Care Act, a health insurance reform that was designed to extend coverage to an additional 32 million American citizens by 2016, through private health insurance for the general population and Medicaid for the impoverished. Total spending on health care—public plus private—rose from 9.0% of GDP in 1980 to 17.9% in 2010. In July 2010, the president signed the DODD-FRANK Wall Street Reform and Consumer Protection Act, a law designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are “too big to fail,” and improving accountability and transparency in the financial system—in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight. In December 2012, the Federal Reserve Board (Fed) announced plans to purchase \$85 billion per month of mortgage-backed and Treasury securities in an effort to hold down long-term interest rates, and to keep short term rates near zero until unemployment drops below 6.5% or inflation rises above 2.5%. In late 2013, the Fed announced that it would begin scaling back long-term bond purchases to \$75 billion per month in January 2014 and reduce them further as conditions warranted; the Fed, however, would keep short-term rates near zero so long as unemployment and inflation had not crossed the previously stated thresholds. Long-term problems include stagnation of wages for lower-income families, inadequate investment in deteriorating infrastructure, rapidly rising medical and pension costs of an aging population, energy shortages, and sizable current account and budget deficits.

UNITED STATES PACIFIC ISLAND WILDLIFE REFUGES

INTRODUCTION

Background: All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Department of the Interior. Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine and

terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere.

Baker Island: The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935, a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was disrupted by World War II and thereafter abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as a NWR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as a NWR in 1974.

Johnston Atoll: Both the US and the Kingdom of Hawaii annexed Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction, cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston Atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is

frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated a US NWR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for transpacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a NWR and are the site of the world's largest Laysan albatross colony. **Palmyra Atoll:** The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12 nm US territorial seas were transferred to the US Fish and Wildlife Service and designated as a NWR in January 2001.

URUGUAY

INTRODUCTION

Background: Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its natural harbor to become an important commercial center. Claimed by Argentina but annexed by Brazil in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President Jose BATLLE in the early 20th century launched widespread political, social, and economic reforms that established a statist tradition. A violent Marxist urban guerrilla movement named the Tupamaros, launched in the late 1960s, led Uruguay's president to cede control of the government to the military in 1973. By yearend, the rebels had been crushed, but the military continued to expand its hold over the government. Civilian rule was not restored until 1985. In 2004, the left-of-center Frente Amplio Coalition won national elections that effectively ended 170 years of political control previously held by the Colorado and Blanco parties. Uruguay's political and labor conditions are among the freest on the continent.

GEOGRAPHY

Religions: Roman Catholic 47.1%, non-Catholic Christians 11.1%, nondenominational 23.2%, Jewish 0.3%, atheist or agnostic 17.2%, other 1.1% (2006)

Demographic profile: Uruguay rates high for most development indicators and is known for its secularism, liberal social laws, and well-developed social security, health, and educational systems. It is one of the few countries in Latin America and the Caribbean where the entire population has access to clean water. Uruguay's provision of free primary through

university education has contributed to the country's high levels of literacy and educational attainment. However, the emigration of human capital has diminished the state's return on its investment in education. Remittances from the roughly 18% of Uruguayans abroad amount to less than 1 percent of national GDP. The emigration of young adults and a low birth rate are causing Uruguay's population to age rapidly. In the 1960s, Uruguayans for the first time emigrated en masse—primarily to Argentina and Brazil—because of economic decline and the onset of more than a decade of military dictatorship. Economic crises in the early 1980s and 2002 also triggered waves of emigration, but since 2002 more than 70% of Uruguayan emigrants have selected the US and Spain as destinations because of better job prospects. Uruguay had a tiny population upon its independence in 1828 and welcomed thousands of predominantly Italian and Spanish immigrants, but the country has not experienced large influxes of new arrivals since the aftermath of World War II. More recent immigrants include Peruvians and Arabs.

ECONOMY

Economy—overview: Uruguay has a free market economy characterized by an export-oriented agricultural sector, a well-educated work force, and high levels of social spending. Following financial difficulties in the late 1990s and early 2000s, economic growth for Uruguay averaged 8% annually during the period 2004-08. The 2008-09 global financial crisis put a brake on Uruguay’s vigorous growth, which decelerated to 2.6% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment, and GDP growth reached 8.9% in 2010 but slowed in 2012-13, the result of a renewed slowdown in the global economy and in Uruguay’s main trade partners and Common Market of the South (Mercosur) counterparts, Argentina and Brazil. Uruguay has sought to expand trade within Mercosur and with non-Mercosur members. Uruguay’s total merchandise trade with Mercosur since 2006 has increased by nearly 70% to more than \$5 billion while its total trade with the world has almost doubled to roughly \$23 billion in 2013.

TRANSNATIONAL ISSUES

Disputes—international: in 2010, the ICJ ruled in favor of Uruguay's operation of two paper mills on the Uruguay River, which forms the border with Argentina; the two countries formed a joint pollution monitoring regime; uncontested boundary dispute between Brazil and Uruguay over Braziliera/Brasiliera Island in the Quarai/Cuareim River leaves the tripoint with Argentina in question; smuggling of firearms and narcotics continues to be an issue along the Uruguay-Brazil border

Trafficking in persons: *current situation:* Uruguay is a source country for women and children subjected to sex trafficking and, to a lesser extent, a destination country for men, women, and children exploited in forced labor; most victims are women and girls exploited in sex trafficking; some Uruguayan women lured by fraudulent employment offers in Spain, Italy, and Argentina are forced into prostitution; foreign workers in domestic service and agriculture are vulnerable to forced labor in Uruguay; some human trafficking cases are reportedly linked to crime rings

tier rating: Tier 2 Watch List—Uruguay does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government investigated and prosecuted several trafficking cases during 2012 but reported no convictions; authorities have increased funding and staffing for the national women's institute unit that is focused on sex trafficking and domestic violence, but specialized services remain inadequate and victim care services outside the capital are uneven; officials lack formal procedures for identifying trafficking victims (2013)

Illicit drugs: small-scale transit country for drugs mainly bound for Europe, often through sea-borne containers; law enforcement corruption;

money laundering because of strict banking secrecy laws; weak border control along Brazilian frontier; increasing consumption of cocaine base and synthetic drugs

UZBEKISTAN

INTRODUCTION

Background: Russia conquered the territory of present-day Uzbekistan in the late 19th century. Stiff resistance to the Red Army after the Bolshevik Revolution was eventually suppressed and a socialist republic established in 1924. During the Soviet era, intensive production of “white gold” (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land degraded and the Aral Sea and certain rivers half dry. Independent since 1991, the country has lessened its dependence on the cotton monoculture by diversifying agricultural production while developing its mineral and petroleum export capacity and increasing its manufacturing base. However, long-serving septuagenarian President Islam KARIMOV, who rose through the ranks of the Soviet-era State Planning Committee (Gosplan), remains wedded to the concepts of a command economy, creating a challenging environment for foreign investment. Current concerns include post-KARIMOV succession, terrorism by Islamic militants, economic stagnation, and the curtailment of human rights and democratization.

Coastline: 0 km (doubly landlocked); note—Uzbekistan includes the southern portion of the Aral Sea with a 420 km shoreline

Maritime claims: none (doubly landlocked)

Climate: mostly midlatitude desert, long, hot summers, mild winters; semiarid grassland in east

Terrain: mostly flat-to-rolling sandy desert with dunes; broad, flat intensely irrigated river valleys along course of Amu Darya, Syr Darya (Sirdaryo), and Zarafshon; Fergana Valley in east surrounded by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Elevation extremes:

lowest point: Sariqamish Kuli -12 m

highest point: Adelunga Toghi 4,301 m

Natural resources: natural gas, petroleum, coal, gold, uranium, silver, copper, lead and zinc, tungsten, molybdenum

Flag description: three equal horizontal bands of blue (top), white, and green separated by red fimbriations with a white crescent moon (closed side to the hoist) and 12 white stars shifted to the hoist on the top band; blue is

the color of the Turkic peoples and of the sky, white signifies peace and the striving for purity in thoughts and deeds, while green represents nature and is the color of Islam; the red stripes are the vital force of all living organisms that links good and pure ideas with the eternal sky and with deeds on earth; the crescent represents Islam and the 12 stars the months and constellations of the Uzbek calendar

National symbol(s): khumo (mythical bird)

National anthem: *name:* “O‘zbekiston Respublikasining Davlat Madhiyasi” (National Anthem of the Republic of Uzbekistan)

lyrics/music: Abdulla ARIPOV/Mutal BURHANOV

note: adopted 1992; after the fall of the Soviet Union, Uzbekistan kept the music of the anthem from its time as a Soviet Republic but adopted new lyrics

ECONOMY

Economy—overview: Uzbekistan is a dry, landlocked country; 11% of the land is intensely cultivated, in irrigated river valleys. More than 60% of the population lives in densely populated rural communities. Export of hydrocarbons, primarily natural gas, provides a significant share of foreign exchange earnings. Other major export earners include gold and cotton. Despite ongoing efforts to diversify crops, Uzbekistani agriculture remains largely centered around cotton, although production has dropped by 35% since 1991. Uzbekistan is now the world’s fifth largest cotton exporter and sixth largest producer. The country is addressing international criticism for the use of child labor in its cotton harvest. Following independence in September 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. While aware of the need to improve the investment climate, the government still sponsors measures that often increase, not decrease, its control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence. In 2003, the government accepted Article VIII obligations under the IMF, providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some shortages that have further stifled economic activity. The Central Bank often delays or restricts convertibility, especially for consumer goods. Uzbekistan’s growth has been driven primarily by state-led investments and a favorable export environment. In the past Uzbekistani

authorities have accused US and other foreign companies operating in Uzbekistan of violating Uzbekistani laws and have frozen and even seized their assets. At the same time, the Uzbekistani Government has actively courted several major US and international corporations, offering financing and tax advantages. A major US automaker opened a powertrain manufacturing facility in Tashkent in November 2011, but there have been no sizable US investments since then. Diminishing foreign investment and difficulties transporting goods across borders further challenge the economy of Uzbekistan.

TRANSNATIONAL ISSUES

Disputes—international: prolonged drought and cotton monoculture in Uzbekistan and Turkmenistan created water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2004; border delimitation of 130 km of border with Kyrgyzstan is hampered by serious disputes around enclaves and other areas

Refugees and internally displaced persons:

IDPs: undetermined (government forcibly relocated an estimated 3,400 people from villages near the Tajikistan border in 2000-2001; no new data is available) (2012)

Trafficking in persons: *current situation:* Uzbekistan is a source country for men, women, and children subjected to forced labor and women and children subjected to sex trafficking; adults and children are victims of government-organized forced labor during Uzbekistan's annual cotton harvest; some Uzbekistani adults are subjected to forced labor in Kazakhstan, Russia, and, to a much lesser extent, Ukraine in domestic service, agriculture, and the construction and oil industries; Uzbekistani women and children, lured with fraudulent job offers, are sex trafficked to countries in Central Asia, the Middle East, Europe, and Asia; small numbers of Tajikistani and Kyrgyzstani victims have been identified in Uzbekistan

tier rating: Tier 3—Uzbekistan does not fully comply with the minimum standards for the elimination of trafficking and because it is not deemed to be making significant efforts to do so, it was downgraded to Tier 3 after the maximum of two consecutive annual waivers; the government has identified an increased number of sex and transnational labor trafficking victims; for the first time a decree was implemented banning the forced labor of children under the age of 15 in the annual cotton harvest, but government-organized forced labor of adults and older children continues in the cotton and reportedly other sectors; Uzbekistan does not have a systematic process to proactively identify trafficking victims and refer them to protective services (2013)

Illicit drugs: transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of cannabis and small amounts of opium poppy for domestic consumption; poppy cultivation almost wiped out by government crop eradication program; transit point for heroin precursor chemicals bound for

Afghanistan

VANUATU

INTRODUCTION

Background: Multiple waves of colonizers, each speaking a distinct language, migrated to the New Hebrides in the millennia preceding

European exploration in the 18th century. This settlement pattern accounts for the complex linguistic diversity found on the archipelago to this day. The British and French, who settled the New Hebrides in the 19th century, agreed in 1906 to an Anglo-French Condominium, which administered the islands until independence in 1980, when the new name of Vanuatu was adopted.

GEOGRAPHY

Location: Oceania, group of islands in the South Pacific Ocean, about three-quarters of the way from Hawaii to Australia

Geographic coordinates: 16 00 S, 167 00 E

Flag description: two equal horizontal bands of red (top) and green with a black isosceles triangle (based on the hoist side) all separated by a black-edged yellow stripe in the shape of a horizontal Y (the two points of the Y face the hoist side and enclose the triangle); centered in the triangle is a boar's tusk encircling two crossed namele fern fronds, all in yellow; red represents the blood of boars and men, green the richness of the islands, and black the ni-Vanuatu people; the yellow Y-shape—which reflects the pattern of the islands in the Pacific Ocean—symbolizes the light of the Gospel spreading through the islands; the boar's tusk is a symbol of prosperity frequently worn as a pendant on the islands; the fern fronds

represent peace

National symbol(s): boar's tusk

National anthem: *name:* "Yumi, Yumi, Yumi" (We, We, We)

lyrics/music: Francois Vincent AYSSAV

note: adopted 1980, the anthem is written in Bislama, a Creole language that mixes Pidgin English and French

ECONOMY

Economy—overview: This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 197,000 visitors in 2008, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002, the government stepped up efforts to boost tourism through improved air connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth. Australia and New Zealand are the main suppliers of tourists and foreign aid.

VENEZUELA

INTRODUCTION

Background: Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and New Granada, which became Colombia). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Hugo CHAVEZ, president from 1999 to 2013, sought to implement his “21st Century Socialism,” which purported to alleviate social ills while at the same time attacking capitalist globalization and existing democratic institutions. His hand-picked successor, President Nicolas MADURO, is continuing CHAVEZ’s socialist program. Current

concerns include: a weakening of democratic institutions, political polarization, a politicized military, rampant violent crime, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

PEOPLE AND SOCIETY

Nationality: *noun:* Venezuelan(s)

adjective: Venezuelan

Ethnic groups: Spanish, Italian, Portuguese, Arab, German, African, indigenous people

Languages: Spanish (official), numerous indigenous dialects

Religions: nominally Roman Catholic 96%, Protestant 2%, other 2%

Demographic profile: Although poverty in Venezuela has declined during the CHAVEZ administration, dropping from nearly 50% in 1999 to about 27% in 2011, it remains high and some experts question how much of a role social expenditures have played in this poverty reduction. Progress in lowering poverty, income inequality, and unemployment may in fact be more closely linked to the rise and fall of prices for oil, Venezuela's dominant export. In the long-run, education and healthcare spending may increase economic growth and reduce income inequality, but rising costs

and the staffing of new healthcare jobs with foreigners are slowing development. In the meantime, social investment has led to better living standards, including increased school enrollment, a substantial reduction in infant and child mortality, and greater access to potable water and sanitation. Since CHAVEZ came to power in 1999, more than a million predominantly middle- and upper-class Venezuelans are estimated to have emigrated. The brain drain is attributed to a repressive political system, lack of economic opportunities, steep inflation, a high crime rate, and corruption. Thousands of oil engineers emigrated to Canada, Colombia, and the United States following CHAVEZ's firing of over 20,000 employees of the state-owned petroleum company during a 2002-2003 oil strike. Additionally, thousands of Venezuelans of European descent have taken up residence in their ancestral homelands. Nevertheless, Venezuela continues to attract immigrants from South America and southern Europe because of its lenient migration policy and the availability of education and healthcare. Venezuela also has been a fairly accommodating host to more than 200,000 Colombian refugees.

Flag description: three equal horizontal bands of yellow (top), blue, and red with the coat of arms on the hoist side of the yellow band and an arc of eight white five-pointed stars centered in the blue band; the flag retains the three equal horizontal bands and three main colors of the banner of Gran Colombia, the South American republic that broke up in 1830; yellow is interpreted as standing for the riches of the land, blue for the courage of its people, and red for the blood shed in attaining independence; the seven stars on the original flag represented the seven provinces in Venezuela that united in the war of independence; in 2006, then President Hugo CHAVEZ ordered an eighth star added to the star arc—a decision that sparked much controversy—to conform with the flag proclaimed by Simon Bolivar in 1827 and to represent the province of Guayana

National symbol(s): troupial (bird)

National anthem: *name:* “Gloria al bravo pueblo” (Glory to the Brave People)

lyrics/music: Vicente SALIAS/Juan Jose LANDAETA

note: adopted 1881; the lyrics were written in 1810, the music some years later; both SALIAS and LANDAETA were executed in 1814 during Venezuela’s struggle for independence

ECONOMY

Economy—overview: Venezuela remains highly dependent on oil revenues, which account for roughly 95% of export earnings, about 45% of federal budget revenues, and around 12% of GDP. Fueled by high oil prices, record government spending helped to boost GDP growth in 2011, after a sharp drop in oil prices caused an economic contraction in 2009-10. Government spending, minimum wage hikes, and improved access to domestic credit created an increase in consumption which combined with supply problems to cause higher inflation—roughly 26% in 2011 and rising to more than 56% in 2013. Former President Hugo CHAVEZ's efforts to increase the government's control of the economy by nationalizing firms in the agribusiness, financial, construction, oil, and steel sectors hurt the private investment environment, reduced productive capacity, and slowed non-petroleum exports. In 2013, Venezuela continued to wrestle with a housing crisis, an electricity crisis, and rolling food and goods shortages—all of which were fallout from the government's unorthodox economic policies. The budget deficit for the entire government reached 17% of GDP in 2012. The deficit was trimmed to under 10% of GDP in 2013.

TRANSNATIONAL ISSUES

Disputes—international: claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before the United Nations Convention on the Law of the Sea that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over maritime boundary and Venezuelan administered Los Monjes islands near the Gulf of Venezuela; Colombian organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region; in 2006, an estimated 139,000 Colombians sought protection in 150 communities along the border in Venezuela; US, France, and the Netherlands recognize Venezuela's granting full effect to Aves Island, thereby claiming a Venezuelan Economic Exclusion Zone/continental shelf extending over a large portion of the eastern Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the

Grenadines protest Venezuela's full effect claim

Refugees and internally displaced persons:

refugees (country of origin): 203,563 (Colombia) (2012)

Trafficking in persons: *current situation:* Venezuela is a source, transit, and destination country for men, women, and children subjected to sex trafficking and forced labor; Venezuelan women and girls are trafficked within the country for sexual exploitation, lured from the nation's interior to urban and tourist areas; women from Colombia, Peru, Haiti, China, and South Africa are also reported to have been sexually exploited in Venezuela; some Venezuelan women are transported to Caribbean islands, particularly Aruba, Curacao, and Trinidad & Tobago, where they are subjected to forced prostitution; some Venezuelan children are forced to beg on the streets or work as domestic servants, while Ecuadorian children, who are often from indigenous communities, are subjected to forced labor

tier rating: Tier 2 Watch List—Venezuela does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has increased the investigation of forced labor crimes but has not publicly document progress on prosecutions and convictions of trafficking offenders or on victim identification or assistance; the government also does not report on the existence of formal procedures for identifying trafficking victims and referring them to victim services; authorities provide limited funding to some NGOs providing victim services; public service announcements and an awareness campaign on human trafficking have continued (2013)

Illicit drugs: small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

VIETNAM

INTRODUCTION

Background: The conquest of Vietnam by France began in 1858 and was completed by 1884. It became part of French Indochina in 1887. Vietnam declared independence after World War II, but France continued to rule until its 1954 defeat by communist forces under Ho Chi MINH. Under the Geneva Accords of 1954, Vietnam was divided into the communist North and anti-communist South. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South reuniting the country under communist rule. Despite the return of peace, for over a decade the country experienced little economic growth because of conservative leadership policies, the persecution and mass exodus of individuals—many of them successful South Vietnamese merchants—and growing international isolation. However, since the enactment of Vietnam's "doi moi" (renovation) policy in 1986, Vietnamese authorities have committed to increased economic liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The communist leaders, however, maintain control on political expression and have resisted outside calls to improve human rights. The country continues to experience small-scale protests from various groups - the vast majority connected to land-use issues, calls for increased political space, and the lack of equitable mechanisms for resolving disputes. Various ethnic minorities, such as the Montagnards of the Central Highlands and the Khmer Krom in the southern delta region, have also held protests.

ECONOMY

Economy—overview: Vietnam is a densely-populated developing country that has been transitioning from the rigidities of a centrally-planned economy since 1986. Vietnamese authorities have reaffirmed their commitment to economic modernization in recent years. Vietnam joined the World Trade Organization in January 2007, which has promoted more competitive, export-driven industries. Vietnam became an official negotiating partner in the Trans-Pacific Partnership trade agreement in 2010. Agriculture’s share of economic output has continued to shrink from about 25% in 2000 to less than 20% in 2013, while industry’s share increased from 36% to more than 42% in the same period. State-owned enterprises account for about 40% of GDP. Poverty has declined significantly, and Vietnam is working to create jobs to meet the challenge of a labor force that is growing by more than one million people every year. The global recession hurt Vietnam’s export-oriented economy, with GDP in 2013 growing at 5%, the slowest rate of growth since 1999. In 2013, however, exports increased by more than 12%, year-on-year; several administrative actions brought the trade deficit back into balance. Between 2008 and 2011, Vietnam’s managed currency, the dong, was devalued in excess of 20%, but its value remained relatively stable in 2013. Hanoi has oscillated between promoting growth

and emphasizing macroeconomic stability in recent years. In February 2011, the government shifted from policies aimed at achieving a high rate of economic growth, which had stoked inflation, to those aimed at stabilizing the economy, through tighter monetary and fiscal control. Although Vietnam unveiled a broad, “three pillar” economic reform program in early 2012, proposing the restructuring of public investment, state-owned enterprises, and the banking sector, little perceptible progress has been made. Vietnam’s economy continues to face challenges from an undercapitalized banking sector. Non-performing loans weigh heavily on banks and businesses.

TRANSNATIONAL ISSUES

Disputes—international: southeast Asian states have enhanced border surveillance to check the spread of avian flu; Cambodia and Laos protest Vietnamese squatters and armed encroachments along border; Cambodia accuses Vietnam of a wide variety of illicit cross-border activities; progress on a joint development area with Cambodia is hampered by an unresolved dispute over sovereignty of offshore islands; an estimated 300,000 Vietnamese refugees reside in China; establishment of a maritime boundary with Cambodia is hampered by unresolved dispute over the sovereignty of offshore islands; the decade-long demarcation of the China-Vietnam land boundary was completed in 2009; China occupies the Paracel Islands also claimed by Vietnam and Taiwan; Brunei claims a maritime boundary extending beyond as far as a median with Vietnam, thus asserting an implicit claim to Lousia Reef; the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions but falls short of a legally binding “code of conduct” desired by several of the disputants; Vietnam continues to expand construction of facilities in the Spratly Islands; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Economic Exclusion Zone negotiations with Indonesia are ongoing, and the two countries in Fall 2011 agreed to work together to reduce illegal fishing along their maritime boundary

Refugees and internally displaced persons:

stateless persons: 11,500 (2012); note—Vietnam’s stateless ethnic Chinese

Cambodian population dates to the 1970s when thousands of Cambodians fled to Vietnam to escape the Khmer Rouge and were no longer recognized as Cambodian citizens; Vietnamese women who gave up their citizenship to marry foreign men have found themselves stateless after divorcing and returning home to Vietnam; the government addressed this problem in 2009, and Vietnamese women are beginning to reclaim their citizenship

Illicit drugs: minor producer of opium poppy; probable minor transit point for Southeast Asian heroin; government continues to face domestic opium/heroin/methamphetamine addiction problems despite longstanding crackdowns

VIRGIN ISLANDS

INTRODUCTION

Background: During the 17th century, the archipelago was divided into English and Dutch territorial units. Sugarcane, produced by African slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

WAKE ISLAND

INTRODUCTION

Background: The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake became a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974,

the island's airstrip has been used by the US military, as well as for emergency landings. Operations on the island were suspended and all personnel evacuated in 2006 with the approach of super typhoon IOKE (category 5), but resultant damage was comparatively minor. A US Air Force repair team restored full capability to the airfield and facilities, and the island remains a vital strategic link in the Pacific region.

WALLIS AND FUTUNA

INTRODUCTION

Background: The Futuna island group was discovered by the Dutch in 1616 and Wallis by the British in 1767, but it was the French who declared a protectorate over the islands in 1842, and took official control of them between 1886 and 1888. Notably, Wallis and Futuna was the only French colony to side with the Vichy regime during World War II, a phase that ended in May of 1942 with the arrival of 2,000 American troops. In 1959, the inhabitants of the islands voted to become a French overseas territory and officially assumed this status in July 1961.

GEOGRAPHY

Location: Oceania, islands in the South Pacific Ocean, about two-thirds of the way from Hawaii to New Zealand

Geographic coordinates: 13 18 S, 176 12 W

Map references: Oceania

Flag description: unofficial, local flag has a red field with four white isosceles triangles in the middle, representing the three native kings of the islands and the French administrator; the apexes of the triangles are oriented inward and at right angles to each other; the flag of France, outlined in white on two sides, is in the upper hoist quadrant

note: the design is derived from an original red banner with a white cross pattee that was introduced in the 19th century by French missionaries; the flag of France is used for official occasions

National symbol(s): red saltire (Saint Andrew's Cross) on a white square on a red field

National anthem: *note:* as a territory of France, “La Marseillaise” is official (see France)

ECONOMY

Economy—overview: The economy is limited to traditional subsistence agriculture, with 80% of labor force earnings from agriculture (coconuts and vegetables), livestock (mostly pigs), and fishing. About 4% of the population is employed in government. Revenues come from French Government subsidies, licensing of fishing rights to Japan and South Korea, import taxes, and remittances from expatriate workers in New Caledonia.

WEST BANK

INTRODUCTION

Background: From the early 16th century through 1917, the area now known as the West Bank fell under Ottoman rule. Following World War I, the Allied powers (France, UK, Russia) allocated the area to the British Mandate of Palestine. After World War II, the UN passed a resolution to establish two states within the Mandate, and designated a territory including what is now known as the West Bank as part of the proposed Arab state. Following the 1948 Arab-Israeli War the area was captured by Transjordan (later renamed Jordan). Jordan annexed the West Bank in 1950. In June 1967, Israel captured the West Bank and East Jerusalem during the 1967 Six-Day War. With the exception of East Jerusalem and the former Israeli-Jordanian border zone, the West Bank has remained under Israeli military control. Under a series of agreements signed between 1994 and 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the West Bank as well as the Gaza Strip. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled after the outbreak of an intifada in mid- 2000. In early 2003, the “Quartet” of the US, EU, UN, and Russia, presented a roadmap to a final peace settlement by 2005, calling for two states—Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT’s death in late 2004 and the subsequent election of Mahmud ABBAS (head of the Fatah political party) as the PLO Executive Committee Chairman and PA president, Israel and the PA agreed to move the peace process forward. Israel in late 2005 unilaterally withdrew all of its settlers and soldiers and dismantled its military facilities in the Gaza Strip and redeployed its military from several West Bank settlements but continues to control maritime, airspace, and other access. In early 2006, the Islamic Resistance Movement, HAMAS, won the Palestinian Legislative Council election and took control of the PA government. Attempts to form a unity government failed, and violent clashes between Fatah and HAMAS supporters ensued, culminating in HAMAS’s violent seizure of all military and governmental institutions in the Gaza Strip. Fatah and HAMAS in early 2011 agreed to reunify the Gaza Strip and West Bank, but the factions have struggled to implement details on governance and security. The status quo remains with HAMAS in control of the Gaza Strip and the PA governing the

West Bank. In late 2010, direct peace talks between the Israelis and Palestinians collapsed. In November 2012, the UN General Assembly upgraded the Palestinian status at the UN to that of an observer “state.” The Israeli government and ABBAS returned to formal peace negotiations in July 2013.

ECONOMY

Economy—overview: The West Bank—the larger of the two areas comprising the Palestinian territories—has sustained a moderate rate of economic growth since 2008. Inflows of donor aid and government spending have driven most of the gains, however. Private sector development has been weak. After a multiyear downturn following the start of the second intifada in 2000, overall standard-of-living measures have recovered and now exceed levels seen in the late 1990s. Despite the Palestinian Authority's (PA) successful implementation of economic and security reforms and the easing of some movement and access restrictions by the Israeli Government, Israeli closure policies continue to disrupt labor and trade flows, industrial capacity, and basic commerce, eroding the productive capacity of the West Bank economy. The biggest impediments to economic improvements in the West Bank remain Palestinians' inability to access land and resources in Israeli-controlled areas, import and export restrictions, and a high-cost capital structure. The PA for the foreseeable future will continue to rely heavily on donor aid for its budgetary needs, and West Bank economic activity will depend largely on the PA's ability to attract such aid.

WESTERN SAHARA

INTRODUCTION

Background: Western Sahara is a disputed territory on the northwest coast of Africa bordered by Morocco, Mauritania, and Algeria. After Spain withdrew from its former colony of Spanish Sahara in 1976, Morocco annexed the northern two-thirds of Western Sahara and claimed the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Morocco's sovereignty ended in a 1991 cease-fire and the establishment of a UN peacekeeping operation. As part of this effort, the UN sought to offer a choice to the peoples of the Western Sahara between independence (favored by the Polisario Front) or integration into Morocco. A proposed referendum never took place due to lack of agreement on voter eligibility. The 2,700 km- (1,700 mi-) long

defensive sand berm, built by the Moroccans from 1980 to 1987 and running the length of the territory, continues to separate the opposing forces with Morocco controlling the roughly 80 percent of the territory west of the berm. Local demonstrations criticizing the Moroccan authorities occur regularly, and there are periodic ethnic tensions between the native Sahrawi population and Moroccan immigrants. Morocco maintains a heavy security presence in the territory.

ECONOMY

Economy—overview: Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a key source of employment, infrastructure development, and social spending in the territory. Western Sahara's unresolved legal status makes the exploitation of its natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in December 2013 finalized a four-year agreement allowing European vessels to fish off the coast of Morocco, including disputed waters off the coast of Western Sahara. Oil has never been found in

Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory.

TRANSNATIONAL ISSUES

Disputes—international: many neighboring states reject Moroccan administration of Western Sahara; several states have extended diplomatic relations to the “Sahrawi Arab Democratic Republic” represented by the Polisario Front in exile in Algeria, while others recognize Moroccan sovereignty over Western Sahara; most of the approximately 90,000 Sahrawi refugees have been sheltered in camps in Tindouf, Algeria since the 1980s

WORLD

INTRODUCTION

Background: Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about environmental degradation including deforestation, energy and water shortages, declining biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820 to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1987, 6 billion in 1999, and 7 billion in 2012. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine and agriculture) and fears (e.g., development of even more lethal weapons of war).

GEOGRAPHY

Geographic overview: The surface of the earth is approximately 70.9% water and 29.1% land. The former portion is divided into large water bodies termed oceans. The World Factbook recognizes and describes five oceans, which are in decreasing order of size: the Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean.

The land portion is generally divided into several, large, discrete landmasses termed continents. Depending on the convention used, the number of continents can vary from five to seven. The most common classification recognizes seven, which are (from largest to smallest): Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Asia and Europe are sometimes lumped together into a Eurasian continent resulting in six continents. Alternatively, North and South America are sometimes grouped as simply the Americas, resulting in a continent total of six (or five, if the Eurasia designation is used).

North America is commonly understood to include the island of Greenland, the isles of the Caribbean, and to extend south all the way to the Isthmus of Panama. The easternmost extent of Europe is generally defined as being the Ural Mountains and the Ural River; on the southeast the Caspian Sea; and on the south the Caucasus Mountains, the Black Sea, and the Mediterranean. Portions of Azerbaijan, Georgia, Kazakhstan, Russia, and Turkey fall within both Europe and Asia, but in every instance the larger section is in Asia. These countries are considered part of both continents. Armenia and Cyprus, which lie completely in Western Asia, are geopolitically European countries.

Asia usually incorporates all the islands of the Philippines, Malaysia, and Indonesia. The islands of the Pacific are often lumped with Australia into a “land mass” termed Oceania or Australasia. Africa’s northeast termed Oceania or Australasia. Africa’s northeast extremity is frequently delimited at the Isthmus of Suez, but for geopolitical purposes, the Egyptian Sinai Peninsula is often included as part of Africa.

Although the above groupings are the most common, different continental dispositions are recognized or taught in certain parts of the world, with some arrangements more heavily based on cultural spheres rather than physical geographic considerations.

Natural hazards: large areas subject to severe weather (tropical cyclones); natural disasters (earthquakes, landslides, tsunamis, volcanic eruptions)

volcanism: volcanism is a fundamental driver and consequence of plate tectonics, the physical process reshaping the Earth's lithosphere; the world is home to more than 1,500 potentially active volcanoes, with over 500 of these having erupted in historical times; an estimated 500 million people live near these volcanoes; associated dangers include lava flows, lahars (mudflows), pyroclastic flows, ash clouds, ash fall, ballistic projectiles, gas emissions, landslides, earthquakes, and tsunamis; in the 1990s, the International Association of Volcanology and Chemistry of the Earth's Interior, created a list of 16 Decade Volcanoes worthy of special study because of their great potential for destruction: Avachinsky-Koryaksky (Russia), Colima (Mexico), Etna (Italy), Galeras (Colombia), Mauna Loa (United States), Merapi (Indonesia), Nyiragongo (Democratic Republic of the Congo), Rainier (United States), Sakurajima (Japan), Santa Maria (Guatemala), Santorini (Greece), Taal (Philippines), Teide (Spain), Ulawun (Papua New Guinea), Unzen (Japan), Vesuvius (Italy)

Environment—current issues: large areas subject to overpopulation, industrial disasters, pollution (air, water, acid rain, toxic substances), loss of vegetation (overgrazing, deforestation, desertification), loss of wildlife, soil degradation, soil depletion, erosion; global warming becoming a greater concern Geography—note: the world is now thought to be about 4.55 billion years old, just about one-third of the 13.8-billion-year age estimated for the universe

ECONOMY

Economy—overview: The international financial crisis of 2008-09 led to the first downturn in global output since 1946 and presented the world with a major new challenge: determining what mix of fiscal and monetary policies to follow to restore growth and jobs, while keeping inflation and debt under control. Financial stabilization and stimulus programs that started in 2009-11, combined with lower tax revenues in 2009-10, required most countries to run large budget deficits. Treasuries issued new public debt—totaling \$7.6 trillion since 2008—to pay for the additional

expenditures. To keep interest rates low, most central banks monetized that debt, injecting large sums of money into their economies—between December 2008 and December 2012 the global money supply increased by more than 31%. Governments now are faced with the difficult task of spurring current growth and employment without saddling their economies with so much debt that they sacrifice long-term growth and financial stability. And when economic activity picks up, central banks will confront the difficult task of containing inflation without raising interest rates so high they snuff out further growth.

Fiscal and monetary data for 2012 are currently available for 180 countries, which together account for 98.5% of World GDP. Of the 180 countries, 85 pursued unequivocally expansionary policies, boosting government spending while also expanding their money supply relatively rapidly—faster than the world average of 4.1%; 37 followed restrictive fiscal and monetary policies, reducing government spending and holding money growth to less than the 4.1% average; and the remaining 58 followed a mix of counterbalancing fiscal and monetary policies, either reducing government spending while accelerating money growth, or boosting spending while curtailing money growth.

(For more information, see attached spreadsheet, Fiscal and Monetary Data, 2008-2012.)

In 2012, fiscal policy shifted towards greater austerity for a majority of the countries. In an attempt to attack their deficit and debt problems head-on, nearly 5 out of 6 countries slowed the rate of growth of government spending, and 1 in 3 countries actually lowered the level of their expenditures. The global growth rate for government expenditures dropped from 5.9% in 2010 and 10.1% in 2011, to just 1.4% in 2012. Roughly 1 out of 3 central banks tightened monetary policy, decelerating the rate of growth of their money supply, and about 1 out of 7 actually withdrew money from circulation. Growth of the global money supply, as measured by the narrowly defined M1, slowed from 8.7% in 2009 and 10.4% in 2010 to 5.2% in 2011 and 4.1% in 2012.

These policy choices significantly affected economic performance. The global budget deficit narrowed to roughly \$2.7 trillion in 2012, or 3.8% of World GDP. But growth of the world economy slipped from 5.1% in 2010 and 3.7% in 2011, to just 3.1% in 2012. And world unemployment increased to 9.2%.

Countries with expansionary fiscal and monetary policies achieved significantly higher rates of growth, lower unemployment, higher growth of

tax revenues, and greater success reducing the public debt burden than those countries that chose contractionary policies. In 2012, the 85 countries that followed a pro-growth approach achieved a median GDP growth rate of 4.9%, compared to just 0.8% for the 37 countries with restrictive fiscal and monetary policies, a difference of more than 4 percentage points. Among the 85, China grew 7.8%, Indonesia 6.0%, Mexico 4.0%, Russia 3.4%, Turkey 3.0%, the United States 2.2%, and Canada 1.9%, while among the 37, Brazil grew 1.3%, Germany 0.7%, France 0.1%, Belgium -0.2%, Netherlands -0.5%, Spain -1.4%, and Italy -2.3%. The median unemployment rate for the 37 countries jumped to 11.5%, while the median for the pro-growth countries held steady at 7.3%.

Faster GDP growth and lower unemployment rates translated into increased tax revenues and a lower debt burden. Revenues for the 85 expansionary countries grew at a median rate of 10.8%, whereas tax revenues fell at a median rate of 6.2% for the 37 countries that chose austere economic policies. Budget balances improved for about half of the 37, but, for most, debt grew faster than GDP, and the median level of their public debt as a share of GDP increased 2.5 percentage points, to 57.8%. On the other hand, budget balances deteriorated for most of the 85 pro-growth countries, but GDP growth outpaced increases in debt, and the median level of public debt as a share of GDP actually declined slightly (-0.1 percentage points).

The world recession has suppressed inflation rates—world inflation declined 1.0 percentage point in 2012 to about 4.0%. At the same time, the median inflation rate for the 85 pro-growth countries, at 5.5%, was 2.5 percentage points higher than that for the countries that followed more austere fiscal and monetary policies. Overall, the latter countries also improved their current account balances by shedding imports; as a result, current account balances deteriorated for most of the countries that pursued pro-growth policies. Slower growth of world income reduced import demand and crude oil prices fell. Consequently, the dollar value of world trade grew just 1% in 2012, compared with 18% in 2011.

Beyond the current global slowdown, the world faces several long-standing economic challenges. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, waste-disposal, epidemics, water-shortages, famine, over-fishing of oceans, deforestation, desertification, and depletion of non-renewable resources. The nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, services, funds, and technology. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated

economic powerhouse, has created economic risks because the participating nations have varying income levels and growth rates, and hence, require a different mix of monetary and fiscal policies. Governments, especially in Western Europe, face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. Because of their own internal problems and priorities, the industrialized countries are unable to devote sufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The terrorist attacks on the US on 11 September 2001 accentuated a growing risk to global prosperity—the diversion of resources away from capital investments to counter-terrorist programs.

Despite these vexing problems, the world economy also shows great promise. Technology has made possible further advances in a wide range of fields, from agriculture, to medicine, alternative energy, metallurgy, and transportation. Improved global communications have greatly reduced the costs of international trade, helping the world gain from the international division of labor, raise living standards, and reduce income disparities among nations. Much of the resilience of the world economy in the aftermath of the financial crisis resulted from government and central bank leaders around the globe working in concert to stem the financial onslaught, knowing well the lessons of past economic failures.

WORLD

Disputes—international: stretching over 250,000 km, the world's 322 international land boundaries separate 195 independent states and 71 dependencies, areas of special sovereignty, and other miscellaneous entities; ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries; most maritime states have claimed limits that include territorial seas and exclusive economic zones; overlapping limits due to adjacent or opposite coasts create the potential for 430 bilateral maritime boundaries of which 209 have agreements that include contiguous and non-contiguous segments; boundary, borderland/resource, and territorial disputes vary in intensity from managed or dormant to violent or militarized; undemarcated, indefinite, porous, and unmanaged boundaries tend to encourage illegal cross-border activities, uncontrolled migration, and confrontation; territorial disputes may evolve from historical and/or cultural claims, or they may be brought on by resource competition; ethnic and cultural clashes continue to be responsible for much of the territorial fragmentation and internal displacement of the estimated 6.6 million people and cross-border displacements of 8.6 million refugees around the world as of early 2006; just over one million refugees were repatriated in the same period; other sources of contention include access to water and mineral (especially hydrocarbon) resources, fisheries, and arable land; armed conflict prevails not so much between the uniformed armed forces of independent states as between stateless armed entities that detract from the sustenance and welfare of local populations, leaving the community of nations to cope with resultant refugees, hunger, disease, impoverishment, and environmental degradation

Refugees and internally displaced persons: the United Nations High Commissioner for Refugees (UNHCR) estimated that as of the end of 2012 there were 45.2 million people forcibly displaced worldwide; this includes 15.4 million refugees, 937,000 asylum seekers, and 28.8 million conflict IDPs (another 32.4 million IDPs were displaced by natural disasters); the UNHCR estimates there are currently 10-12 million stateless persons (2012)

Trafficking in persons: *current situation:* approximately 800,000 people, mostly women and children, are trafficked annually across national borders, not including the millions who are trafficked within their own countries; at least 80% of the victims are female and up to 50% are minors; 75% of all victims are trafficked into commercial sexual exploitation; almost two-thirds of the global victims are trafficked intra-regionally within East Asia and the Pacific (260,000 to 280,000 people) and Europe and Eurasia (170,000 to 210,000 people) (2012)

Tier 2 Watch List: (44 countries) Afghanistan, Albania, Angola, Bahrain, Barbados, Belarus, Burma, Burundi, Cambodia, Chad, Comoros, Djibouti, Federated States of Micronesia, The Gambia, Guinea, Guyana, Haiti, Honduras, Kenya, Lebanon, Lesotho, Liberia, Madagascar, Malaysia, Maldives, Mali, Marshall Islands, Morocco, Namibia, Rwanda, Saint Lucia, Seychelles, Solomon Islands, South Sudan, Sri Lanka, Suriname, Tanzania, Thailand, Trinidad and Tobago, Tunisia, Turkmenistan, Ukraine, Uruguay, Venezuela

Tier 3: (21 countries) Algeria, Central African Republic, China, Democratic Republic of Congo, Cuba, Equatorial Guinea, Eritrea, Guinea-Bissau, Iran, North Korea, Kuwait, Libya, Mauritania, Papua New Guinea, Russia, Saudi Arabia, Sudan, Syria, Uzbekistan, Yemen, Zimbabwe (2013)

Illicit drugs: *cocaine:* worldwide coca leaf cultivation in 2007 amounted to 232,500 hectares; Colombia produced slightly more than two-thirds of the worldwide crop, followed by Peru and Bolivia; potential pure cocaine production decreased 7% to 865 metric tons in 2007; Colombia conducts an aggressive coca eradication campaign, but both Peruvian and Bolivian Governments are hesitant to eradicate coca in key growing areas; 551 metric tons of export-quality cocaine (85% pure) is documented to have been seized or destroyed in 2005; US consumption of export quality cocaine is estimated to have been in excess of 380 metric tons

opiates: worldwide illicit opium poppy cultivation continued to increase in 2007, with a potential opium production of 8,400 metric tons, reaching the highest levels recorded since estimates began in mid-1980s; Afghanistan is world's primary opium producer, accounting for 95% of the global supply; Southeast Asia—responsible for 9% of global opium—saw marginal increases in production; Latin America produced 1% of global opium, but most was refined into heroin destined for the US market; if all potential opium was processed into pure heroin, the potential global production would be 1,000 metric tons of heroin in 2007

YEMEN

INTRODUCTION

Background: North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from

the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement and brief civil war in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border. Fighting in the northwest between the government and the Huthis, a Zaydi Shia minority, began in 2004 and has since resulted in six rounds of fighting—the last ended in early 2010 with a cease-fire that continues to hold. The southern secessionist movement was revitalized in 2008 when a popular socioeconomic protest movement initiated the prior year took on political goals including secession. Public rallies in Sana'a against then President SALIH—inspired by similar demonstrations in Tunisia and Egypt—slowly built momentum starting in late January 2011 fueled by complaints over high unemployment, poor economic conditions, and corruption. By the following month, some protests had resulted in violence, and the demonstrations had spread to other major cities. By March the opposition had hardened its demands and was unifying behind calls for SALIH's immediate ouster, and prominent military and tribal leaders began defecting from SALIH's camp. The Gulf Cooperation Council (GCC) in late April 2011, in an attempt to mediate the crisis in Yemen, proposed an agreement in which the president would step down in exchange for immunity from prosecution. SALIH's refusal to sign an agreement led to heavy street fighting and his injury in an explosion in June 2011. The UN Security Council passed Resolution 2014 in October 2011 calling on both sides to end the violence and complete a power transfer deal. In late November 2011, SALIH signed the GCC-brokered agreement to step down and to transfer some of his powers to Vice President Abd Rabuh Mansur HADI. Following elections in February 2012, won by HADI, SALIH formally transferred his powers. In accordance with the GCC initiative, Yemen launched a National Dialogue in March 2013 to discuss key constitutional, political, and social issues. HADI concluded the National Dialogue in January 2014. Subsequent steps in the transition process include constitutional drafting, a constitutional referendum, and national elections.

lyrics/music: Abdullah Abdulwahab NOA'MAN/Ayyoab Tarish ABSI

note: adopted 1990; the music first served as the anthem for South Yemen before unification with North Yemen in 1990

ECONOMY

Economy—overview: Yemen is a low income country that is highly dependent on declining oil resources for revenue. Petroleum accounts for roughly 25% of GDP and 63% of government revenue. Yemen has tried to

counter the effects of its declining oil resources and continuing attacks on its oil pipelines by diversifying its economy through an economic reform program initiated in 2006 that is designed to bolster non-oil sectors of the economy and foreign investment. In October 2009, Yemen exported its first liquefied natural gas as part of this diversification effort. In January 2010, the international community established the Friends of Yemen group that aims to support Yemen's efforts toward economic and political reform. In 2012, the Friends of Yemen pledged nearly \$7 billion in assistance to Yemen. The Yemeni Government also endorsed a Mutual Accountability Framework to facilitate the efficient implementation of donor aid. The unrest that began in early 2011 caused GDP to plunge almost 11% in 2011. Availability of basic services, including electricity, water, and fuel, has improved since the transition, but progress toward achieving more sustainable economic stability has been slow and uneven. Yemen continues to face difficult long-term challenges, including declining water resources, high unemployment, severe food scarcity, and a high population growth rate.

Ports and terminals: *major seaport(s):* Aden, Al Hudaydah, Al Mukalla

Transportation—note: the International Maritime Bureau reports offshore waters in the Gulf of Aden are high risk for piracy; numerous vessels, including commercial shipping and pleasure craft, have been attacked and hijacked both at anchor and while underway; crew, passengers, and cargo are held for ransom; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators reduced the incidence of piracy in that body of water by more than half in 2010

MILITARY

Military branches: Land Forces, Naval and Coastal Defense Forces (includes Marines), Air and Air Defense Force (al-Quwwat al-Jawwiya al-Yemeniya), Border Guards, Statagic Reserve Forces (2013)

Military service age and obligation: 18 is the legal minimum age for voluntary military service; no conscription; 2-year service obligation (2012)

TRANSNATIONAL ISSUES

Disputes—international: Saudi Arabia has reinforced its concrete-filled security barrier along sections of the fully demarcated border with Yemen to stem illegal cross-border activities

Refugees and internally displaced persons:

refugees (country of origin): 5,221 (Ethiopia) (2012); 230,878 (Somalia) (2014)

IDPs: 309,823 (conflict in Sa'ada governorate; clashes between AQAP and government forces) (2014)

Trafficking in persons: *current situation:* Yemen is a source and, to a much lesser extent, transit and destination country for men, women, and children subjected to forced labor and sex trafficking; some Yemeni children, mostly boys, migrate to Yemeni cities or across the border to Saudi Arabia and, less frequently Oman, where they end up as forced laborers in domestic service or small shops, beggars, or prostitutes; some of the large number of child workers in Yemen also face conditions of forced labor; other Yemeni children are conscripted into the government's armed forces or tribal or rebel militias; to a lesser degree, Yemen is a country of origin for girls trafficked within country or to Saudi Arabia to work as prostitutes in hotels and clubs; additionally, Yemen is a destination and transit country for women and children from the Horn of Africa who are looking for work or have received false job offers in the Gulf states but are subjected to sexual exploitation or forced labor upon arrival; reports indicate that adults and children are still sold or inherited as slaves in Yemen

tier rating: Tier 3—Yemen does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; prolonged political, economic, and security crises impeded the government's modest anti-trafficking efforts; the government has not instituted formal procedures to identify and protect victims of trafficking or investigate or prosecute officials complicit in trafficking-related crimes; no known efforts have been made to investigate or punish the practice of chattel slavery; the government has taken some steps to prevent the recruitment of children in the armed forces, but it is unclear if efforts have been made to remove child soldiers from the military and provide them with protective or rehabilitative services; no progress has been made in implementing Yemen's 2008 national action plan on trafficking (2013)

Z

ZAMBIA

INTRODUCTION

Background: The territory of Northern Rhodesia was administered by the [British] South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices,

economic mismanagement and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties. The election in 2001 was marked by administrative problems with three parties filing a legal petition challenging the election of ruling party candidate Levy MWANAWASA. MWANAWASA was reelected in 2006 in an election that was deemed free and fair. Upon his abrupt death in August 2008, he was succeeded by his vice president, Rupiah BANDA, who subsequently won a special presidential by-election in October 2008. Michael SATA was elected president in September 2011.

ECONOMY

Economy—overview: Zambia's economy has experienced strong growth in recent years, with real GDP growth in 2005-13 more than 6% per year. Privatization of government-owned copper mines in the 1990s relieved the

government from covering mammoth losses generated by the industry and greatly increased copper mining output and profitability to spur economic growth. Copper output has increased steadily since 2004, due to higher copper prices and foreign investment. Zambia's dependency on copper makes it vulnerable to depressed commodity prices, but record high copper prices and a bumper maize crop in 2010 helped Zambia rebound quickly from the world economic slowdown that began in 2008. Zambia has made some strides to improve the ease of doing business. Regulatory changes by the current government in 2012-2013 included Statutory Instruments (SI) Number 33 (mandating use of the kwacha for domestic transactions) and SI Number 55 (monitoring foreign exchange transactions). Along with problems of fiscal management and weakening global copper prices, these SI's were perceived as undermining confidence in Zambia's economy and currency, leading to sharp depreciation of the kwacha in March 2014. In response, the Minister of Finance revoked SI 33 and 55 in late March 2014. Despite a strong economy, poverty remains a significant problem in Zambia, made worse by a high birth rate, relatively high HIV/AIDS burden, and by market distorting agricultural policies.

unattractive venue for money launderers; major consumer of cannabis

ZIMBABWE

INTRODUCTION

Background: The UK annexed Southern Rhodesia from the [British] South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign, which began in 1997 and intensified after 2000, caused an exodus of white

farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection. In April 2005, the capital city of Harare embarked on Operation Restore Order, ostensibly an urban rationalization program, which resulted in the destruction of the homes or businesses of 700,000 mostly poor supporters of the opposition. President MUGABE in June 2007 instituted price controls on all basic commodities causing panic buying and leaving store shelves empty for months; a period of increasing hyperinflation ensued. General elections held in March 2008 contained irregularities but still amounted to a censure of the ZANU-PF-led government with the opposition winning a majority of seats in parliament. MDC-T opposition leader Morgan TSVANGIRAI won the most votes in the presidential polls, but not enough to win outright. In the lead up to a run-off election in late June 2008, considerable violence enacted against opposition party members led to the withdrawal of TSVANGIRAI from the ballot. Extensive evidence of violence and intimidation resulted in international condemnation of the process. Difficult negotiations over a power-sharing “government of national unity,” in which MUGABE remained president and TSVANGIRAI became prime minister, were finally settled in February 2009, although the leaders failed to agree upon many key outstanding governmental issues. MUGABE was reelected president in June 2013 in balloting that was severely flawed and internationally condemned. As a prerequisite to holding the elections, Zimbabwe enacted a new constitution by referendum, although many provisions in the new constitution have yet to be codified in law.

ECONOMY

Economy—overview: Zimbabwe’s economy is growing despite continuing political uncertainty. Following a decade of contraction from 1998 to 2008, Zimbabwe’s economy recorded real growth of roughly 10% per year in 2010-11, before slowing in 2012-13 due poor harvests and low diamond revenues. The government of Zimbabwe faces a number of difficult economic problems, including infrastructure and regulatory deficiencies, ongoing indigenization pressure, policy uncertainty, a large external debt burden, and insufficient formal employment. Until early 2009, the Reserve Bank of Zimbabwe routinely printed money to fund the budget deficit, causing hyperinflation. Dollarization in early 2009—which allowed currencies such as the Botswana pula, the South Africa rand, and the US dollar to be used locally—ended hyperinflation and reduced inflation below 10% per year, but exposed structural weaknesses that continue to inhibit broad-based growth.

TRANSNATIONAL ISSUES

Disputes—international: Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river; South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

Refugees and internally displaced persons:

IDPs: undetermined (political violence, human rights violations, land reform, and economic collapse) (2012)

Trafficking in persons: *current situation*: Zimbabwe is a source, transit, and destination country for men, women, and children subjected to forced labor

and sex trafficking; Zimbabwean women and girls from towns bordering South Africa, Mozambique, and Zambia are subjected to prostitution, sometimes being sold by their parents; Zimbabwean men, women, and children are subjected to forced labor in agriculture and domestic service in rural areas, as well as domestic servitude and sex trafficking in cities and towns; Zimbabwean women and men are lured into exploitative labor situations in Angola, Botswana, Mozambique, the United Arab Emirates, Malaysia, Nigeria, and South Africa with false job offers, while women and girls are lured to China, Egypt, the UK, and Canada and forced into prostitution; adults and children from Bangladesh, Somalia, India, Pakistan, the Democratic Republic of the Congo, Malawi, Mozambique, and Zambia are trafficked through Zimbabwe en route to South Africa

tier rating: Tier 3—Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; tangible efforts to investigate and prosecute trafficking offenses, including those allegedly involving government officials, and to protect victims remain minimal; the government continues to rely on an international organization to provide law enforcement training and on NGOs to identify and assist victims without government support for such work; a national trafficking awareness campaign was launched in November 2012 (2013)

Illicit drugs: transit point for cannabis and South Asian heroin, mandrax, and methamphetamines en route to South Africa

Antarctic—Environmental Protocol

see Protocol on Environmental Protection to the Antarctic Treaty

Antarctic Treaty

opened for signature—1 December 1959

entered into force—23 June 1961

objective—to ensure that Antarctica is used for peaceful purposes only (such as international cooperation in scientific research); to defer the question of territorial claims asserted by some nations and not recognized by others; to

provide an international forum for management of the region; applies to land and ice shelves south of 60 degrees south latitude

parties—(50) Argentina, Australia, Austria, Belarus, Belgium, Brazil, Bulgaria, Canada, Chile, China, Colombia, Cuba, Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Germany, Greece, Guatemala, Hungary, India, Italy, Japan, North Korea, South Korea, Malaysia, Monaco, Netherlands, NZ, Norway, Pakistan, Papua New Guinea, Peru, Poland, Portugal, Romania, Russia, Slovakia, South Africa, Spain, Sweden, Switzerland, Turkey, Ukraine, UK, US, Uruguay, Venezuela

Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal

note—abbreviated as Hazardous Wastes

opened for signature—22 March 1989

entered into force—5 May 1992

objective—to reduce transboundary movements of wastes subject to the Convention to a minimum consistent with the environmentally sound and efficient management of such wastes; to minimize the amount and toxicity of wastes generated and ensure their environmentally sound management as closely as possible to the source of generation; and to assist LDCs in environmentally sound management of the hazardous and other wastes they generate

parties—(171) Albania, Algeria, Andorra, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, The Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Cook Islands, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, EU, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Guatemala, Guinea, Guinea-Bissau, Guyana, Honduras, Hungary, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kiribati, North Korea, South Korea, Kuwait, Kyrgyzstan, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, Netherlands,

note—abbreviated as Air Pollution-Nitrogen Oxides

opened for signature—31 October 1988

entered into force—14 February 1991

objective—to provide for the control or reduction of national nitrogen oxide emissions and their transboundary fluxes

parties—(35) Albania, Austria, Belarus, Belgium, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, EU, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Liechtenstein, Lithuania, Luxembourg, Macedonia, Netherlands, Norway, Poland, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Ukraine, UK, US

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution Concerning the Control of Emissions of Volatile Organic Compounds or Their Transboundary Fluxes

note—abbreviated as Air Pollution-Volatile Organic Compounds

opened for signature—18 November 1991

entered into force—29 September 1997

objective—to provide for the control and reduction of national emissions of volatile organic compounds in order to reduce their transboundary fluxes

parties—(23) (24) Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Hungary, Italy, Liechtenstein, Lithuania, Luxembourg, Macedonia, Monaco, Netherlands, Norway, Slovakia, Spain, Sweden, Switzerland, UK

countries that have signed, but not yet ratified—(6) Canada, EU, Greece, Portugal, Ukraine, US

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution on Further Reduction of Sulphur Emissions

note—abbreviated as Air Pollution-Sulphur 94

opened for signature—14 June 1994

entered into force—5 August 1998

objective—to provide for a further reduction in national sulfur emissions or transboundary fluxes on a regional basis within Europe

parties—(29) Austria, Belgium, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, EU, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Liechtenstein, Lithuania, Luxembourg, Macedonia, Monaco, Netherlands, Norway, Slovakia, Slovenia, Spain, Sweden, Switzerland, UK

countries that have signed, but not yet ratified—(3) Poland, Russia, Ukraine

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution on Persistent Organic Pollutants

note—abbreviated as Air Pollution-Persistent Organic Pollutants

opened for signature—24 June 1998

entered into force—23 October 2003

objective—to provide for the control, reduction, or elimination of discharges, emissions of persistent organic pollutants

parties—(33) Austria, Belgium, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, EU, Finland, France, Germany, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Montenegro, Netherlands, Norway, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, UK

countries that have signed, but not yet ratified—(8) Armenia, Greece, Ireland, Poland, Portugal, Spain, Ukraine, US

Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution on the Reduction of Sulphur Emissions or Their

Transboundary Fluxes by at Least 30%

note—abbreviated as Air Pollution-Sulphur 85

opened for signature—8 July 1985

entered into force—2 September 1987

objective—to provide for national reductions in sulfur emissions or transboundary fluxes by 30% of 1980 emission or transboundary flux levels by no later than 1993

parties—(23) Albania, Austria, Belarus, Belgium, Bulgaria, Canada, Czech Republic, Denmark, Estonia, Finland, France, Germany, Hungary, Italy, Liechtenstein, Lithuania, Luxembourg, Macedonia, Netherlands, Norway, Russia, Slovakia, Sweden, Switzerland, Ukraine

CROSS-REFERENCE LIST OF COUNTRY DATA CODES

GEOPOLITICAL ENTITIES and CODES (formerly FIPS PUB 10-4): FIPS PUB 10-4 was withdrawn by the National Institute of Standards and Technology on September 2, 2008 based on Public Law 104-113 (codified OMB Circular A-119 and the National Technology Transfer and Advancement Act of 1995). The National Geospatial-Intelligence Agency (NGA), as the maintenance authority for FIPS PUB 10-4, has continued to maintain and provide regular updates to its content in a document known as Geopolitical Entities and Codes (GEC) (Formerly FIPS 1PUB 10-4).

ISO 3166: Codes for the Representation of Names of Countries (ISO 3166) is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange.

STANAG 1059: Letter Codes for Geographical Entities (8th edition, 2004) is a Standardization Agreement (STANAG) established and maintained by the North Atlantic Treaty Organization (NATO/OTAN) for the purpose of providing a common set of geo-spatial identifiers for countries, territories, and possessions. The 8th edition established trigraph codes for each country based upon the ISO 3166-1 alpha-3 character sets. These codes are used throughout NATO.

Internet: The Internet country code is the two-letter digraph maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

CROSS-REFERENCE LIST OF HYDROGRAPHIC DATA CODES

IHO 23-4th: *Limits of Oceans and Seas*, Special Publication 23, Draft 4th Edition 1986, published by the International Hydrographic Bureau of the International Hydrographic Organization.

IHO 23-3rd: *Limits of Oceans and Seas*, Special Publication 23, 3rd Edition 1953, published by the International Hydrographic Organization.

ACIC M 49-1: *Chart of Limits of Seas and Oceans*, revised January 1958, published by the Aeronautical Chart and Information Center (ACIC), United States Air Force.

DIAM 65-18: *Geopolitical Data Elements and Related Features*, Data Standard No. 4, Defense Intelligence Agency Manual 65-18, December 1994, published by the Defense Intelligence Agency. The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. *Fact book* users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies. The recently delimited Southern Ocean is not included.

APPENDIX G

WEIGHTS AND MEASURES

Note: At this time, only three countries—Burma, Liberia, and the US—have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures. Although use of the metric system has been sanctioned by law in the US since 1866, it has been slow in displacing the American adaptation of the British Imperial System known as the US Customary System. The US is the only industrialized nation that does not mainly use the metric system in its commercial and standards activities, but there is increasing acceptance in science, medicine, government, and many sectors of industry.
